All screenshots were captured from the live application. Open this file from the Sign in page **Demo** button (or admin **Help Center**) to always use the latest copy.

1. What My Stores Hubs does

> My Stores Hubs is a multi-tenant commerce platform: shoppers browse stock, add items to a cart, and place an order. The system creates a bill, and the store collects payment (QR, cash on delivery, or at the counter). A store owner verifies the order, approves it (this generates a Purchase Order), then marks it dispatched. The Super Admin provisions and brands each store independently.

End-to-end flow

1. A visitor browses the public Shopping Mall, or signs in with an existing account.
2. The shopper adds products to the cart and clicks **Place order**.
3. A bill is created with status **pending**, together with a payment method (QR, cash on delivery, or pay at counter).
4. The store owner opens **Orders**, confirms payment, and chooses **Approve** (a Purchase Order is generated) or **Reject**.
5. When the order is packed, the store owner marks it **Dispatch**.

> New visitors who are not ready to create an account can use **Register Me** on the Sign in page to leave their name, email, phone, and a note — this creates a contact request that only the Super Admin can see on the Feedback page.

2. Website features and access roles

> The site separates shopping, store operations, and platform management into three roles. On the sign-in page the title bar says **Login**. After sign-in, the header shows the person's name and role.

Role (shown in header)	Main features	Where they land after sign-in
Client (shopper)	Shopping Mall, a store page, Shop, Cart, My Orders, and My account	Shopping Mall
Customer (store owner)	Home, Stores, Orders, Product, Add Product, Reports, Employees, and Clone Store	Home
Super Admin	Dashboard, Stores, Hubs, Users, Apps & Billing, Plans, Feedbacks, System Health, Reports, Settings, Generate Ads, and the workbook template	Settings

> Each store (a "Customer" business) is fully isolated — its branding, logo, checkout QR, product catalogue, clients, employees, and orders never mix with another store's data.

3. Browse the Shopping Mall (guest catalogue)

> The Shopping Mall is open to everyone, signed in or not. Store cards show the store name and recent order count. Email and mobile stay on the hub screens. One search box looks through every store.

How to do it

1. Open **Shopping Mall** from the title bar, or go to `/shoppingmall`.
2. Pick a store. Its products load beside the store list.
3. Type in **Search every store**. A match from another store still appears, with that store's name.
4. Open a product for its own page. The title includes the price in rupees.

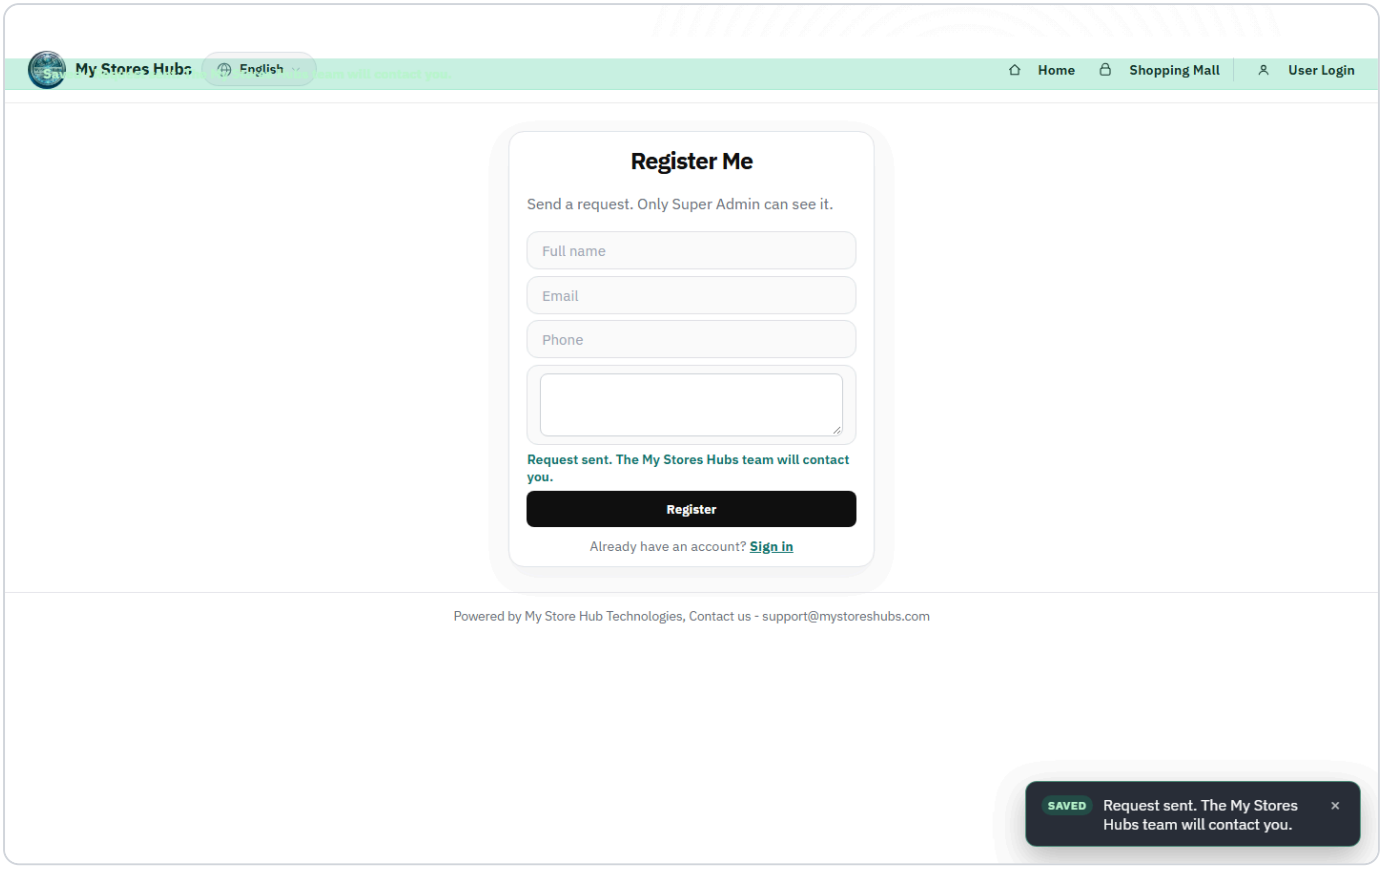

Screen: Browse the Shopping Mall (guest catalogue)

4. Register Me (contact request)

> The Register Me form on the Sign in page does not create a login — it sends a short contact request (name, email, phone, and a note) that only the Super Admin can read and action on the Feedback page. This is the easiest way for a new visitor to ask for access or help.

How to do it

1. On the Sign in page, click **Register Me**.
2. Fill in your full name, email, phone, and a short note about what you need.
3. Click **Submit**. A confirmation message appears on screen.
4. The Super Admin sees the request on the **Feedback** page under Contact requests and marks it Pending or Done.

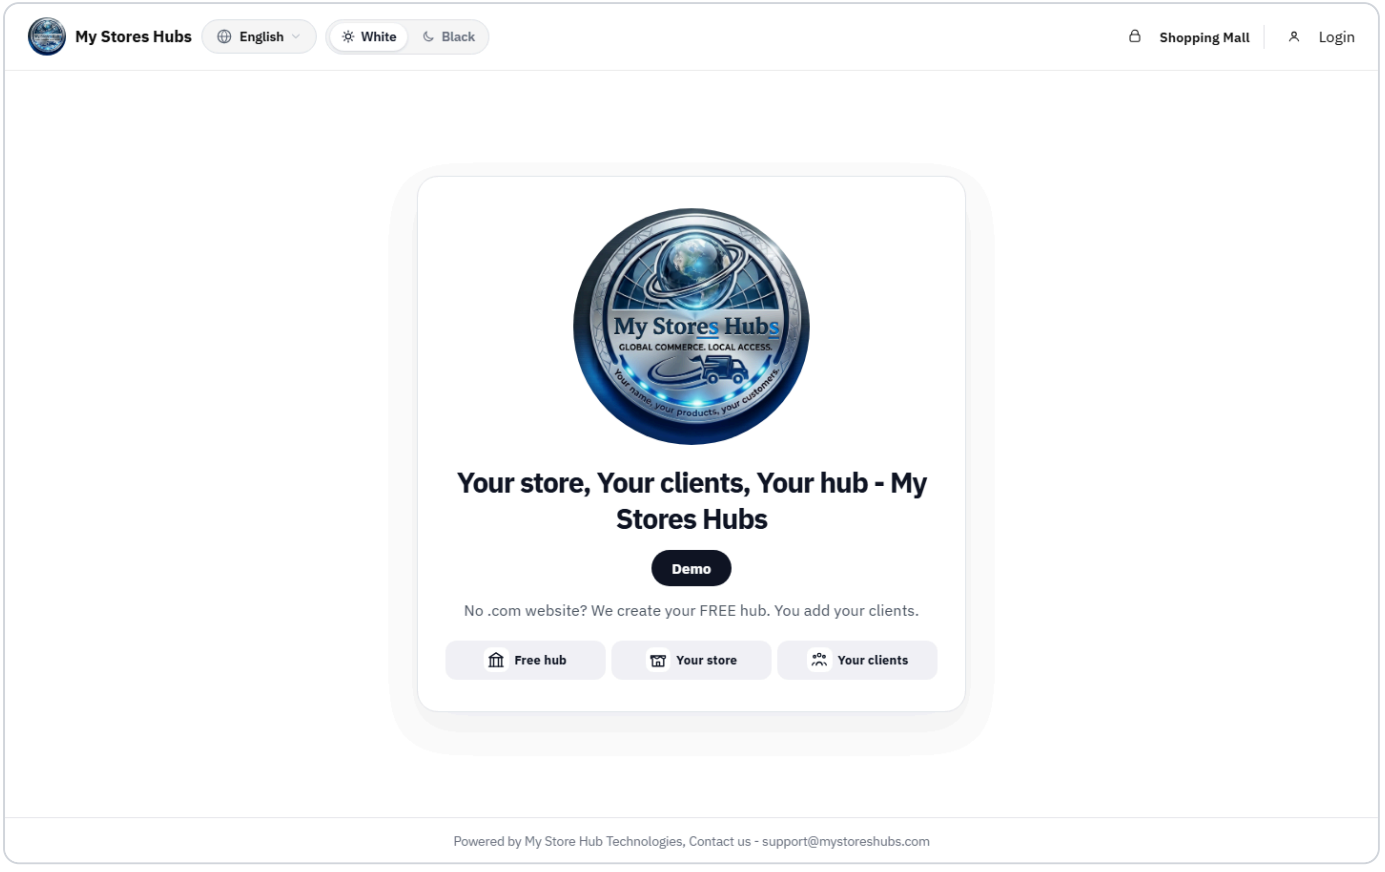

Screen: Register Me (contact request)

5. Sign in, Theme, and Language

> The sign-in page opens on the centered line “Your store, Your clients, Your hub - My Stores Hubs”, with Free hub, Your store, and Your clients. The sign-in form stays hidden until Login is clicked. Who We Are — MyStoresHubs stays further down the page.

How to do it

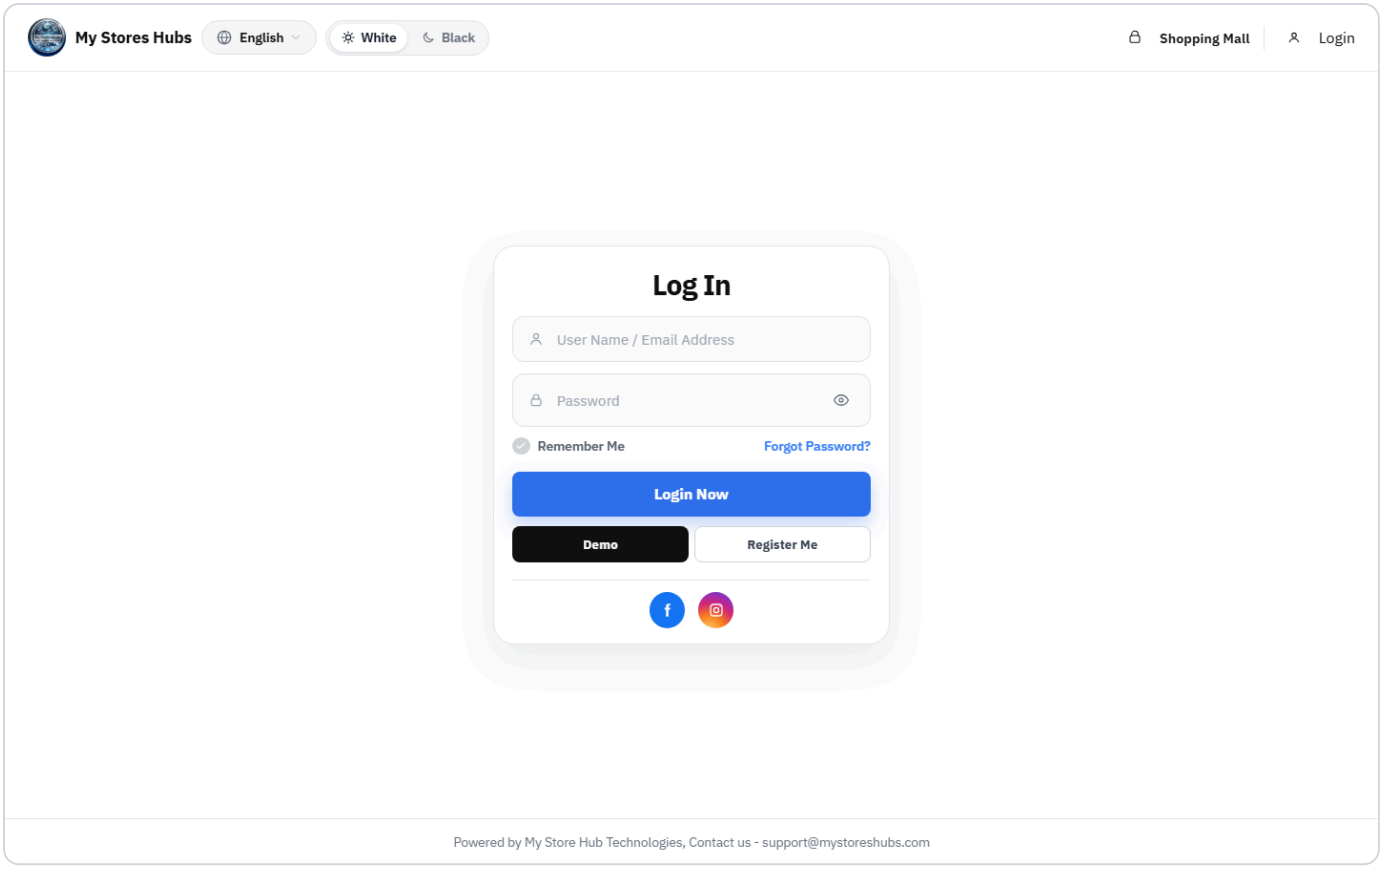

1. Open the sign-in page. The store line is centered.
2. Click **Login** in the title bar. The store line hides and the **Log In** form appears in the center.
3. Click **Login** again to hide the form and bring the store line back.
4. On the form, enter email and password, then click **Login Now**. Use **Remember Me** or **Forgot Password?** if needed.
5. Use White or Black for the theme, and the language menu for English, Hindi, Spanish, French, or Chinese.

Screen: Sign in, Theme, and Language

5b. The sign-in form

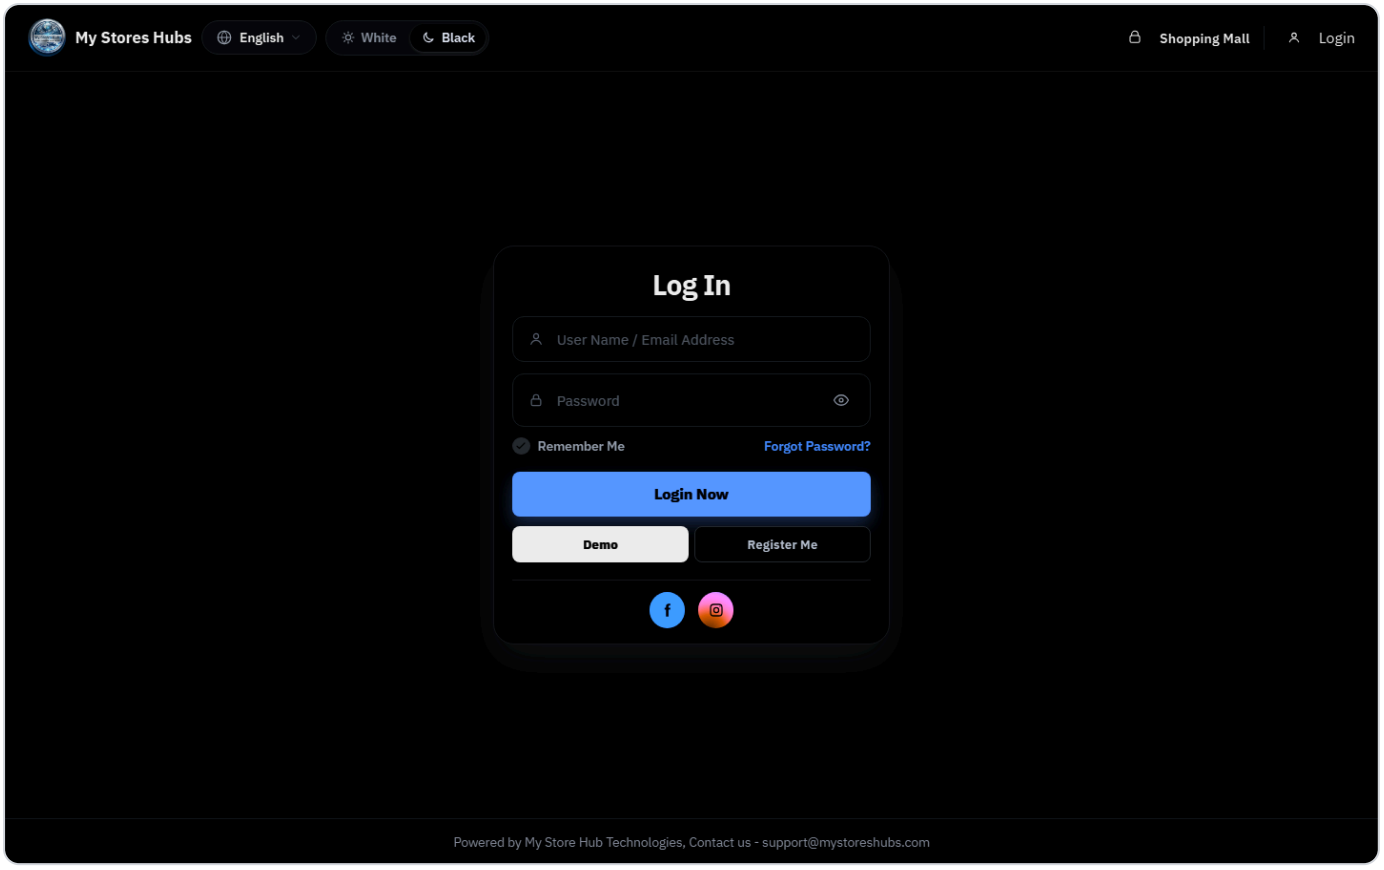

> Click **Login** in the title bar. The store line hides and this form is centered. Click **Login** again to return to the store line.

Screen: Log In form

5a. Black theme example

> Selecting **Black** inverts every page — including the embedded architecture guide — to a dark theme. Photos, logos, and QR codes stay in their true colours. Selecting **White** reverts instantly.

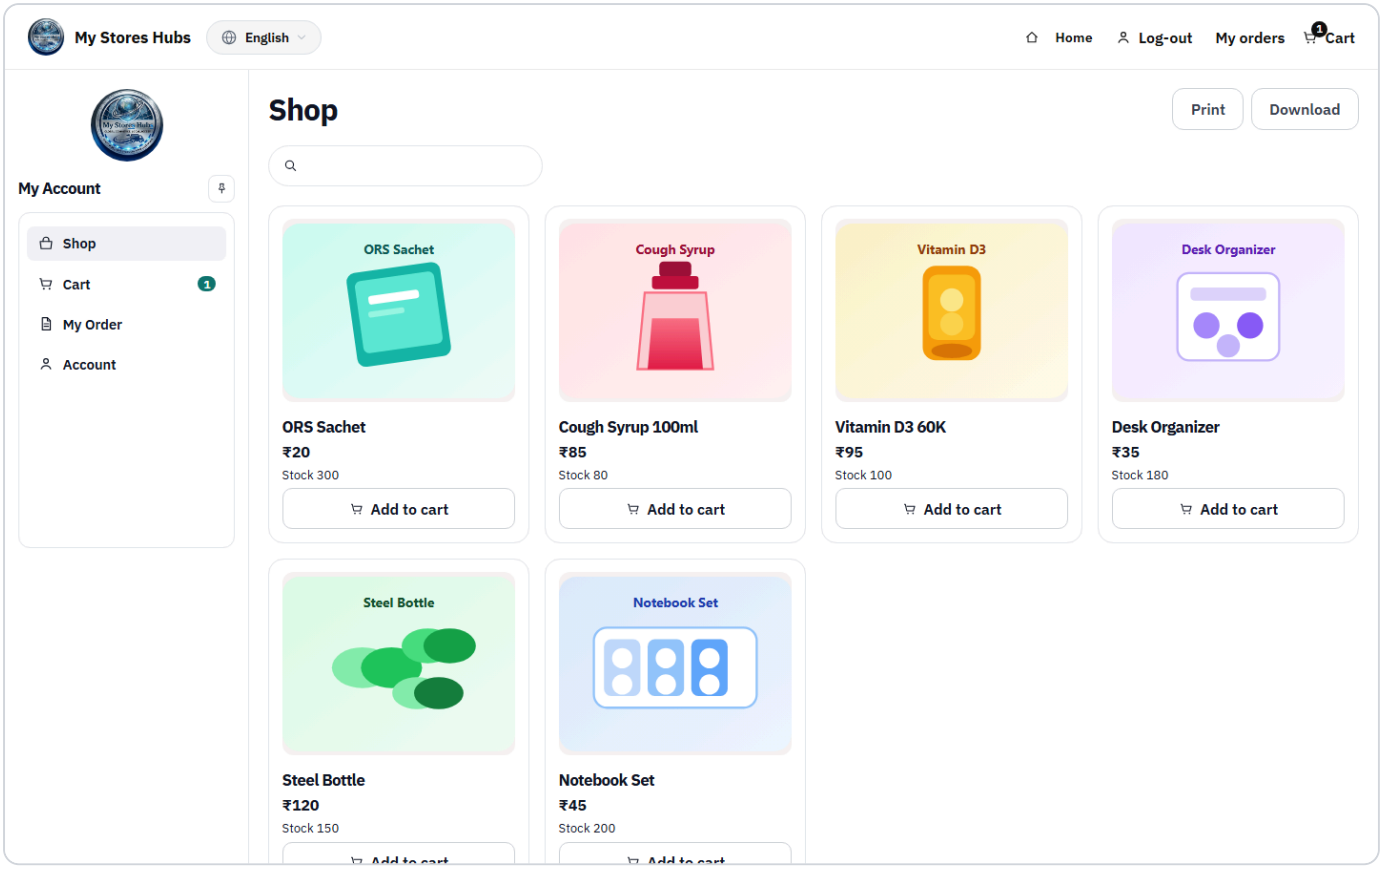

Screen: Sign in page in Black theme

6. Shop and add to cart

> After signing in as a Client, **Shop** shows the current store's catalogue with images, price, and live stock. Adding an item puts it straight into the Cart.

How to do it

1. Sign in with a Client (shopper) account. The left menu shows Shop, Cart, and My orders.
2. Open **Shop** and use the search box if needed.
3. Click **Add to cart** on each item you want. The button disables automatically when stock is zero.
4. The Cart icon in the side menu shows a live count of items selected.

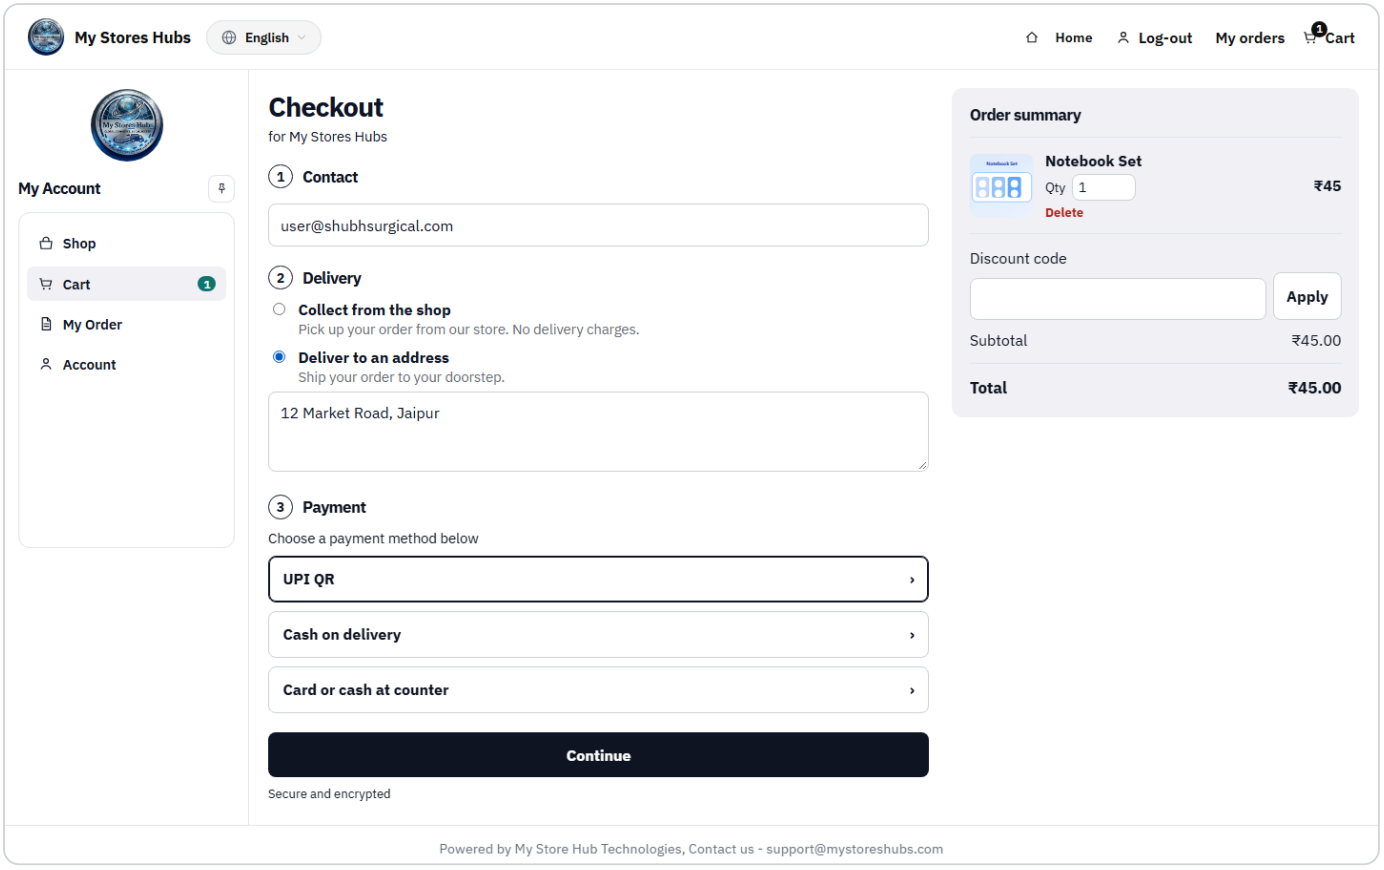

Screen: Shop and add to cart

7. Cart, payment, and place order

> The Cart lets you adjust quantity (up to available stock), remove items, choose a payment method, and optionally apply a discount code before placing the order.

How to do it

1. Open **Cart** from the side menu.
2. Change **Qty** or click **Remove** on any line.
3. Pick a payment method: **UPI / QR**, **Cash on delivery**, or **Pay at counter**.
4. Optionally enter a discount code, then click **Place order**.

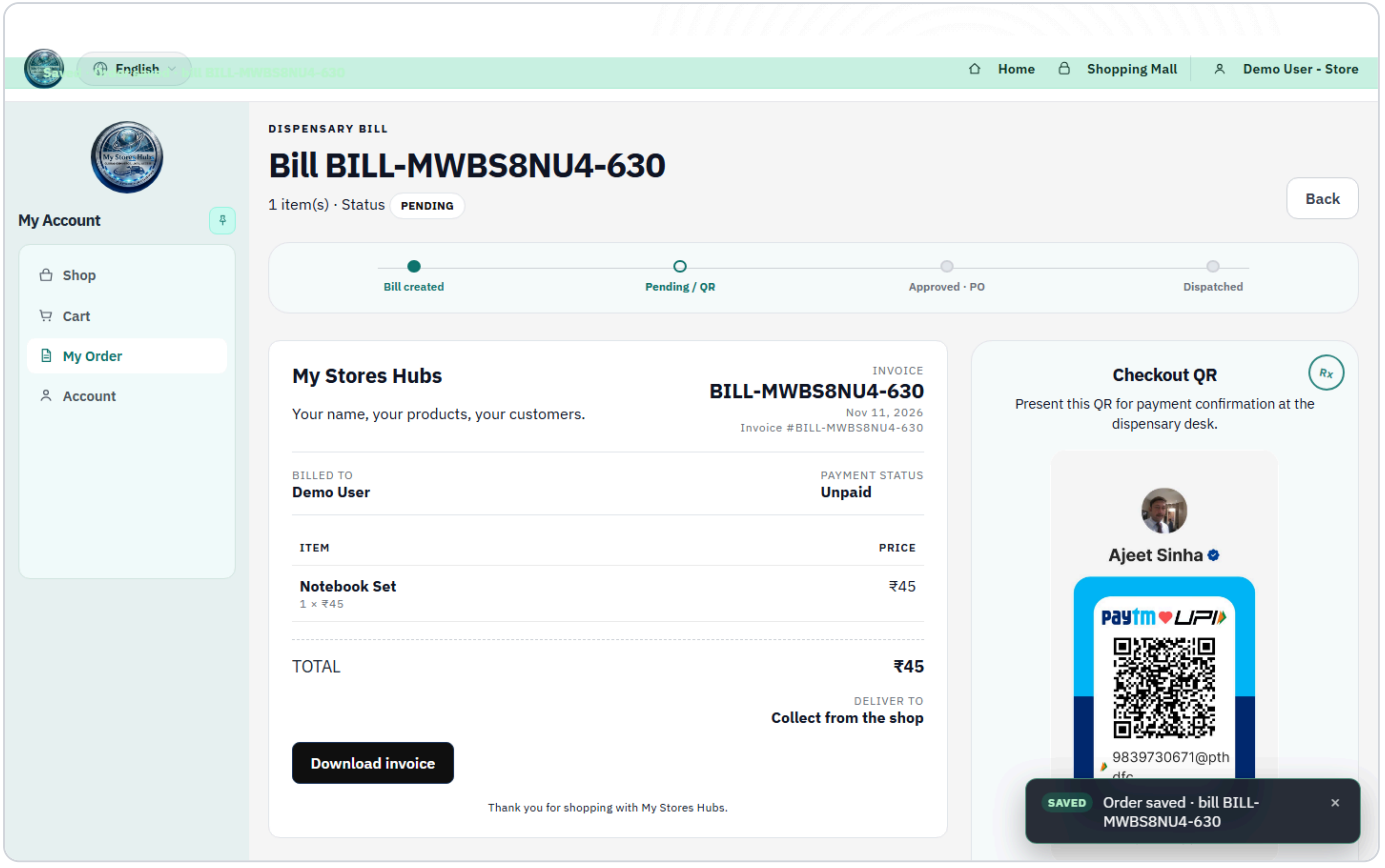

Screen: Cart, payment, and place order

8. Bill and order status

> Placing an order opens the bill page: item list, total, payment method, and (for UPI) the Checkout QR. A visual pipeline shows where the order currently stands.

How to do it

1. Read the bill number, items, and total amount.
2. If you chose UPI, scan the **Checkout QR** and pay the billed amount; for cash on delivery or pay-at-counter, simply wait for the store to confirm.
3. Track the pipeline: Pending → Approved → Dispatched.
4. While the order is still pending, you can click **Cancel order** if you change your mind.

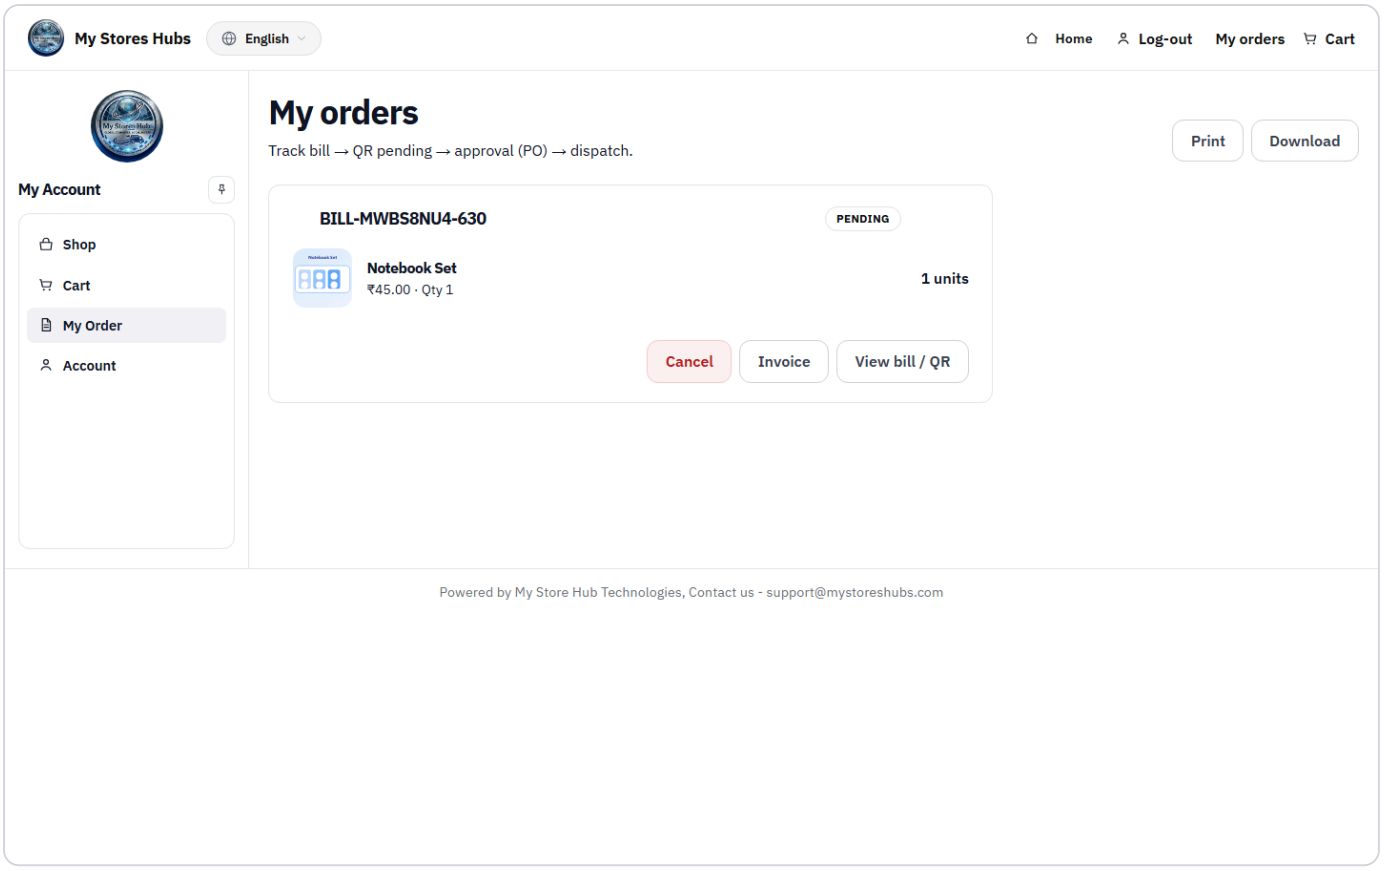

Screen: Bill and order status

9. My Orders

> My Orders lists every bill placed by the signed-in Client, with status and a link back to the bill.

How to do it

1. Open **My orders** from the side menu.
2. Find the bill number and current status (pending, approved, dispatched, rejected, or cancelled).
3. Click **View bill** to reopen the item list and payment details.

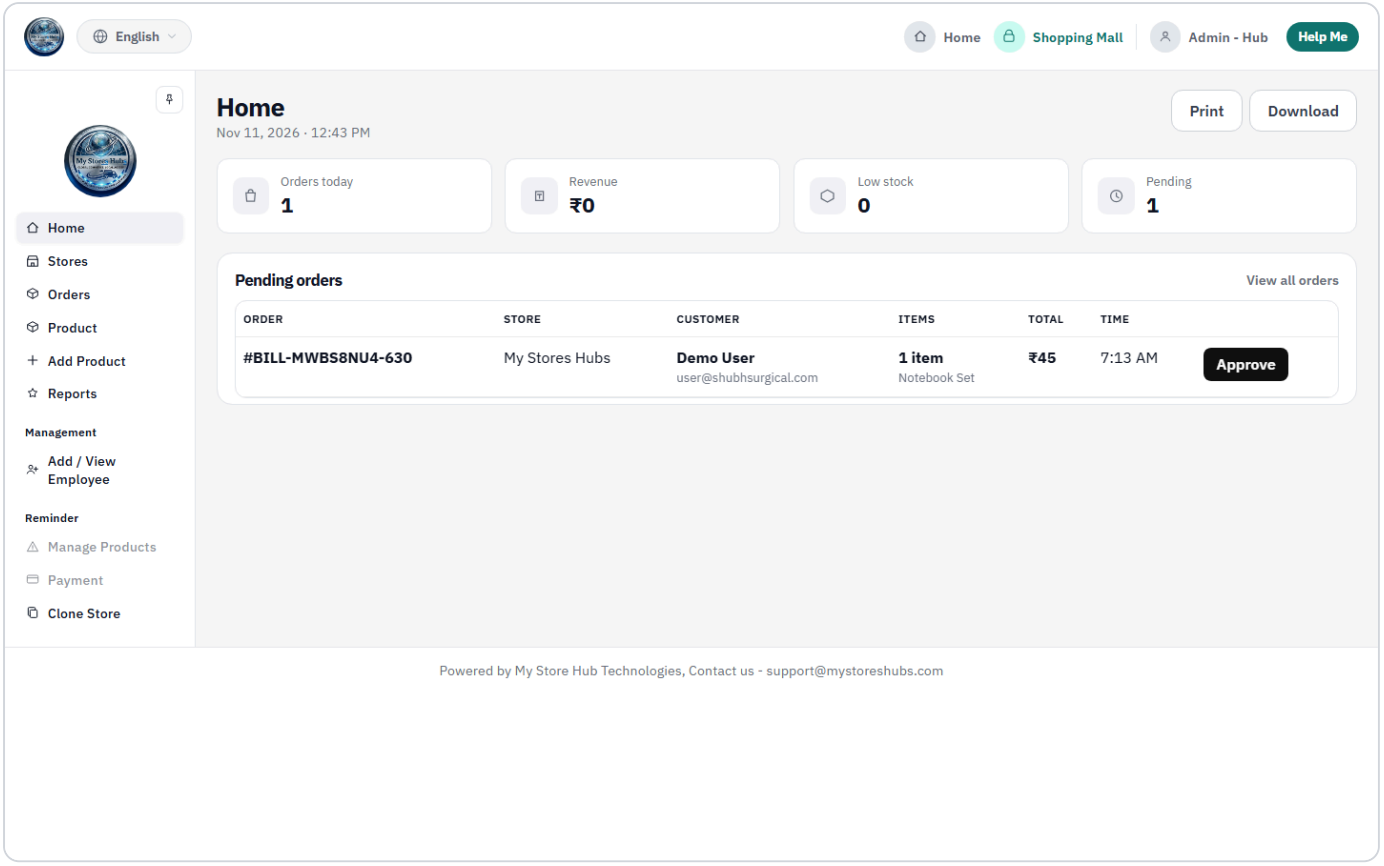

Screen: My Orders

10. Customer: Dashboard

> Dashboard is the store owner's landing page after sign-in. Summary cards show today's orders, pending approvals, revenue, low stock, and new clients, with quick actions to approve an order, restock an item, or add an employee without leaving the page.

How to do it

1. Sign in with a Customer (store owner) account — Dashboard opens automatically.
2. Read the summary cards, then click **Approve** on a pending order if needed.
3. Restock a low-stock item directly from the list, or add a new employee using the quick form.
4. Use the left menu to open Products, Orders, Clients, Employee, or Reports.

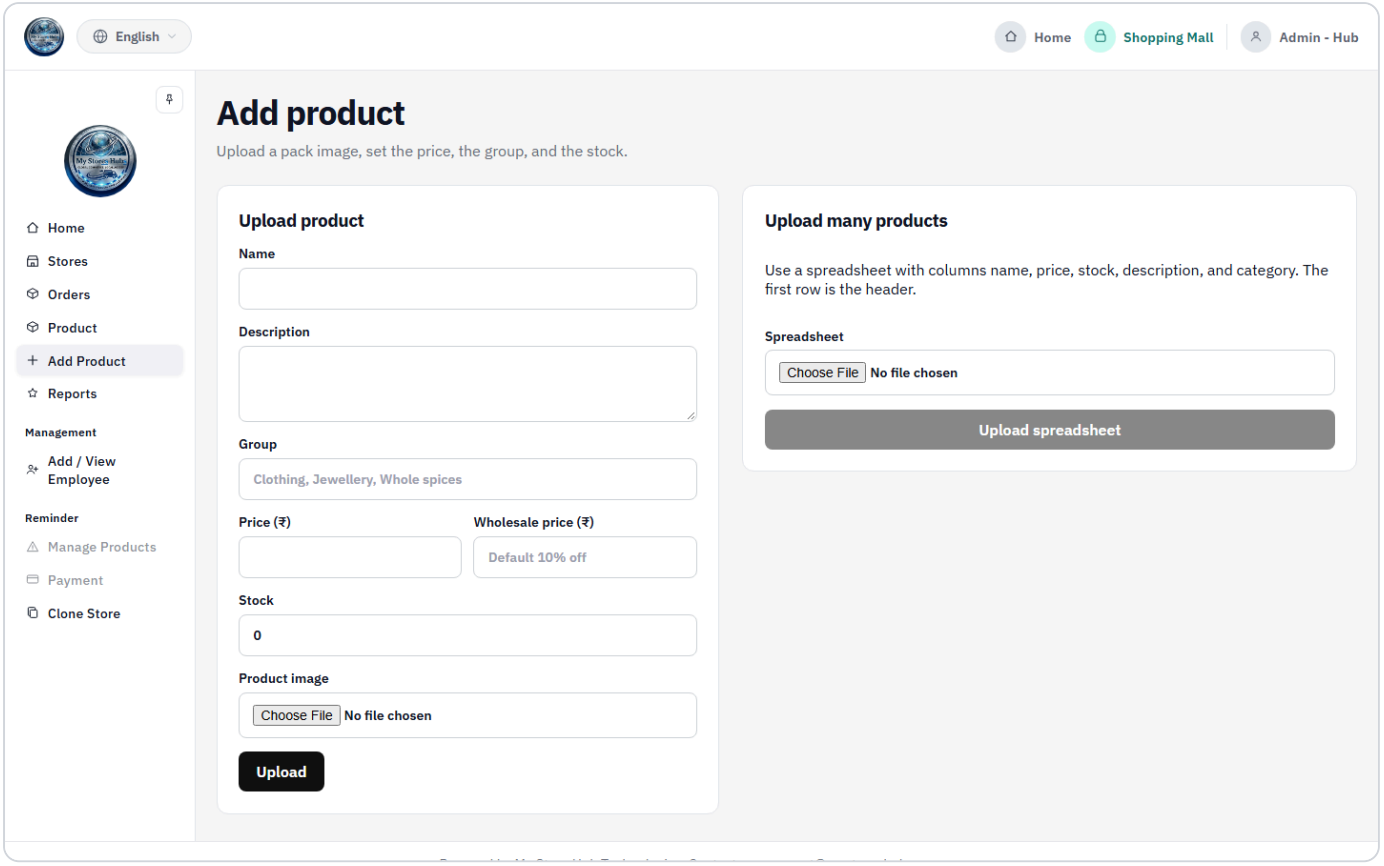

Screen: Customer: Dashboard

11. Customer: manage products

> Products is where the store owner maintains the catalogue shown to shoppers: name, description, retail price, optional wholesale price, stock, and a pack image.

How to do it

1. Open **Products** from the left menu.
2. Fill in the Upload product form — name, description, price, optional wholesale price, stock, and an image — then click **Upload**.
3. The product immediately appears in the Shopping Mall and Shop pages.
4. Use **Edit** to update a product, or **Delete** to remove it.

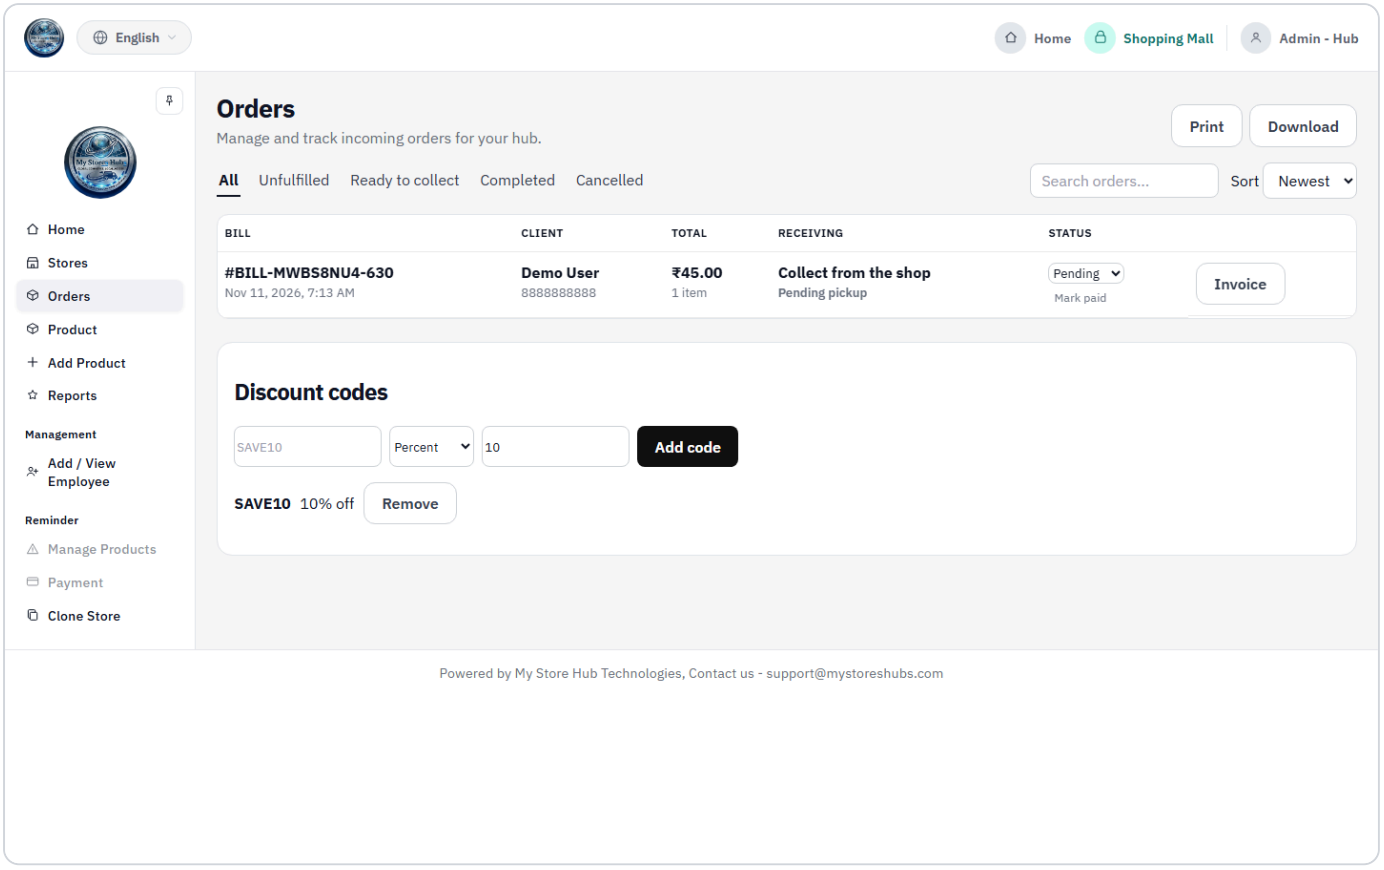

Screen: Customer: manage products

12. Customer: orders desk

> Orders is the operational desk: filter by status, open the bill, and move each order through the approval pipeline once payment is verified.

How to do it

1. Open **Orders**. Use the filters: All, Pending, Approved, Dispatched, Rejected, Cancelled.
2. Click **Bill / QR** to review items and the amount for any order.
3. Use the **Action** dropdown on each row to move the order between Pending, Approved, Dispatch, and Reject.
4. Discount codes for the store can be added or removed from the Discount codes panel at the bottom of this page.

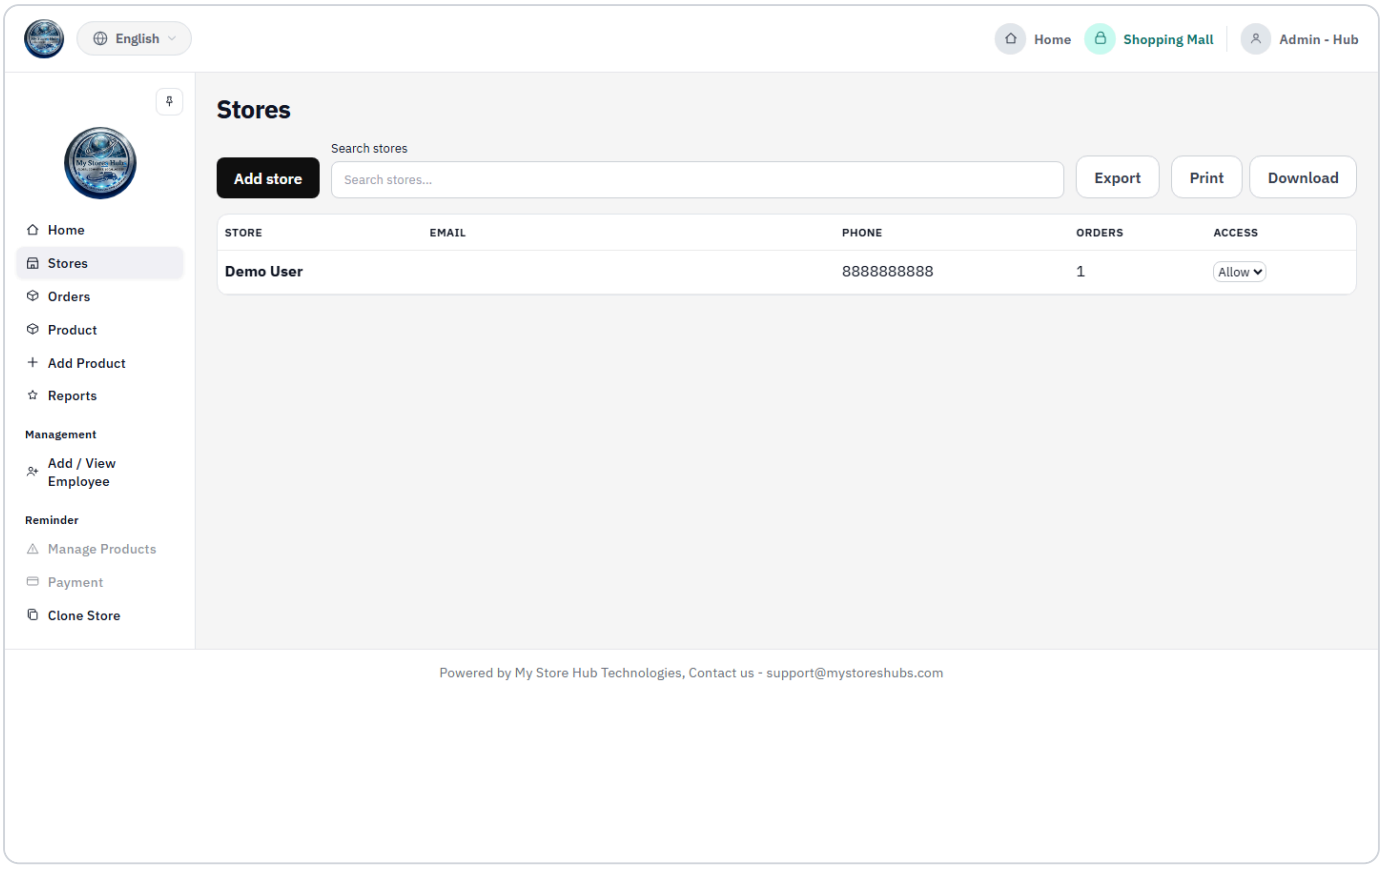

Screen: Customer: orders desk

13. Customer: Clients

> Clients lists every shopper account that belongs to this store. The store owner can add a new client, set Retail or Wholesale pricing, Allow or Block login, and open a client record for order history and a password reset.

How to do it

1. Open **Clients** from the left menu.
2. Use **Add client**: full name, email, a password of at least 6 characters, optional phone and address, and Retail or Wholesale group.
3. Share the password you typed with the client — it is stored encrypted and cannot be recovered later.
4. In the table, change **Group** (Retail/Wholesale) and **Access** (Allow/Block) with the dropdowns, or click **View** for history and a new password.
5. Click **Export client list** at the top to download a CSV of every client.

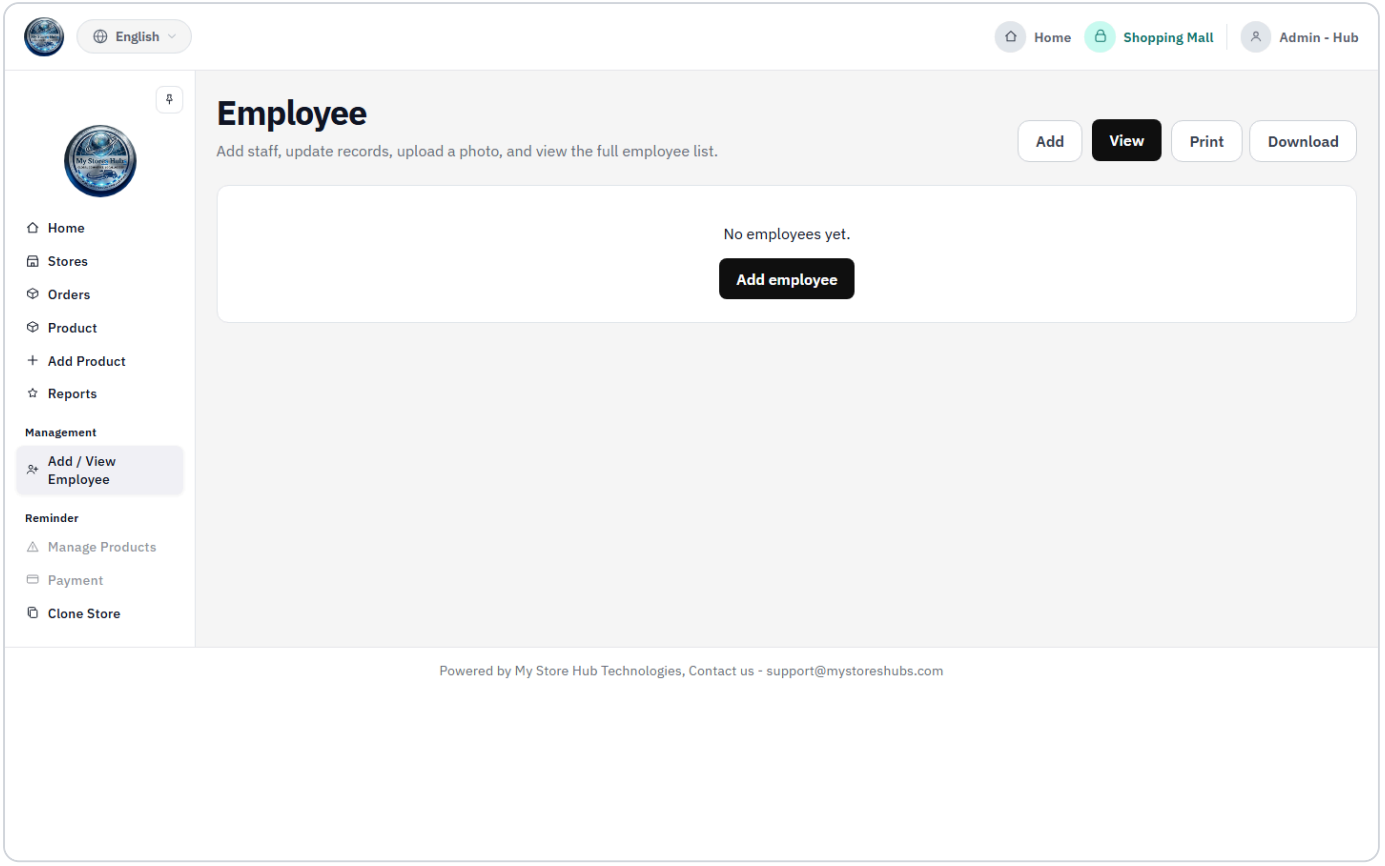

Screen: Customer: Clients

14. Customer: Employee

> Employee keeps a record of staff working at this store, including an optional photo. The page has two modes — Add (or Update) and View.

How to do it

1. Open **Employee** from the left menu. It opens on the Add form by default.
2. Fill the required fields (marked *): full name, email, phone, and designation. Department, joining date, address, and a photo are optional.
3. Click **Add employee** to save.
4. Switch to **View** to see the full employee table; use **Update** to edit a record or **Remove** to delete it.

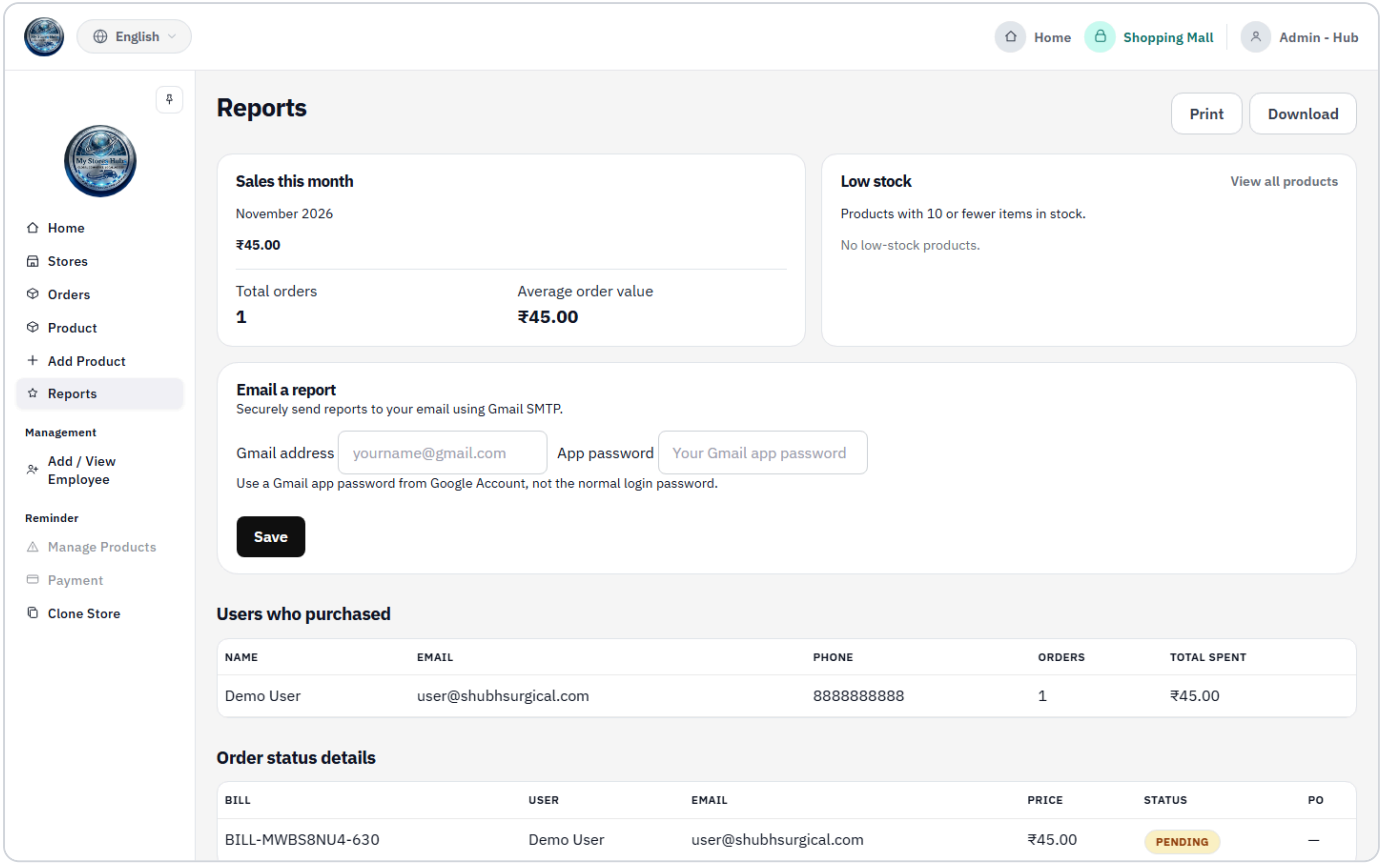

Screen: Customer: Employee

15. Customer: Reports

> Reports summarises buyers, revenue, and order status for this store, and can email a copy of the report.

How to do it

1. Open **Reports** from the left menu.
2. Read the stat cards: buyers, orders, revenue, pending, approved, dispatched, rejected, cancelled.
3. Scroll down for the list of buyers, order status details, and the best-selling products.
4. Order and report mail is kept on the server until Reports has a Gmail address and a Gmail app password. After those are saved, the report can be sent.

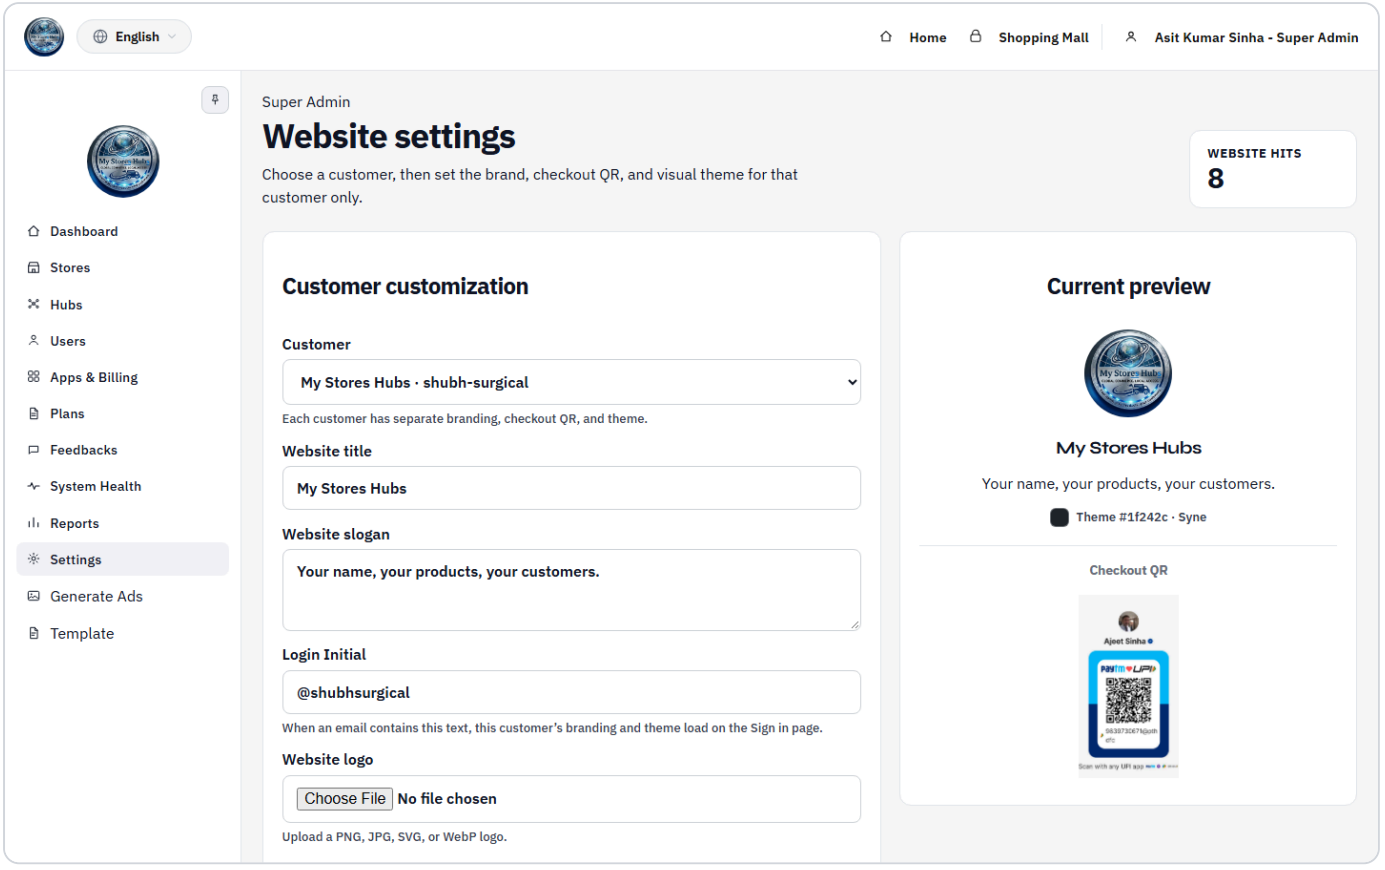

Screen: Customer: Reports

16. Super Admin: Settings

> Settings is the Super Admin's branding workspace. Pick a customer (store) first — the form then shows only that store's title, slogan, Login Initial, logo, checkout QR, theme colour, and heading font.

How to do it

1. Sign in as Super Admin. You land on **Settings**.
2. Choose the target store from the **Customer** dropdown — its current branding loads into the form.
3. Set the **Login Initial** (for example `@shubhsurgical`). When a visitor types an email containing that text on Sign in, this store's branding loads automatically, before login.
4. Update the website title, slogan, logo, checkout QR, theme colour, and heading font as needed.
5. Click **Save customer settings** — only the selected store is affected; every other store keeps its own look.

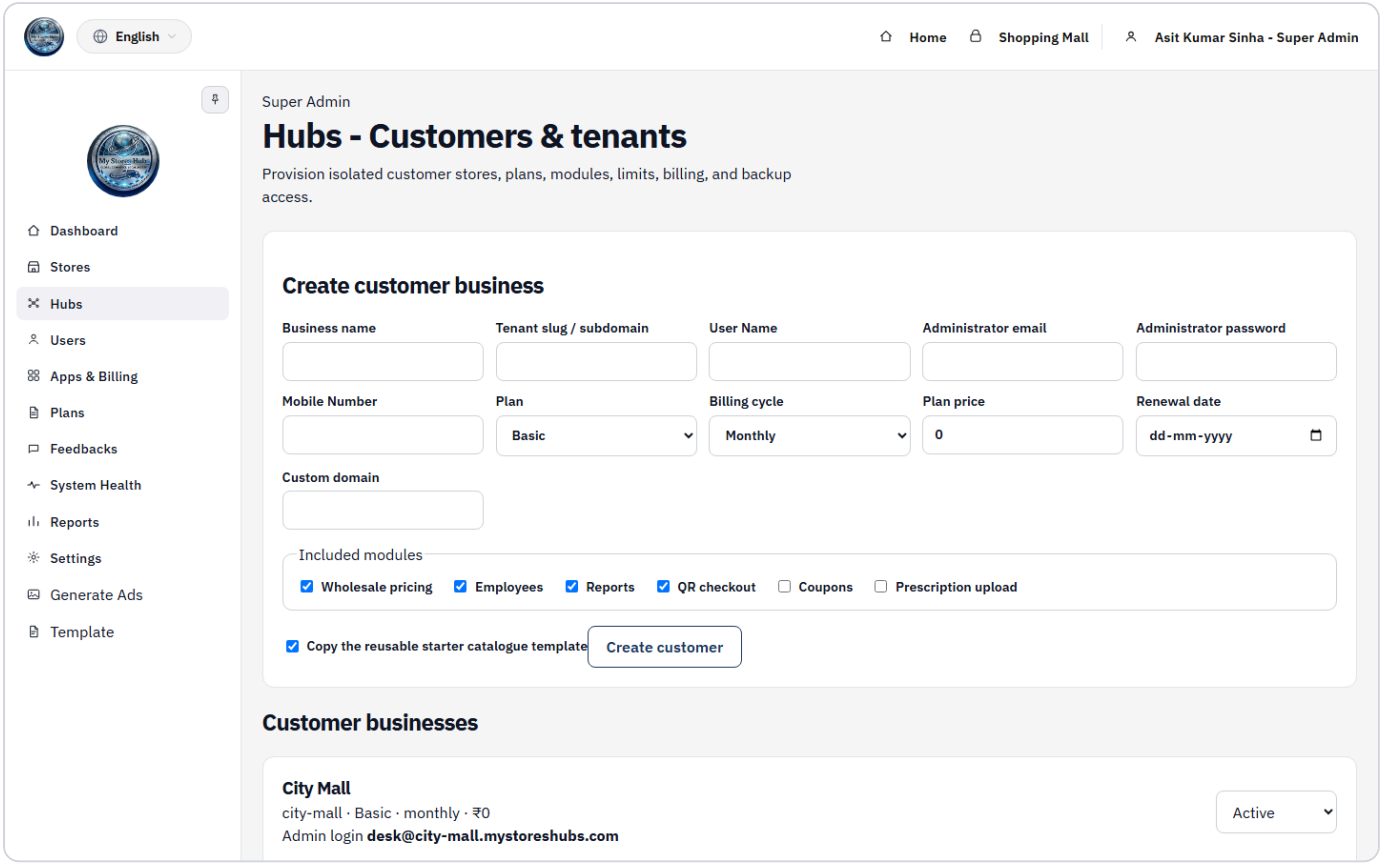

Screen: Super Admin: Settings

17. Super Admin: Customers & tenants

> Customers & tenants is where the Super Admin provisions brand-new, fully isolated store businesses, each with its own admin login, plan, modules, and usage limits. Do not confuse a "Customer" (a store business) with the "Clients" (shoppers) listed inside each store.

How to do it

1. Open **Customers & tenants**.
2. Fill in the Create customer business form: business name, slug, the first administrator's name/email/password, plan, billing details, and the modules to include (Wholesale, Employees, Reports, QR checkout, Coupons, Prescriptions).
3. Click **Create customer**, then securely share the new administrator's login with that store owner.
4. On any customer card, change its status (Active/Suspended/Archived), open the details panel to edit plan/price/payment/theme/modules, reset the admin password, export a backup, or archive the store.

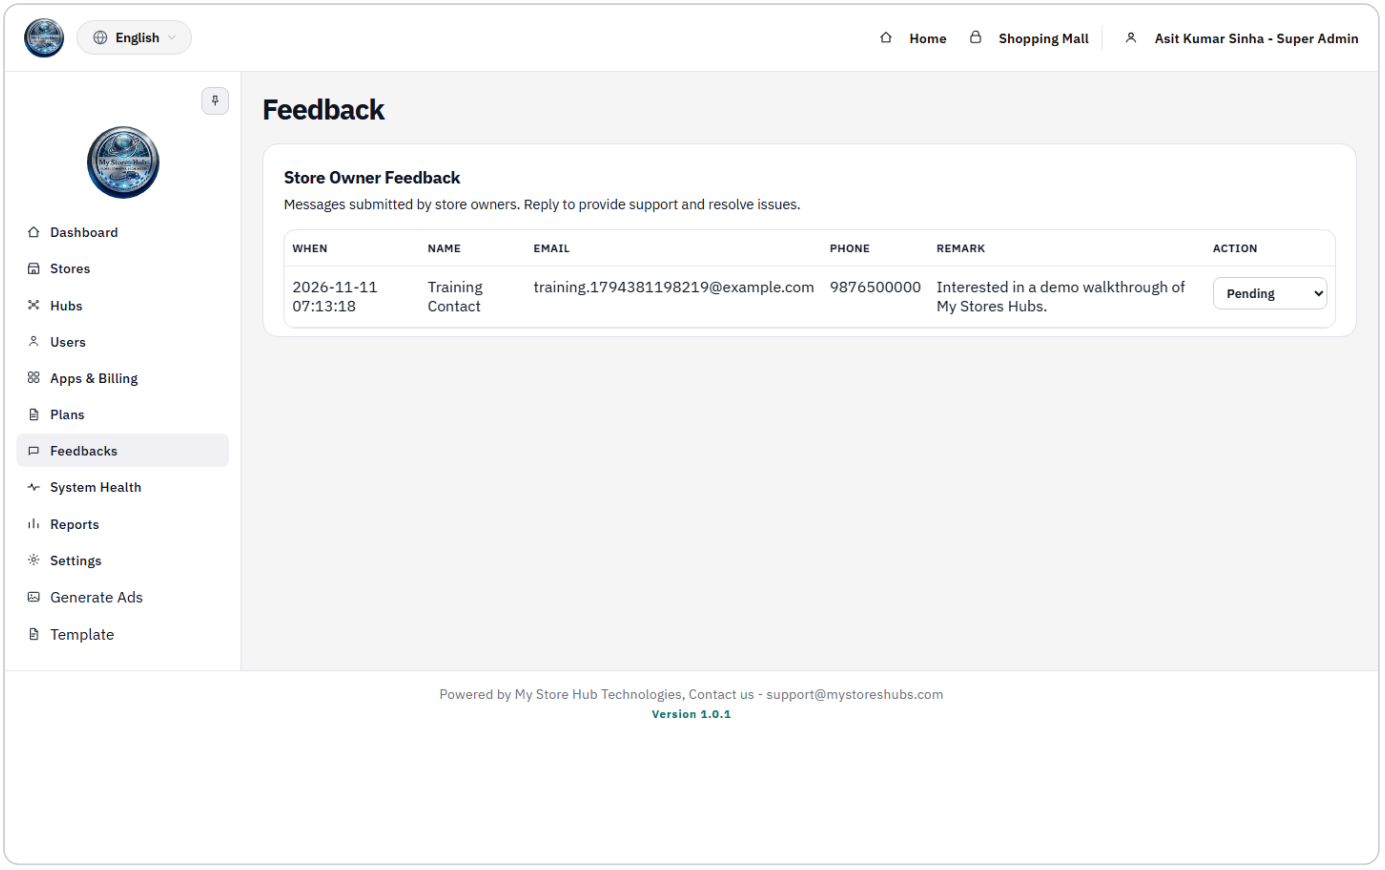

Screen: Super Admin: Customers & tenants

18. Super Admin: Feedback & contact requests

> Feedback is only visible to the Super Admin. It lists every Register Me contact request and every website feedback note, each with an Action dropdown (Pending / Done) so nothing gets lost.

How to do it

1. Open **Feedback**.
2. Review the **Contact requests** table — name, email, phone, and remark from the Register Me form.
3. Review the **Website feedback** table for general notes left by visitors.
4. Use the **Action** dropdown on each row to mark a request **Pending** or **Done** as it is handled.

Screen: Super Admin: Feedback & contact requests

19. Order status meaning (quick reference)

Status	Meaning
pending	Bill created. Waiting for payment to be checked by the store.
approved	Payment accepted. A Purchase Order (PO) number is generated.
dispatched	Order packed and sent out / ready for pickup.
rejected	Store declined the order (for example, payment did not match).
cancelled	Order was cancelled and will not proceed.

20. Feature map (all screens)

Who	Menu	What it does
Guest	Shopping Mall, Sign in, Register Me	Browse every store’s catalogue; sign in; or leave a contact request without an account
Client	Shop, Cart, My orders	Order products, pay, and track order status
Customer	Dashboard	Today’s orders, revenue, low stock, quick actions
Customer	Products	Upload, edit, delete products; retail/wholesale price
Customer	Orders	Approve, reject, or dispatch bills
Customer	Clients	Add shoppers; retail/wholesale; block/allow; CSV export
Customer	Employee	Add, view, update, remove staff, with photo
Customer	Reports	Sales statistics and email report
Customer / Super Admin	Help Center	Opens this user manual PDF
Super Admin	Settings	Per-customer branding, theme, and website hit count
Super Admin	Customers & tenants	Create store businesses, plans, modules, backups
Super Admin	Feedback	Contact requests and website feedback, each with an Action status
Guest	Mall groups	Electronics, Fashion, Home & Living, and Groceries across every store
Guest	Store and product pages	Each store and each product has its own link that can be shared
Guest	Demo	A short video of every main screen
Client	My account	The signed-in shopper’s own details
Customer	Product list and Clone Store	Search the catalogue, or copy a store under a new name

Super Admin	Dashboard, Stores, Users, Billing, Plans, Health, Reports	The whole platform, not one store
Super Admin	Generate Ads and Template	Download a poster, and download the hub workbook

22. Mall groups

> The Shopping Mall groups products from every store. Electronics, Fashion, Home & Living, and Groceries each open as their own set of results.

How to do it

1. On the Shopping Mall, use the group menu or a group tile.
2. The product list shows only that group, with the store name still on each item.
3. Choose **All groups** to see the full mall again.

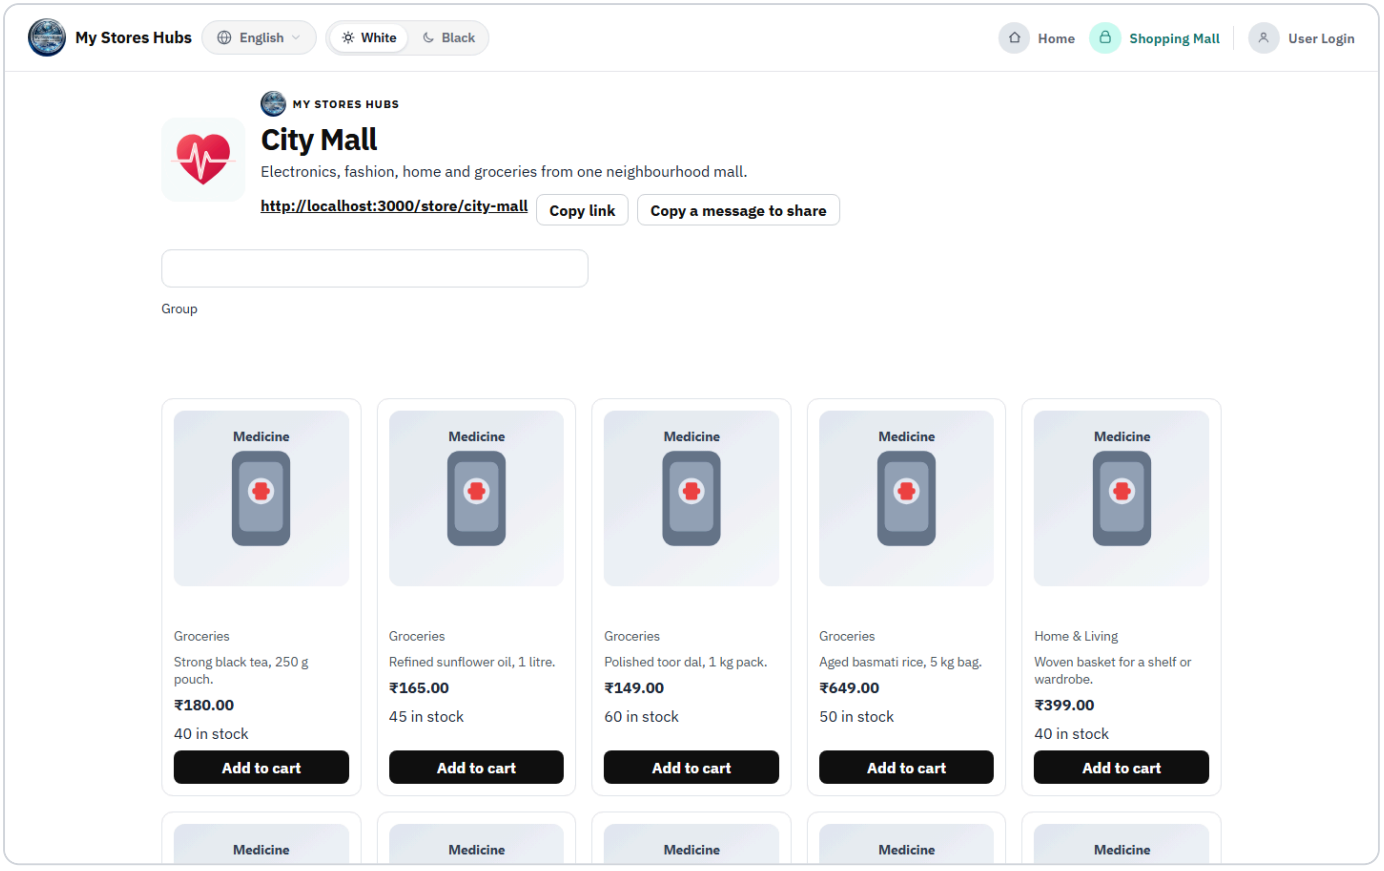

Screen: Mall groups

23. A store page

> Every store has its own address, for example City Mall at /store/city-mall. The page shows that store's groups, products, and a message you can copy.

How to do it

1. Open a store from the Shopping Mall.
2. Pick a group inside that store, such as Fashion or Groceries.
3. The address in the browser is the link you can send to a customer.

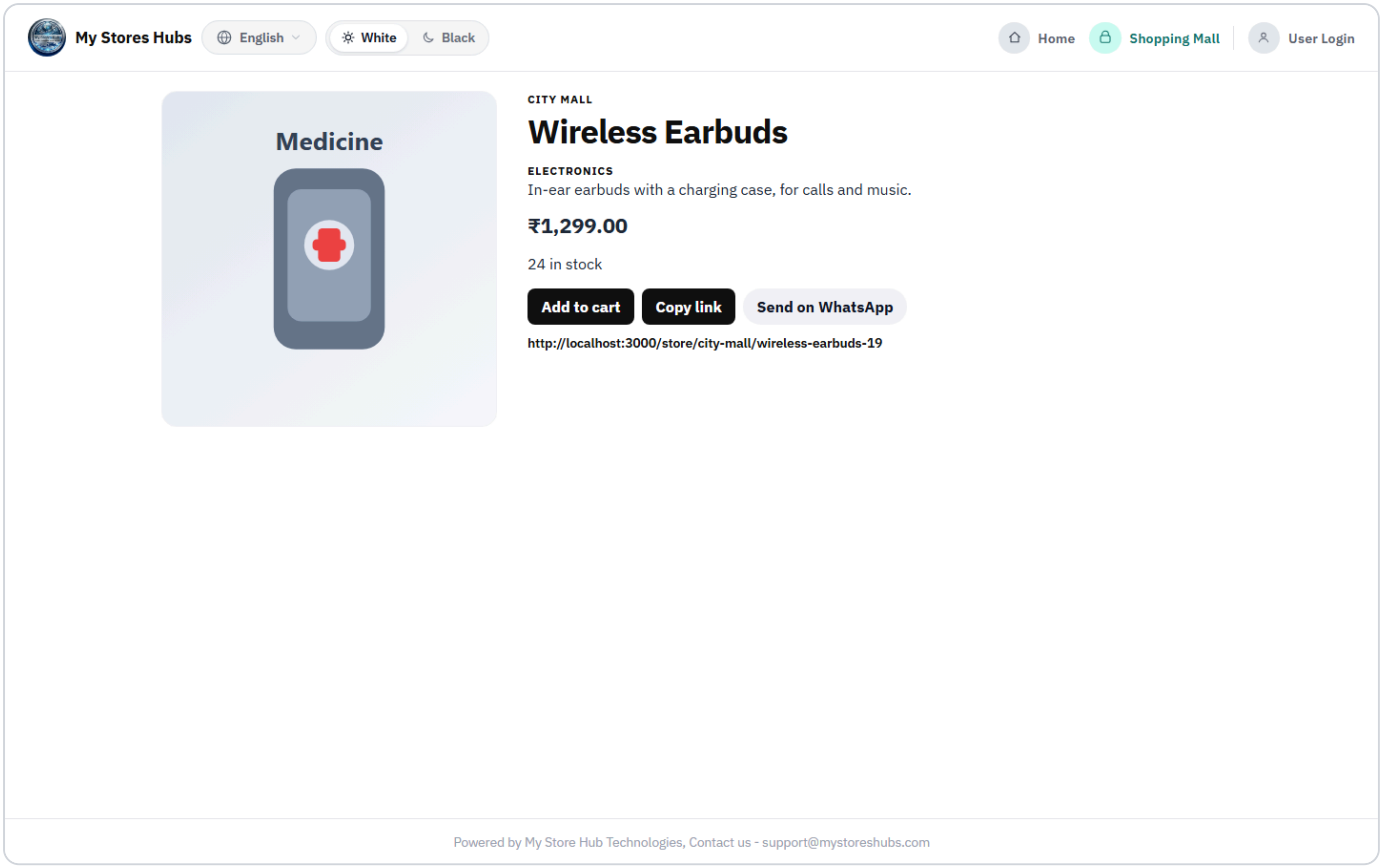

Screen: A store page

24. A product page

> Each product has its own page, with the price in rupees, the store name, and a way to ask about it on WhatsApp.

How to do it

1. Open a product from the mall or from a store.
2. Read the price, stock, and description.
3. Use the store name on the page to go back to that store.

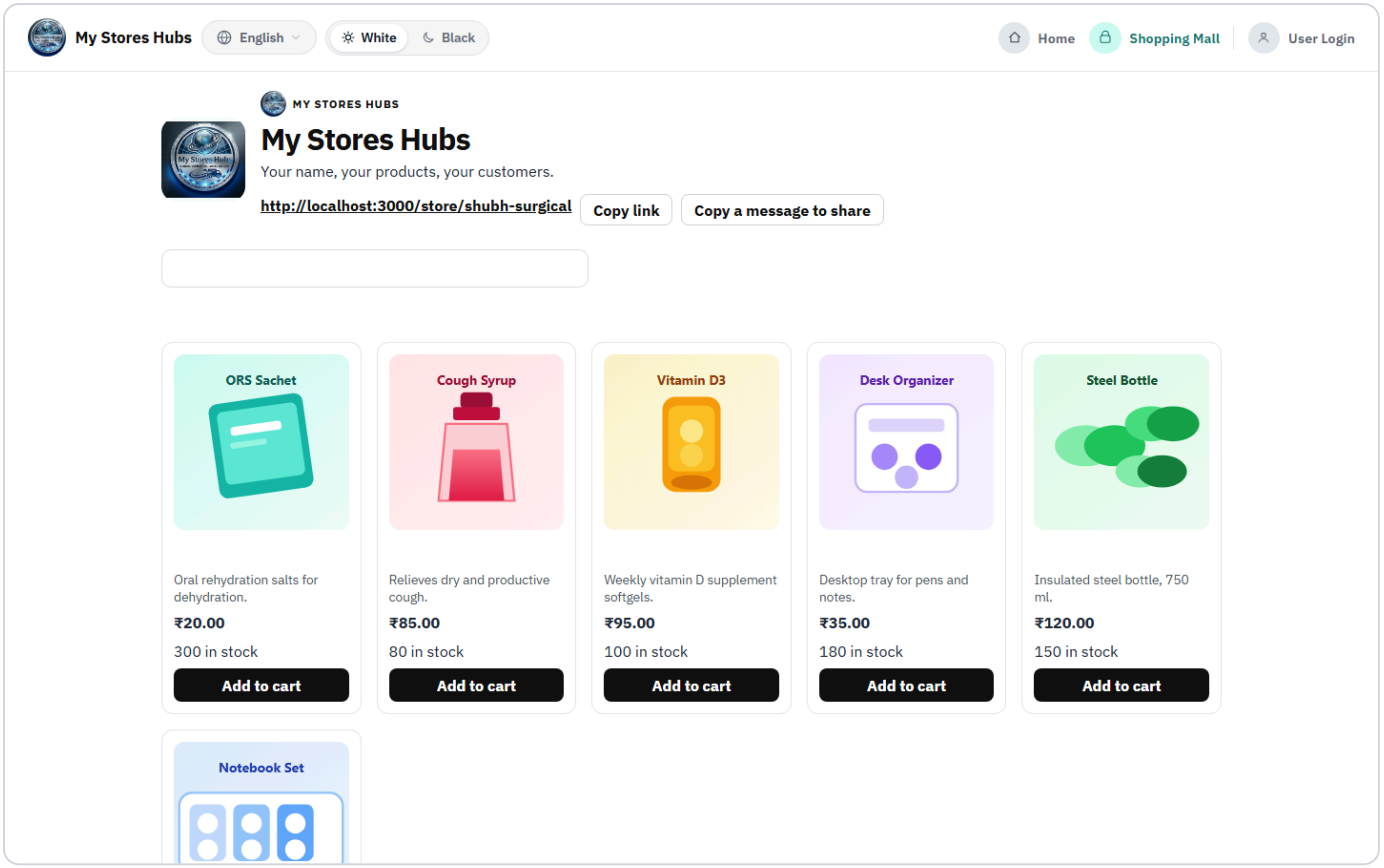

Screen: A product page

25. Share a store

> A store page can copy a ready-made message with the store link, so the owner can send it on WhatsApp or email.

How to do it

1. Open the store page.
2. Click **Copy a message to share**.
3. Paste the message wherever you talk to customers.

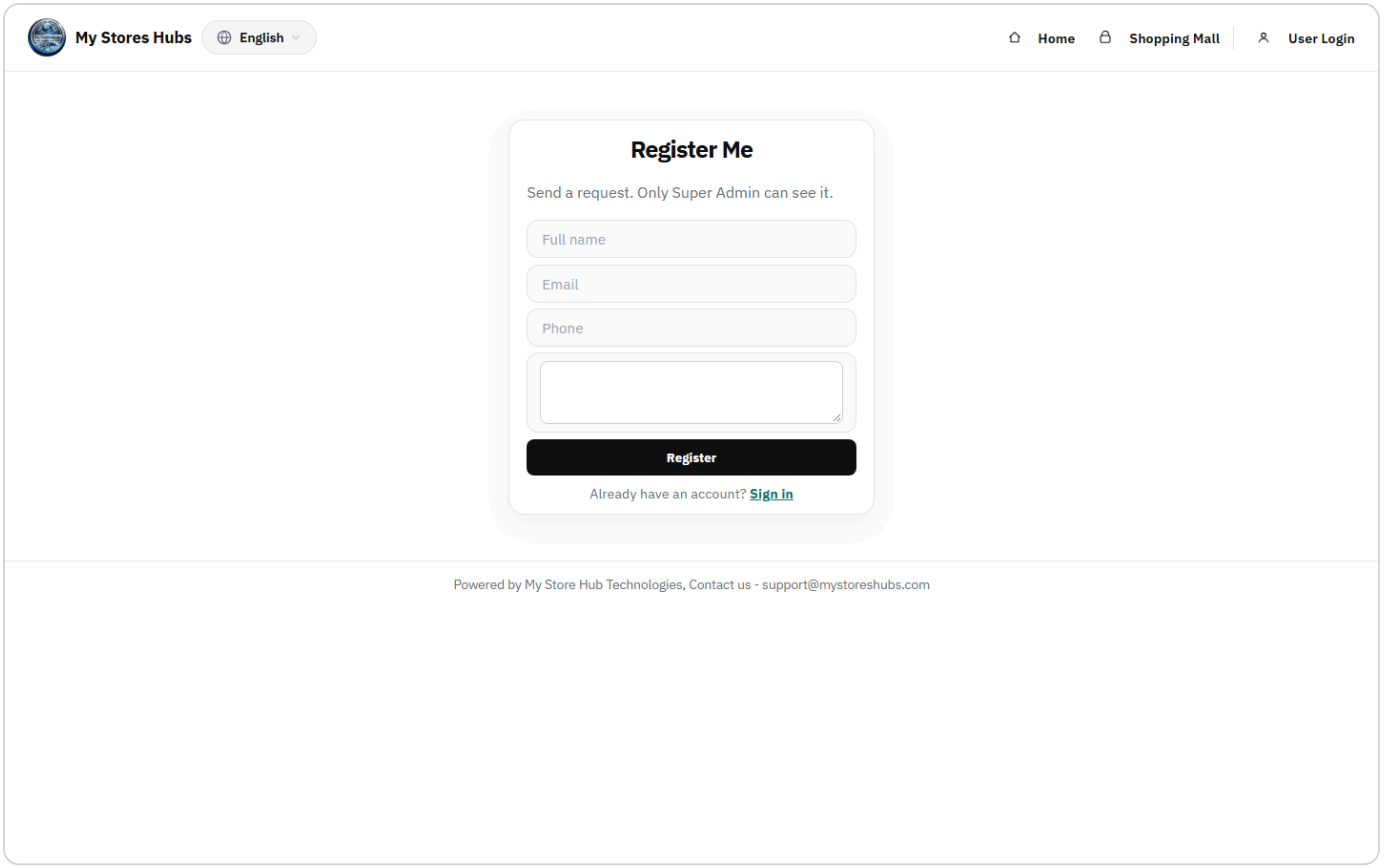

Screen: Share a store

26. The register form

> Open your store free on the mall, and Register Me on the sign-in page, both open the same request form. It does not create a login. The Super Admin reads it on Feedback.

How to do it

1. Click **Open your store free** on the Shopping Mall, or **Register Me** on Sign in.
2. Enter name, email, phone, and a remark.
3. Submit. The confirmation stays on the page.

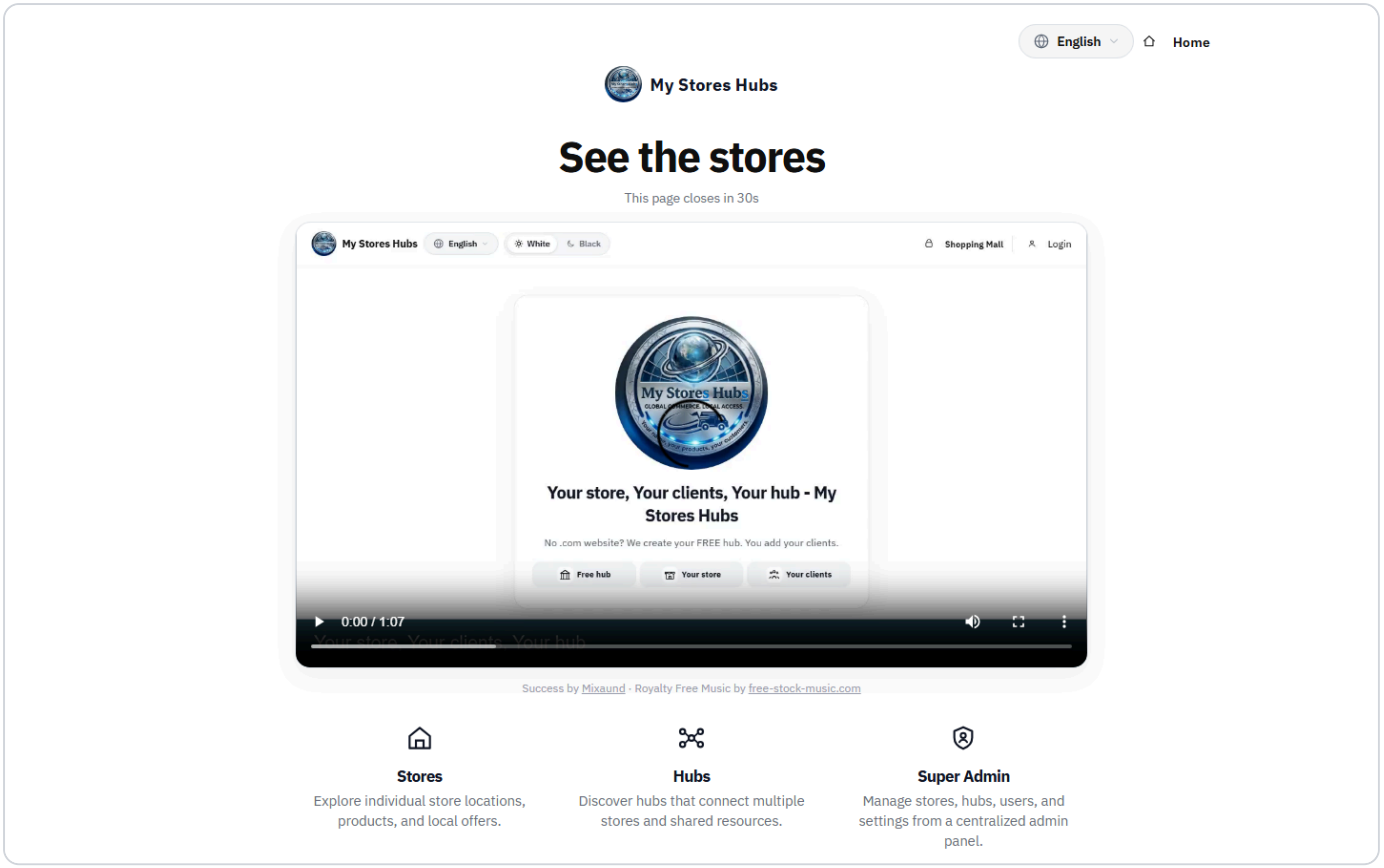

Screen: The register form

27. Demo video

> The Demo button on Sign in plays a short film of the mall, a store, a product, the shopper desk, the store desk, and the Super Admin desk.

How to do it

1. On Sign in, click **Demo**.
2. The film plays in the page. The same film is also at **/demo**.
3. Shopping Mall has **See the demo** for the same film.

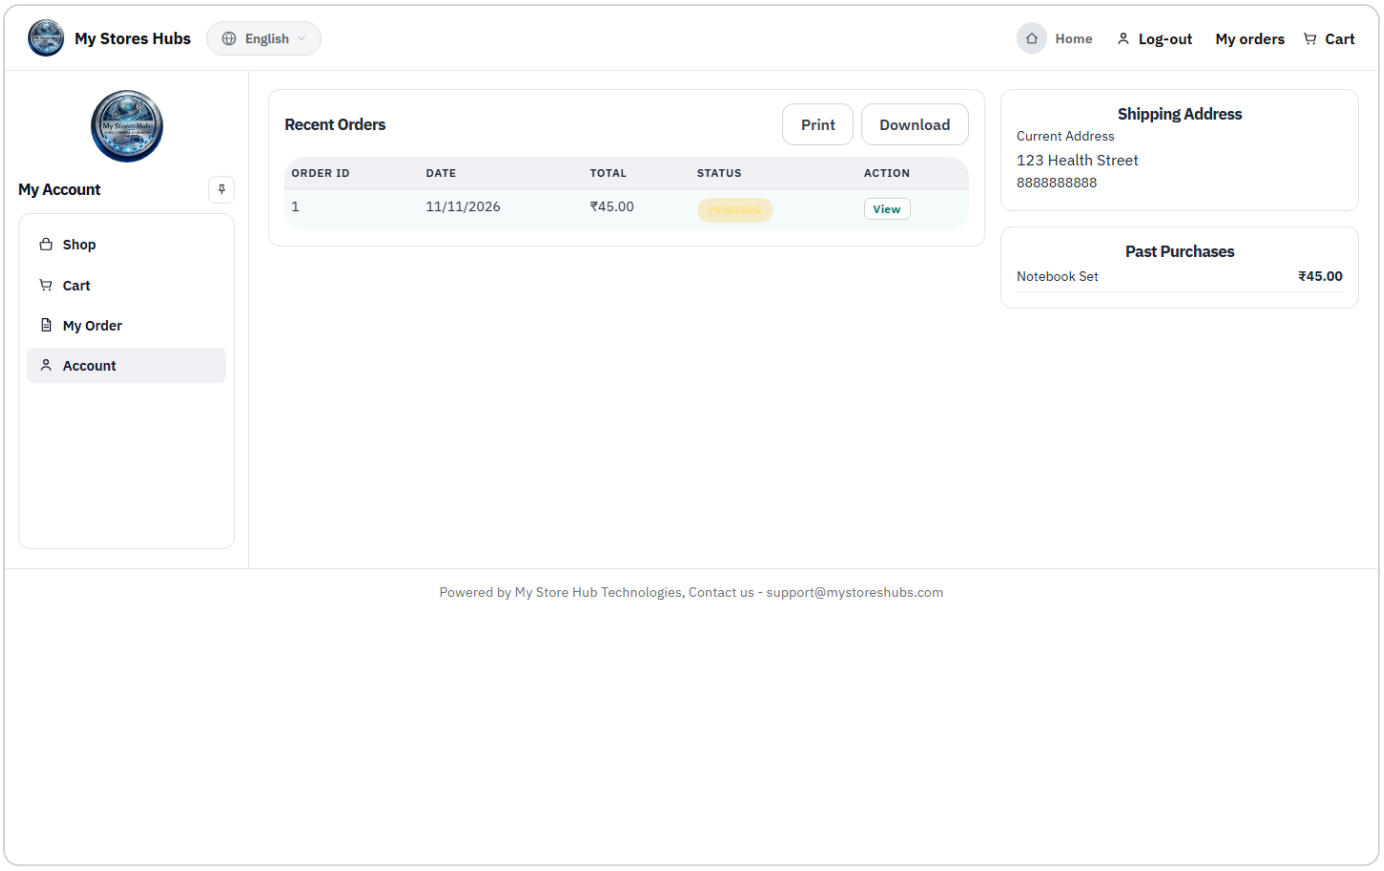

Screen: Demo video

28. My account

> A signed-in shopper opens My account to see the details stored for that login.

How to do it

1. Sign in as a Client.
2. Open **My account** from the side menu.
3. Review the name and contact details shown for this shopper.

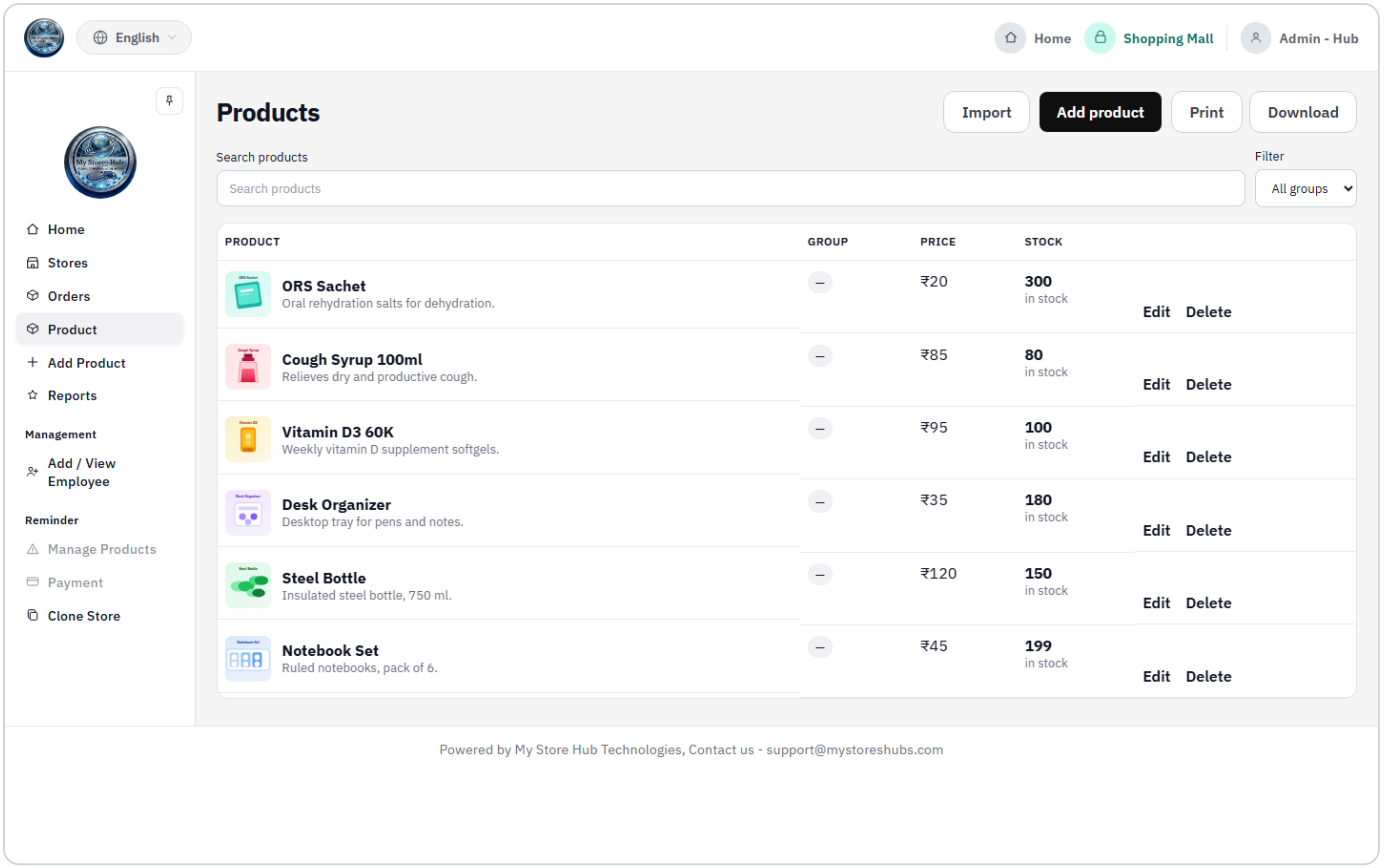

Screen: My account

29. Product list

> Product is the searchable list of everything already in the store. Add Product is the form, including the workbook import, that puts new rows on this list.

How to do it

1. Open **Product** to search and review the catalogue.
2. Open **Add Product** to type one product or import the Excel workbook.
3. A workbook with a Product sheet fills the mall groups when the category column is set.

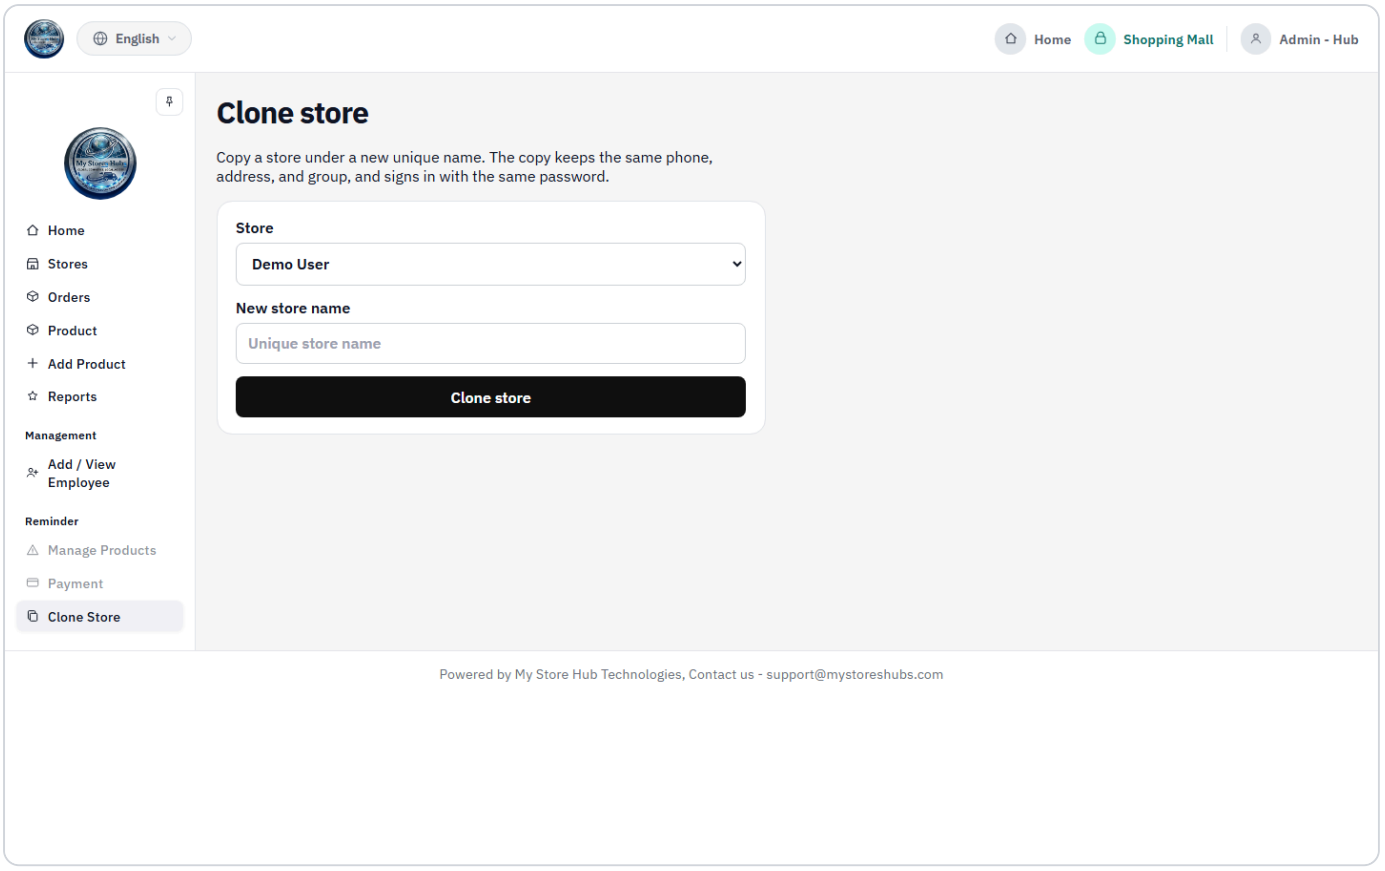

Screen: Product list

30. Clone a store

> Clone Store copies one store under a new name so a second shop can start from the same setup.

How to do it

1. Open **Clone Store**.
2. Choose the store to copy and type a new unique name.
3. Save. The new store is separate from the original.

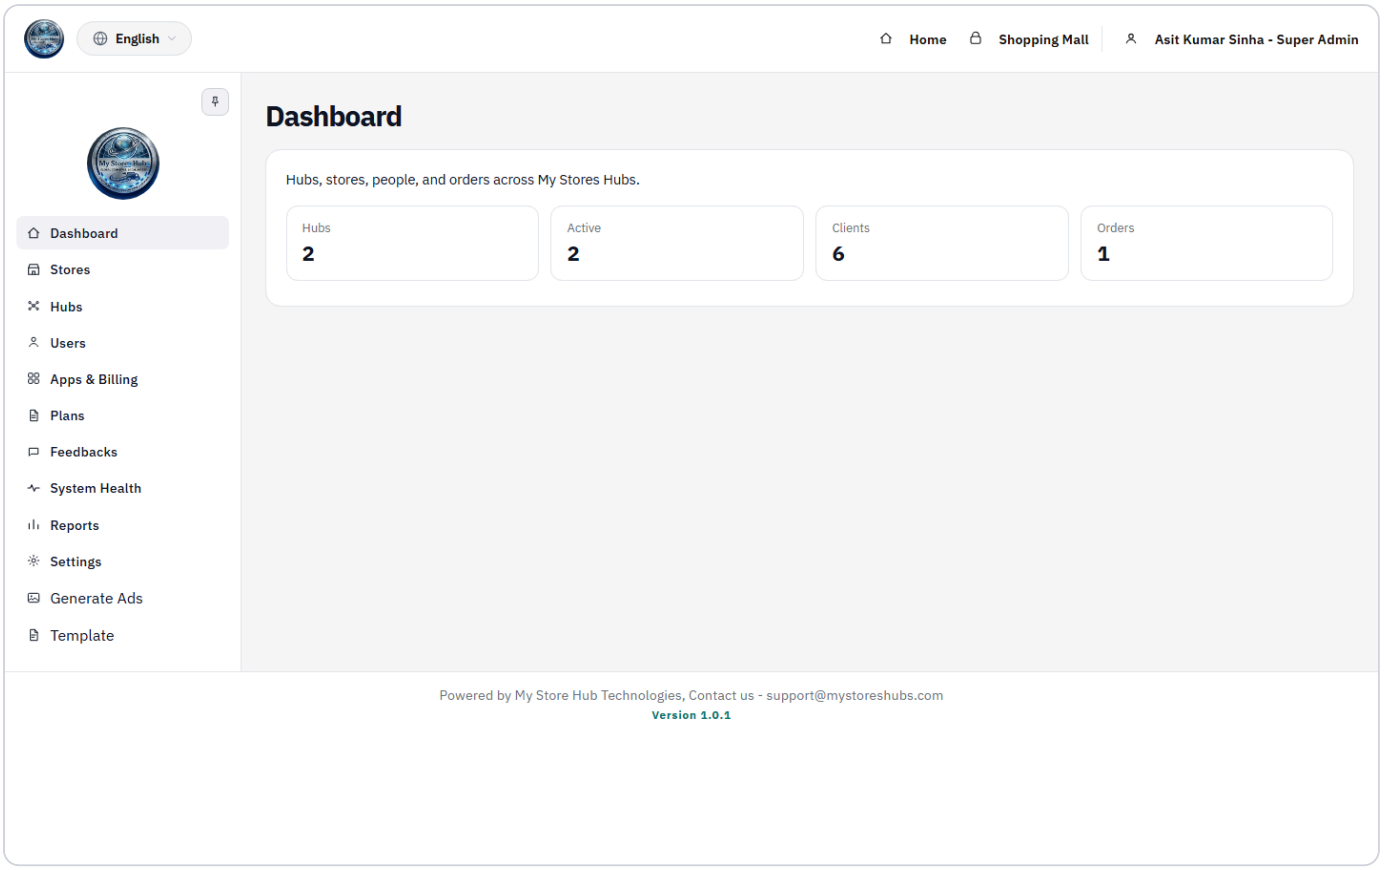

Screen: Clone a store

31. Super Admin desk

> Besides Settings, Hubs, and Feedback, the Super Admin menu covers the whole platform: Dashboard, Stores, Users, Apps & Billing, Plans, System Health, and Reports. Generate Ads builds a poster. Template downloads the hub workbook.

How to do it

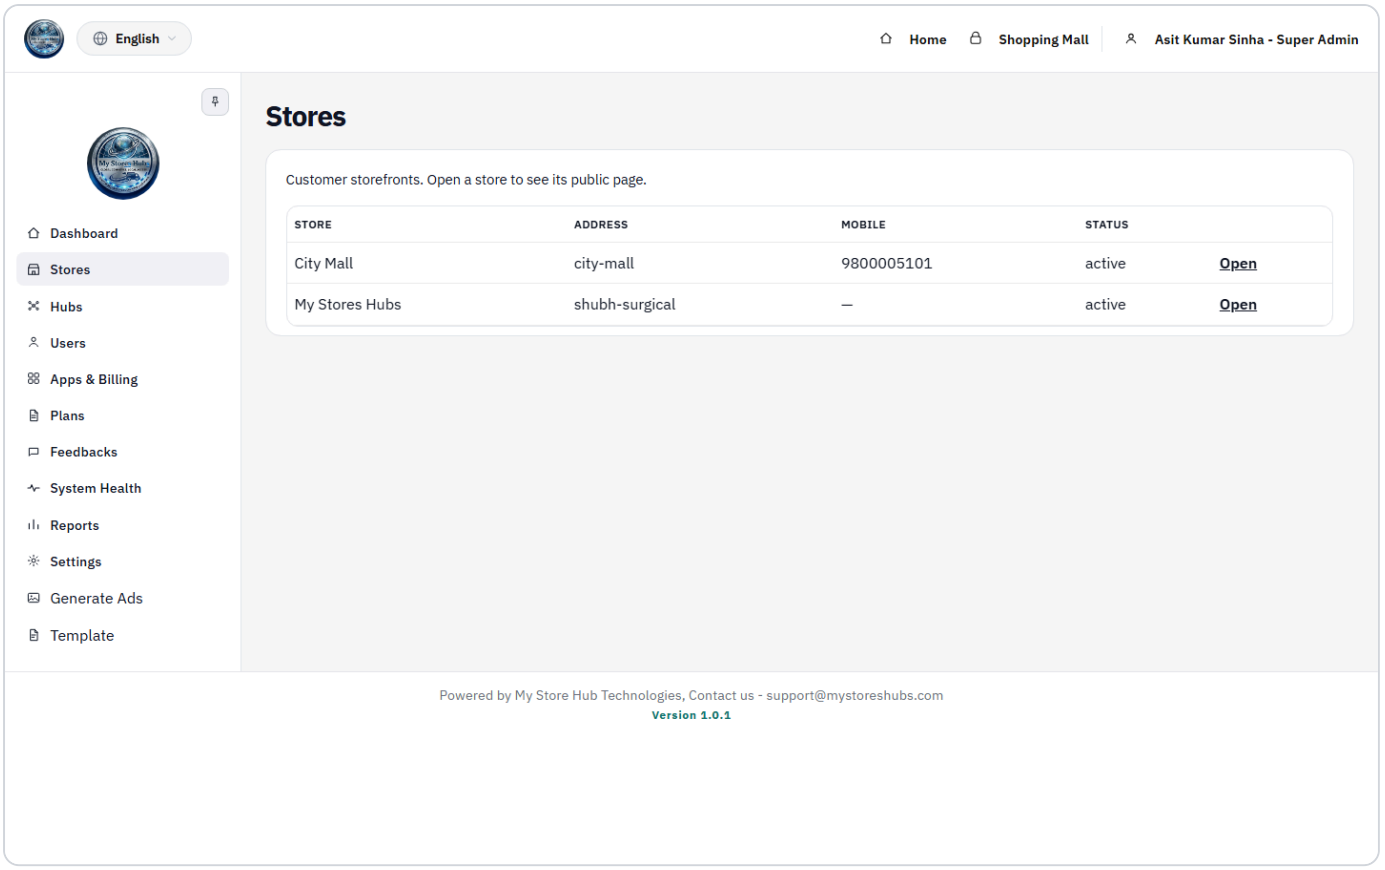

1. Sign in as Super Admin and open each item in the left menu.
2. Dashboard, Stores, Users, Billing, Plans, Health, and Reports are platform-wide.
3. Generate Ads saves a poster. Template downloads the Excel workbook used to create a hub.

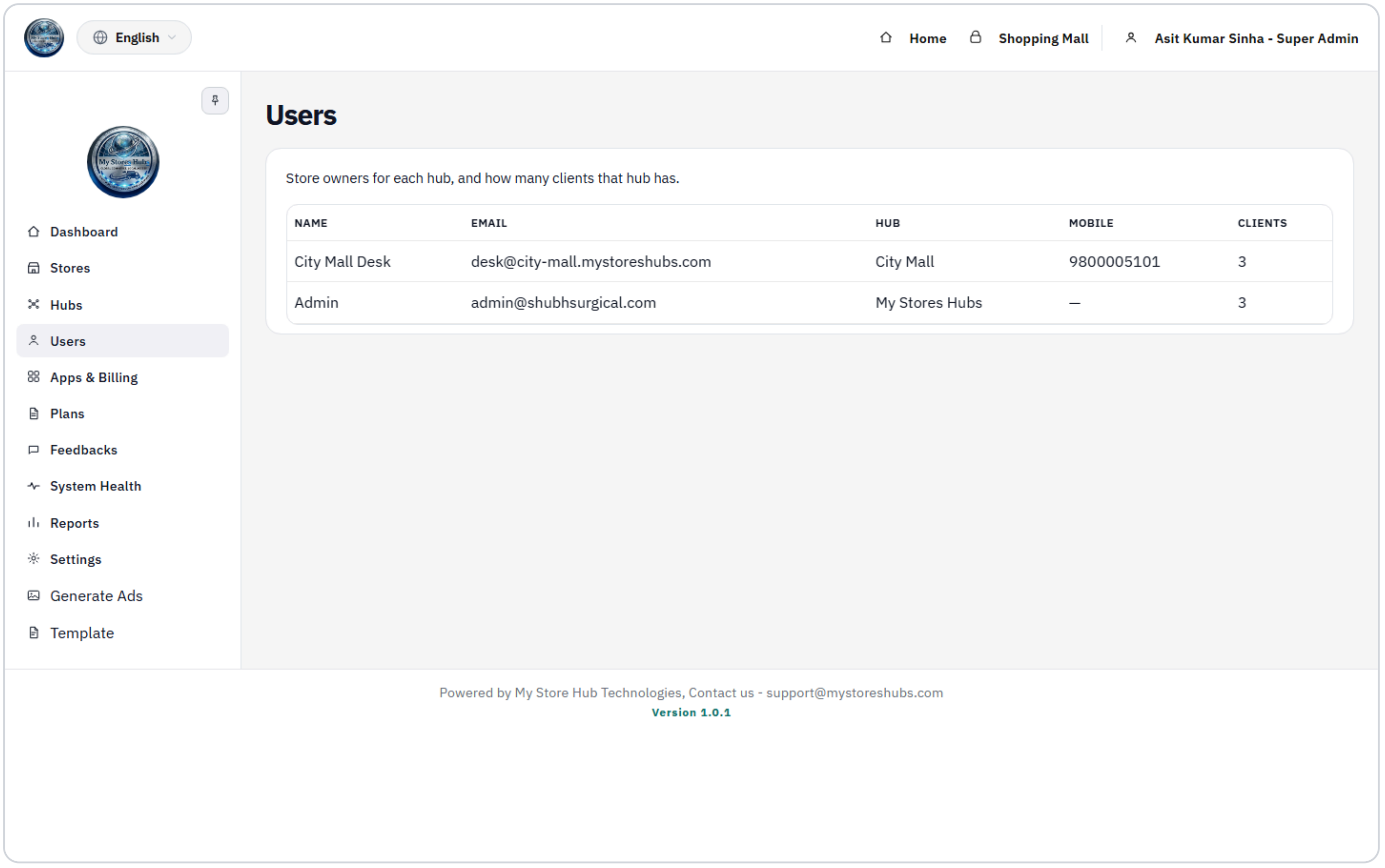

Screen: Super Admin desk

32. Super Admin — the rest of the desk

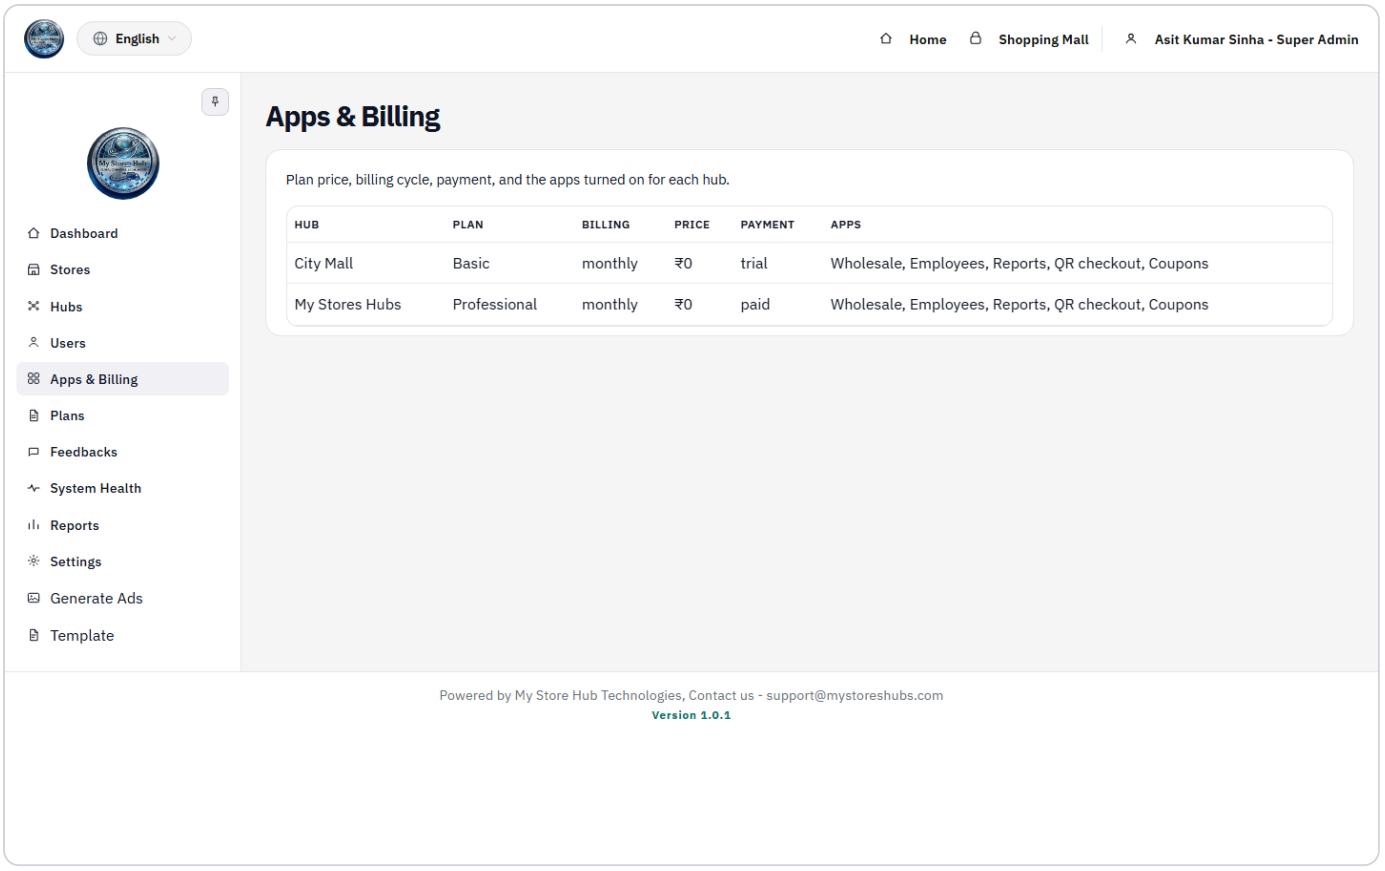

> These screens sit next to Settings and Hubs. Each one is the platform view, not a single store.

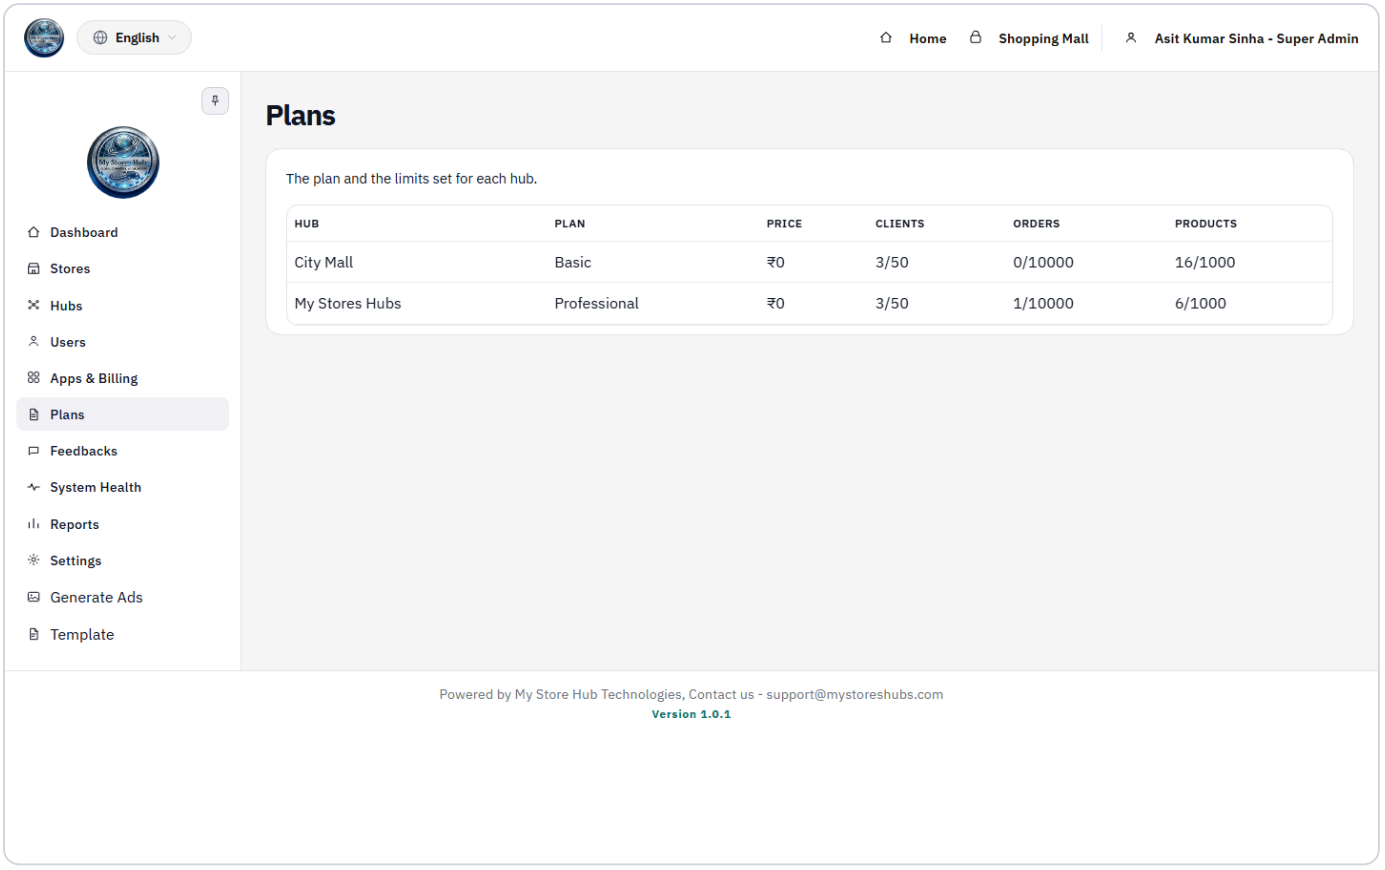

Screen: Stores

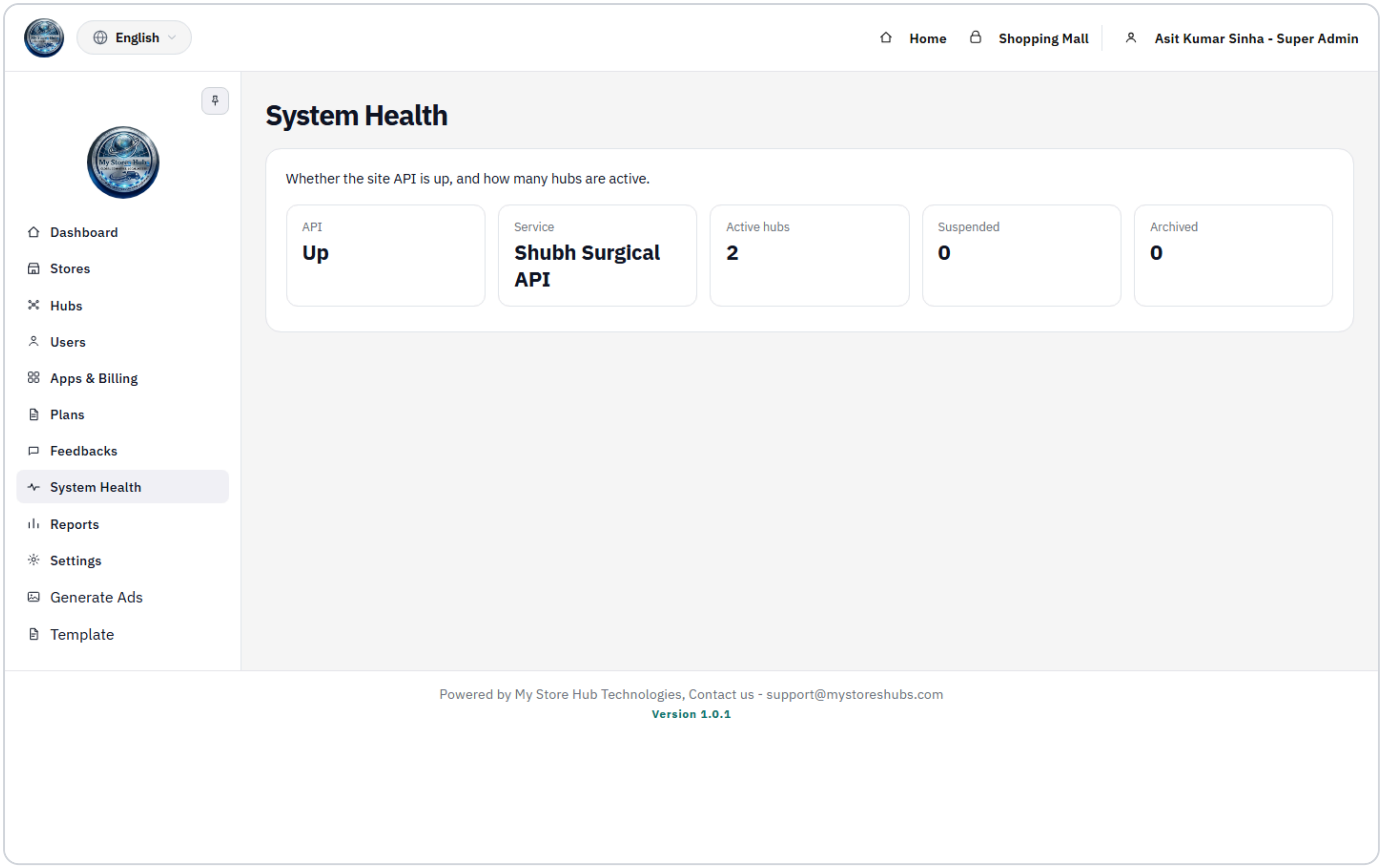

Screen: Users

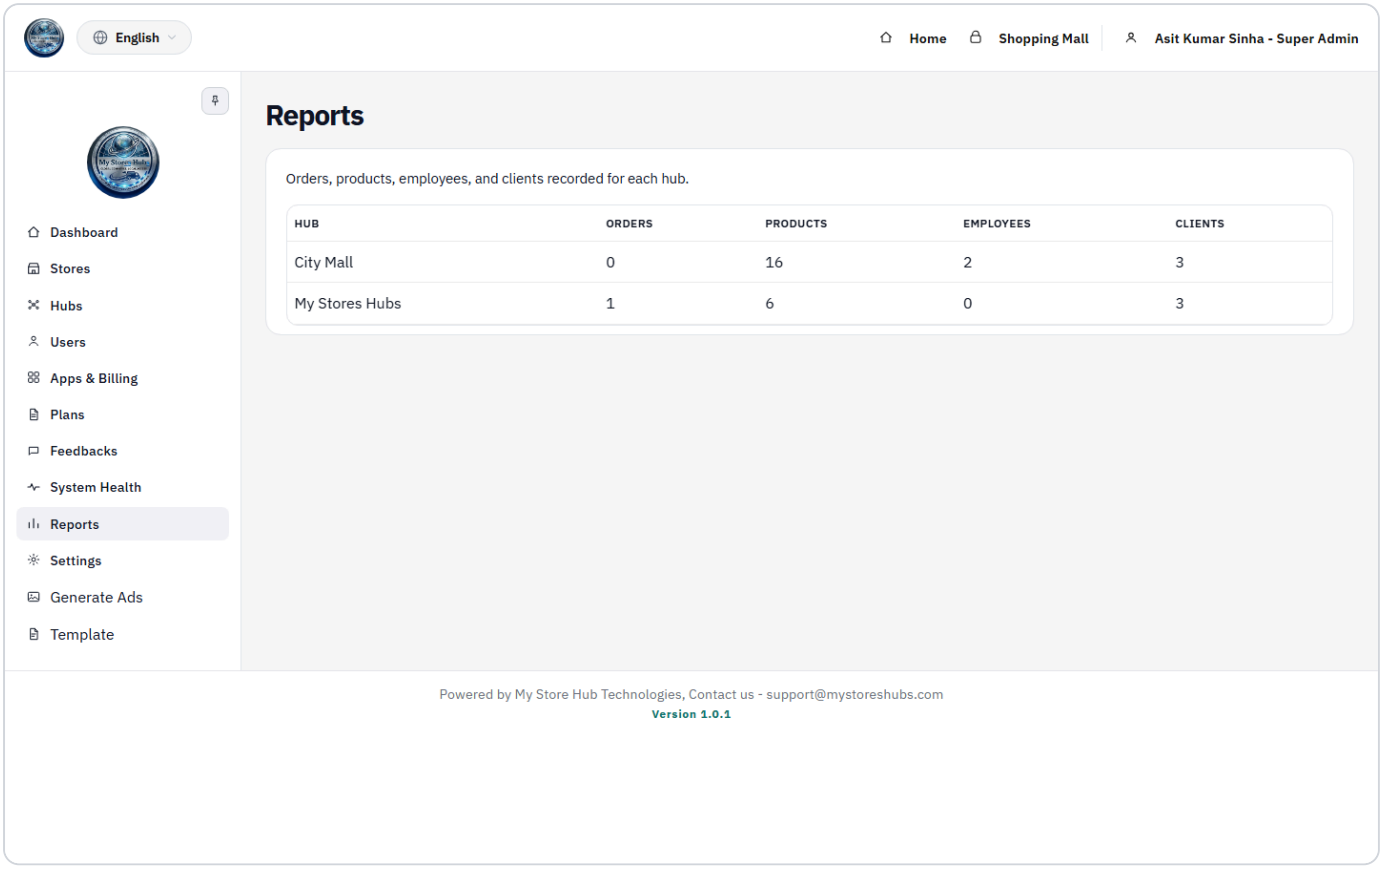

Screen: Apps and billing

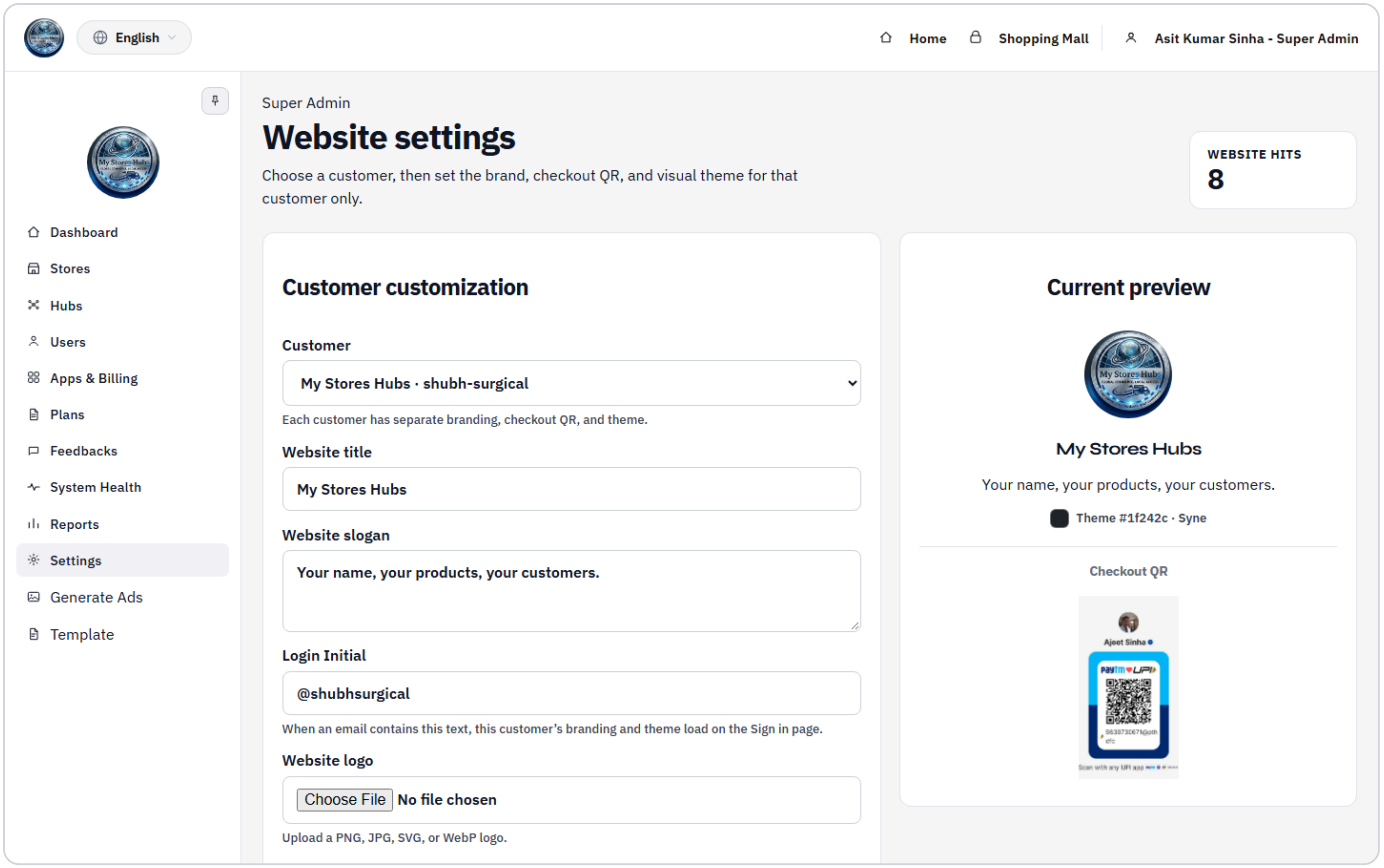

Screen: Plans

Screen: System health

Screen: Platform reports

Screen: Settings, with Generate Ads in the menu

21. Getting-started checklist

1. Open the Sign in page and confirm the brand logo, title, and slogan look correct.
2. Try the Theme switch (Black/White) and the language switcher.
3. Open the Shopping Mall and browse at least one store's catalogue without signing in.
4. Sign in as a Client, add two products to the cart, choose a payment method, and place the order.
5. Sign in as a Customer (store owner), open Dashboard, approve the pending order, then mark it dispatched from Orders.
6. Open Clients, add a test client, Block it, confirm the blocked sign-in message, then Allow it again.
7. Open Employee, add a staff record, switch to View, and try Update.
8. Open Reports and try Email report.
9. Sign in as Super Admin, open Settings and change a store's theme colour, then open Customers & tenants.
10. Submit a Register Me request from Sign in, then confirm it appears on the Super Admin Feedback page and can be marked Done.

End of user manual — My Stores Hubs. Version 6.0 — 11/11/2026.
