Screenshots were taken from the live application. Open this file from admin **Help Center** to always use the latest copy.

1. What this website does

> Shubh Surgical is an online medicine store that can also be sold to multiple customer businesses. Shoppers browse stock, add items to a cart, and place an order. The system creates a bill with a checkout QR. A store administrator verifies payment, approves the order (this creates a Purchase Order), then marks it dispatched. Super Admin customises branding and provisions isolated customer stores.

End-to-end flow

1. Customer registers or signs in.
2. Customer adds medicines to the cart and clicks **Place order**.
3. A bill is created with status **pending** and a Checkout QR is shown.
4. Customer pays using the QR (any UPI app).
5. Admin opens **Orders**, confirms payment, and chooses **Approve** (PO generated) or **Reject**.
6. When stock is packed, admin marks the order **Dispatch**.

> After any successful save (settings, client, employee, medicine, tenant, and similar forms), the site shows a short toast and a save status so staff know the change was stored.

2. Website features and access roles

> The website separates shopping, store operations, and platform management. Accounts and credentials are issued by the business; this manual intentionally does not list passwords.

Role	Main features	Where they start
Customer	Browse medicines, choose retail/wholesale prices, cart, QR bill, and order tracking	Shop
Store admin	Dashboard, stock, orders, clients, employees, reports, and customer-specific operations	Dashboard
Super Admin	Provision customer businesses, choose modules and plans, customise each customer, and export backups	Settings

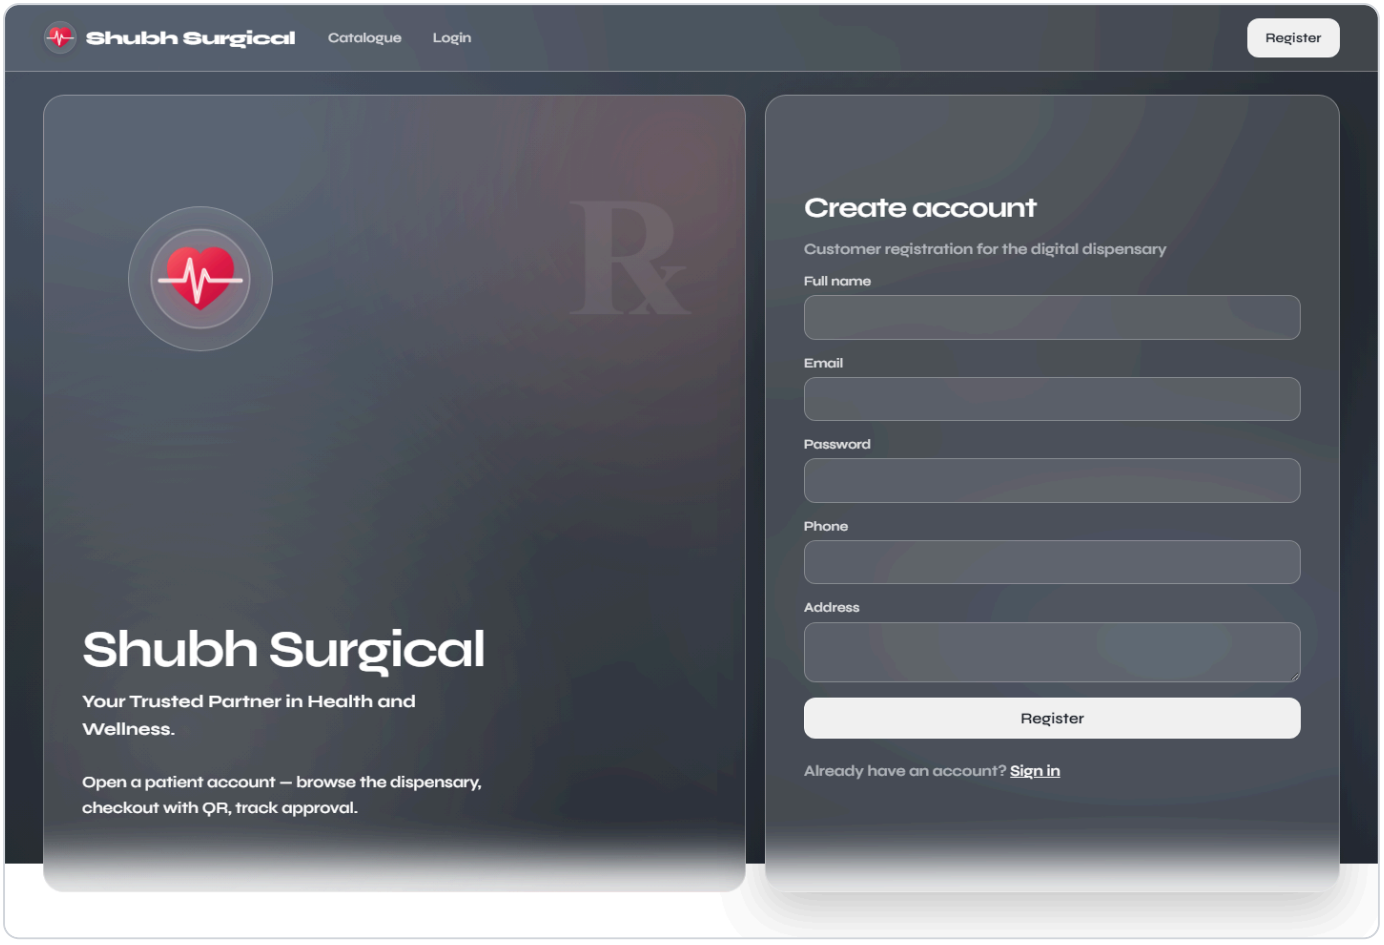

> A customer business is isolated: its branding, Checkout QR, catalogue, users, employees, and orders are separate from other customer businesses.

3. Register

> The left panel matches Sign in: heart logo in a circle, brand name, and slogan Your Trusted Partner in Health and Wellness. New customers must register before checkout.

How to do it

1. Click **Register** in the top bar.
2. Enter full name, email, and a password of at least 6 characters.
3. Optionally add phone and address (used on bills and client records).
4. Click **Register**. You are signed in and taken to the shop.

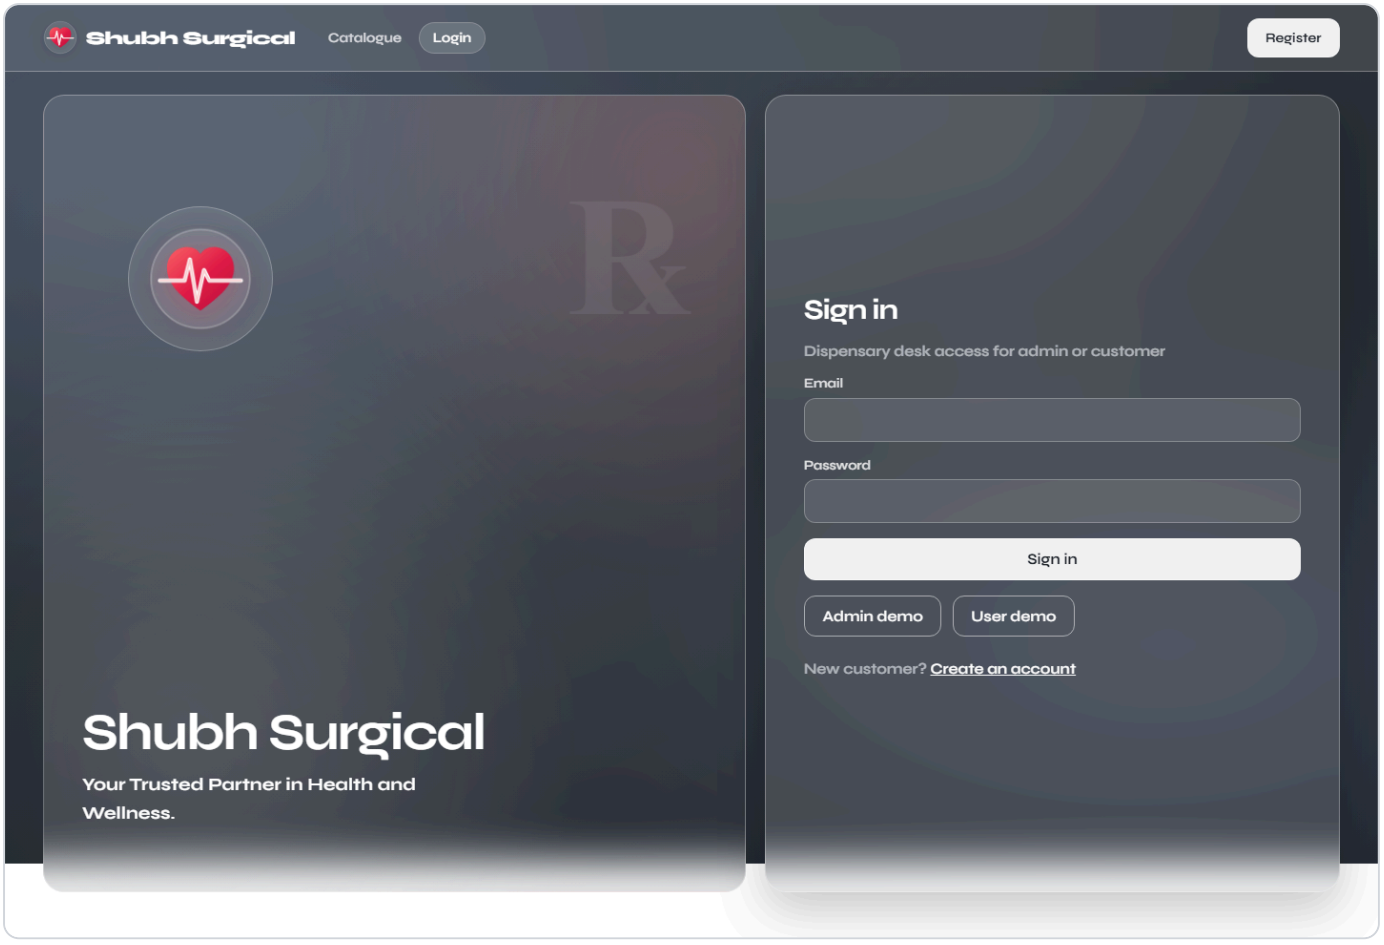

Screen: 3. Register

4. Sign in

> Returning customers, store admins, and Super Admin use the same Sign in screen. Store admins land on Dashboard. Super Admin lands on Settings. A blocked customer cannot sign in.

How to do it

1. Click **Login** in the top bar.
2. Enter email and password, then click **Sign in**.
3. If the account is blocked, the site shows: *User is blocked now, please contact to admin*.
4. Use **Logout** in the top-right when the session is finished.

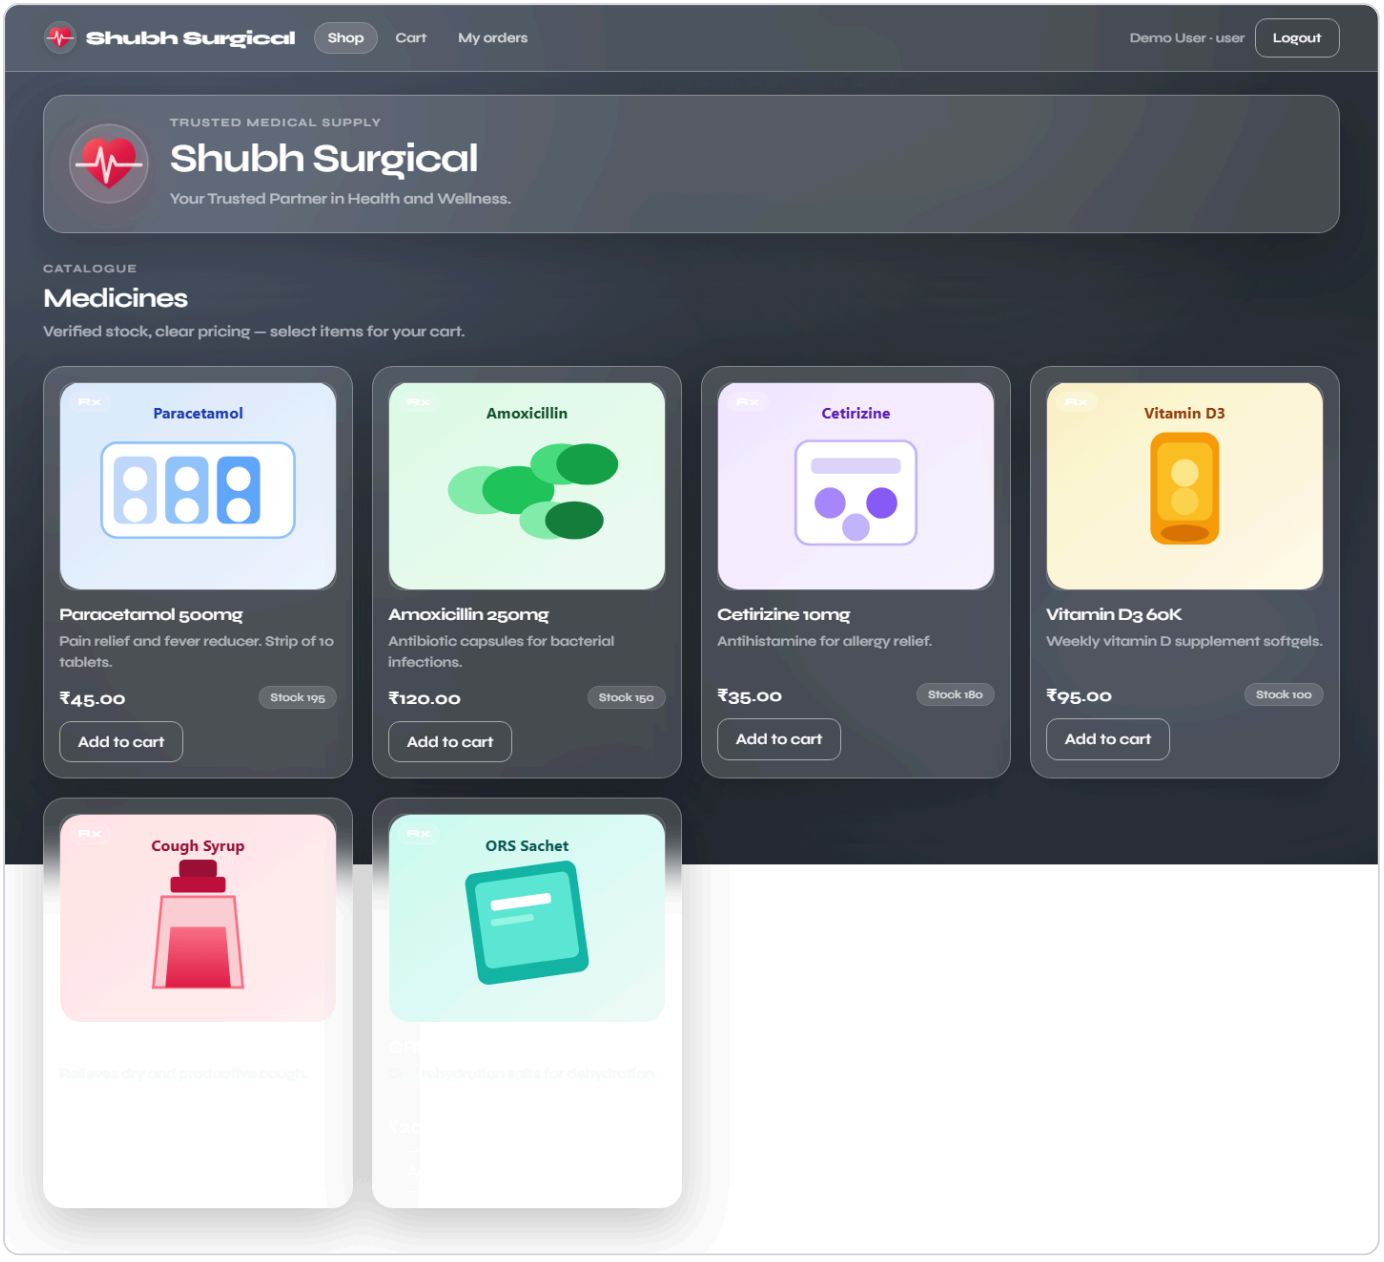

Screen: 4. Sign in

5. Browse catalogue and shop

> Guests can open Catalogue without signing in. After login, Shop lets customers add items to the cart. Admins see the catalogue but cannot add to cart.

How to do it

1. Guests: open **Catalogue**. Customers: open **Shop**.
2. Review image, description, price, and stock. Low stock is highlighted.
3. Click **Add to cart** on each required item.
4. The Cart badge in the top bar shows how many units are selected.

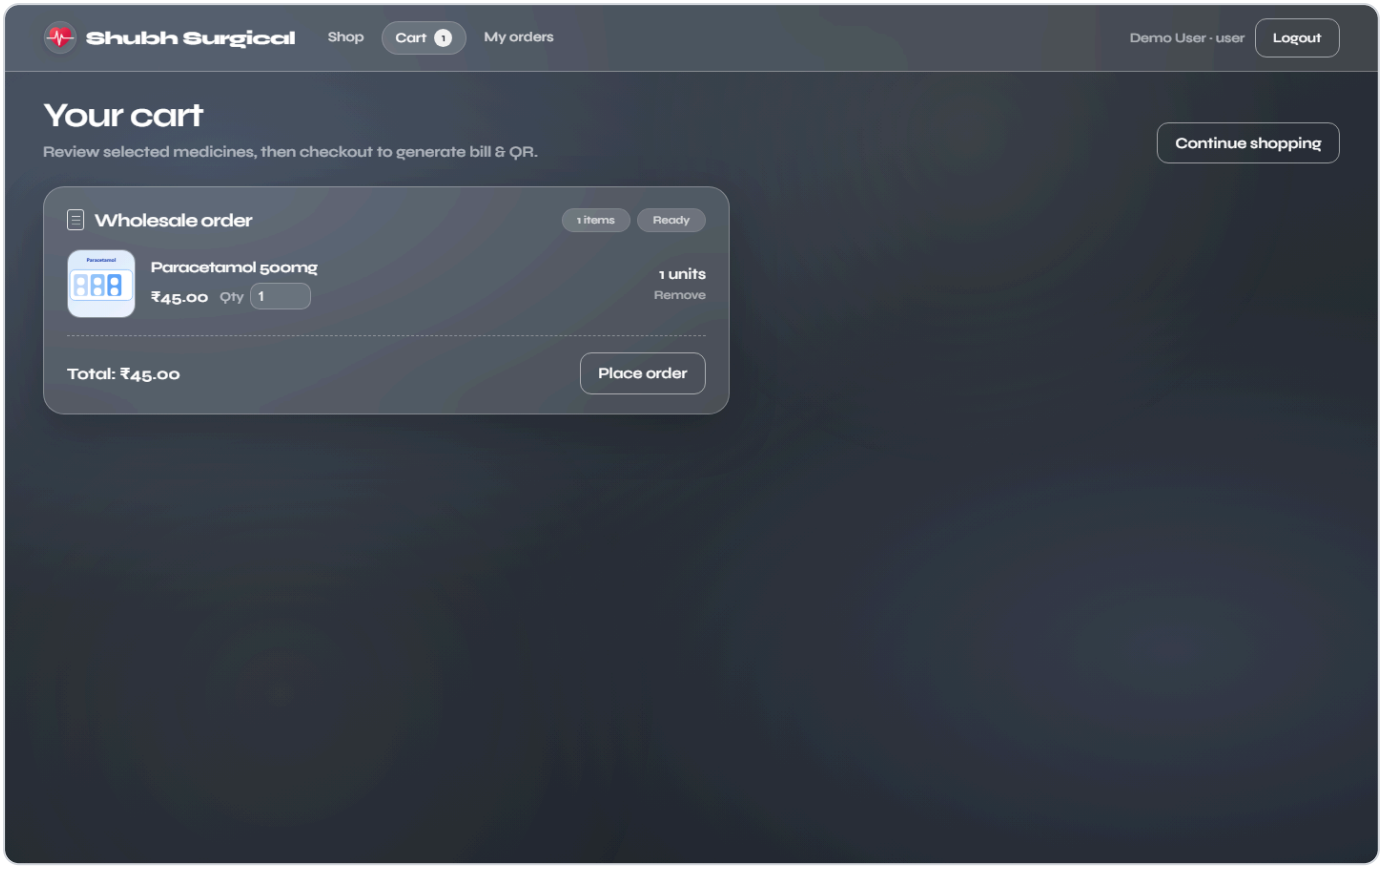

Screen: 5. Browse catalogue and shop

6. Cart and place order

> The cart is a wholesale-style order sheet. Quantity can be changed up to available stock. Checkout creates a bill and QR.

How to do it

1. Click **Cart** in the top bar.
2. Adjust Qty or click **Remove** if needed.
3. Confirm the total, then click **Place order**.
4. You are taken to the bill page. Status starts as **pending**.

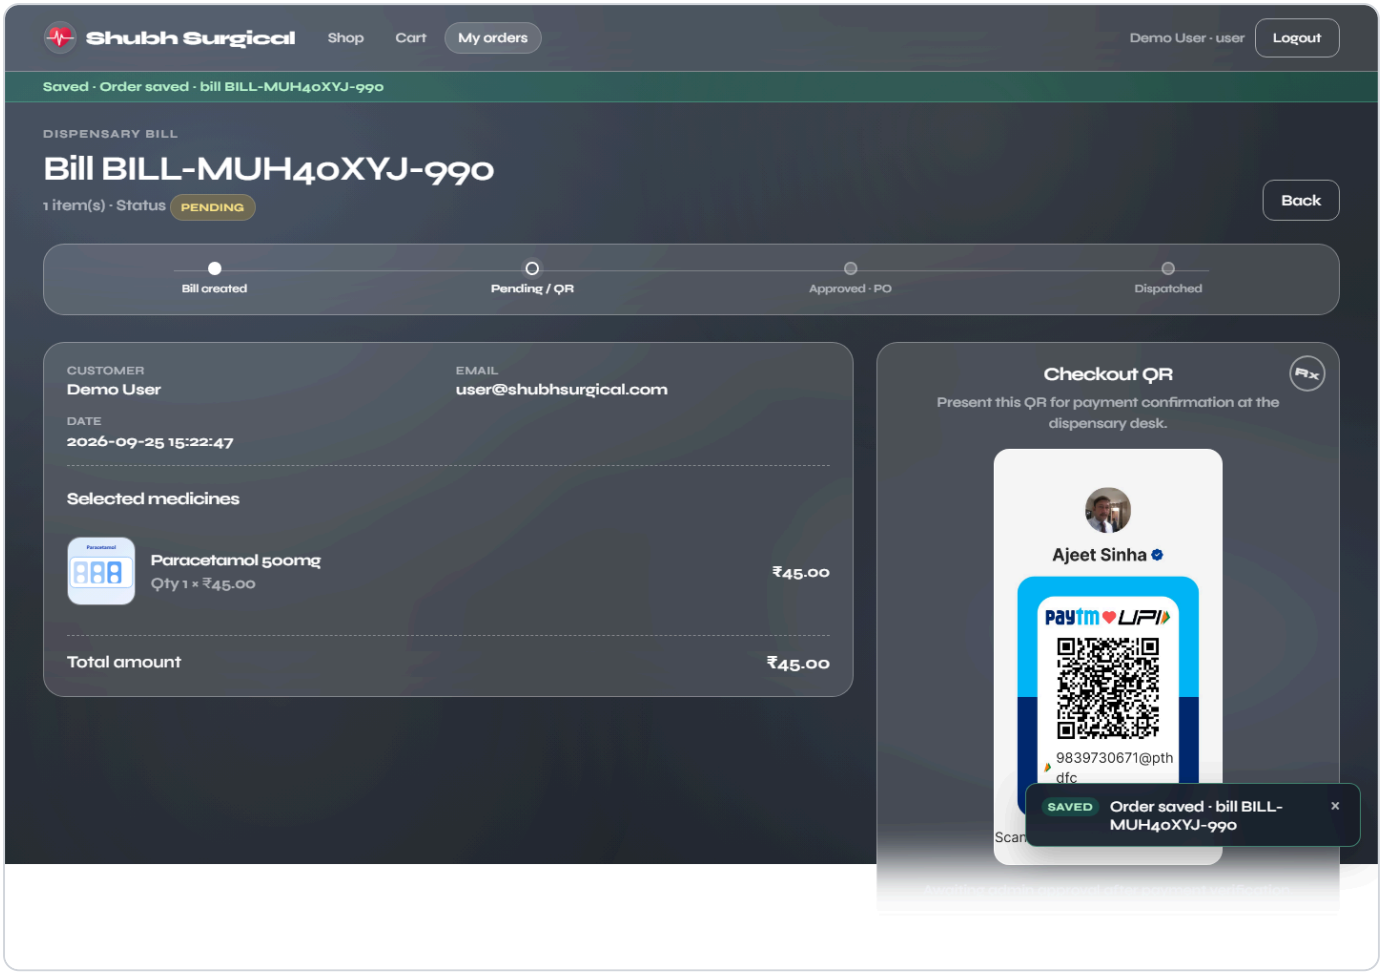

Screen: 6. Cart and place order

7. Bill and Checkout QR

> The bill lists medicines, quantities, and total. The Checkout QR is the UPI payment image. After payment, wait for admin approval.

How to do it

1. Read the bill number, items, and total amount.
2. Scan the **Checkout QR** and pay the billed amount.
3. Keep the bill number handy if the desk asks for confirmation.
4. Track the pipeline: Pending / QR → Approved → Dispatched.

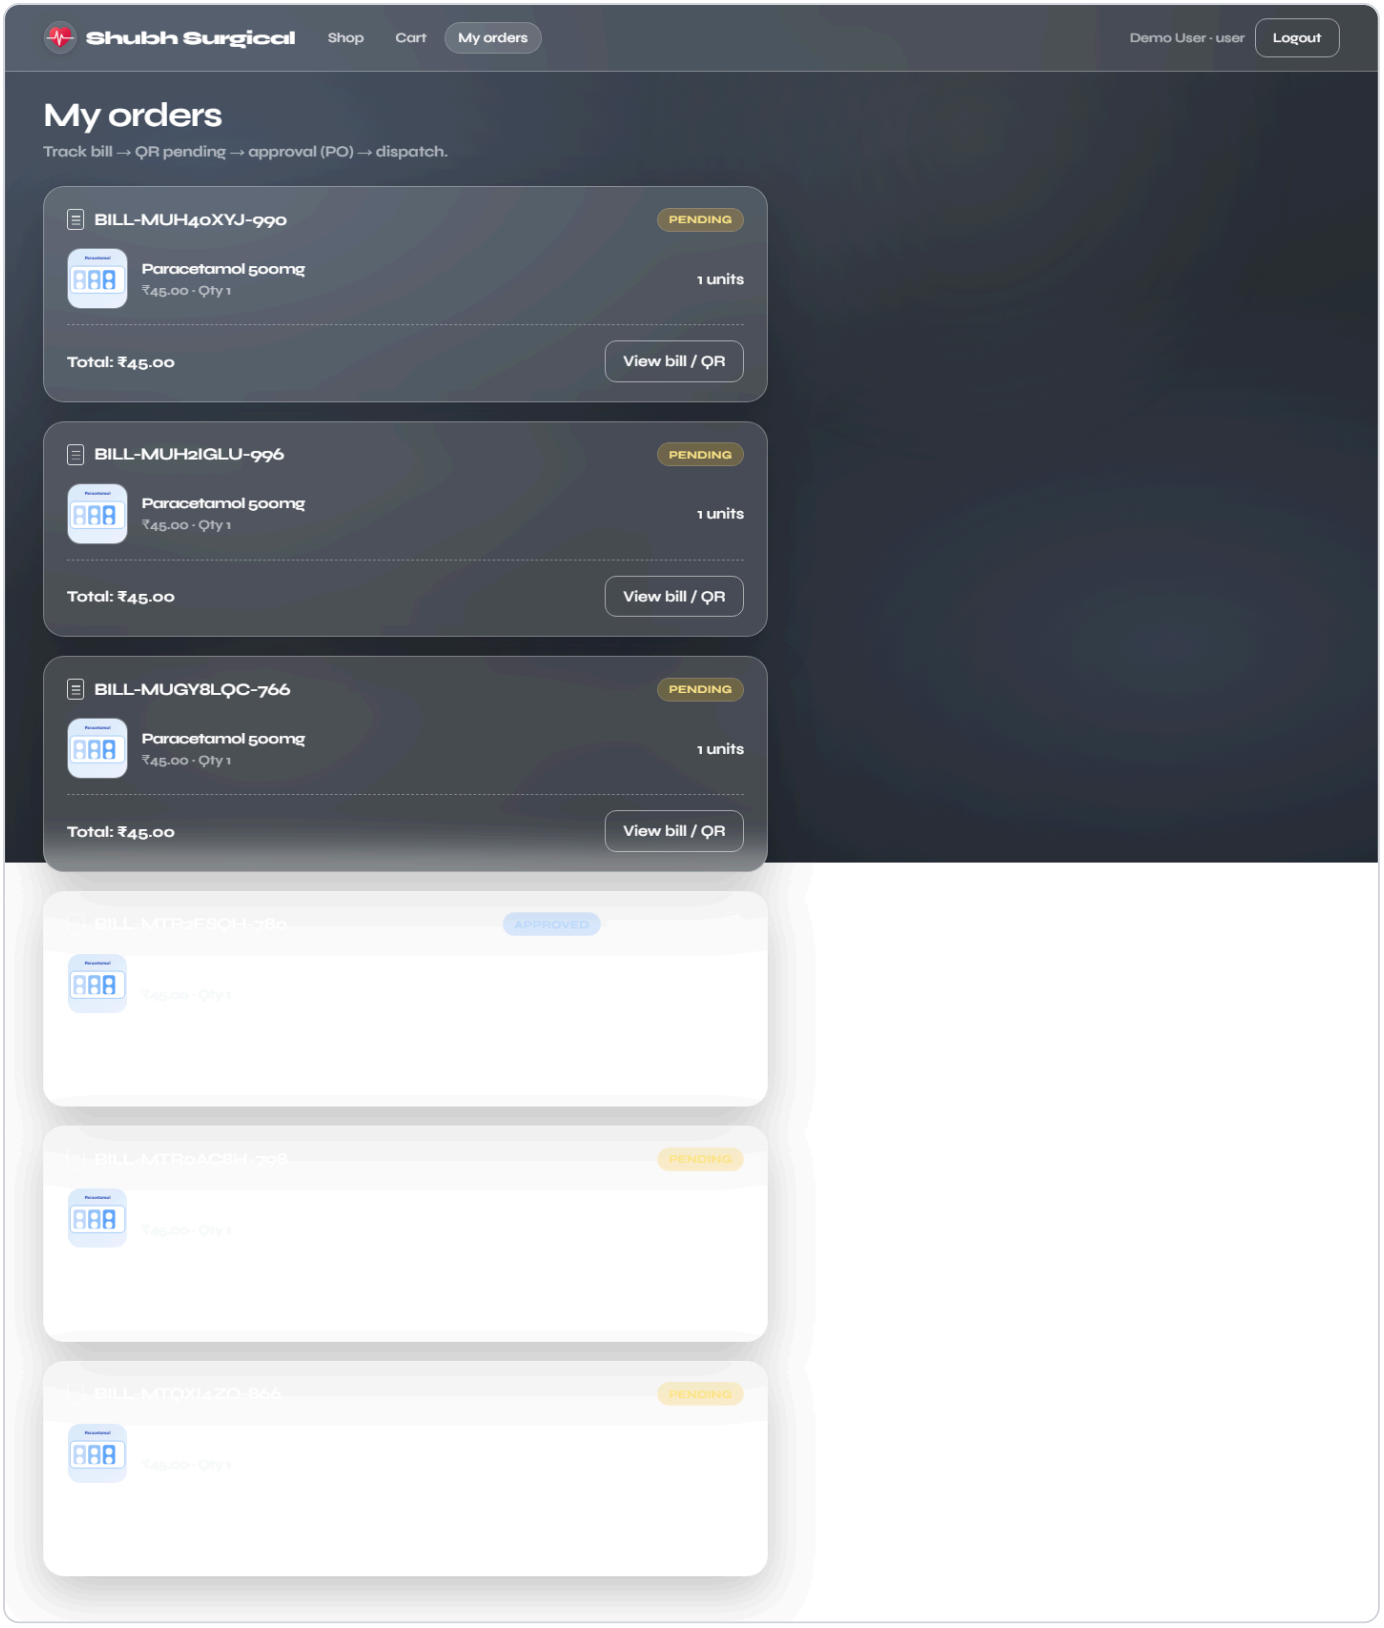

Screen: 7. Bill and Checkout QR

8. My Orders

> My Orders lists every bill for the signed-in customer with status, total, and a link back to the QR bill.

How to do it

1. Click **My orders** in the top bar.
2. Find the bill number and current status (pending, approved, dispatched, rejected, or cancelled).
3. Click **View bill / QR** to reopen payment QR and line items.

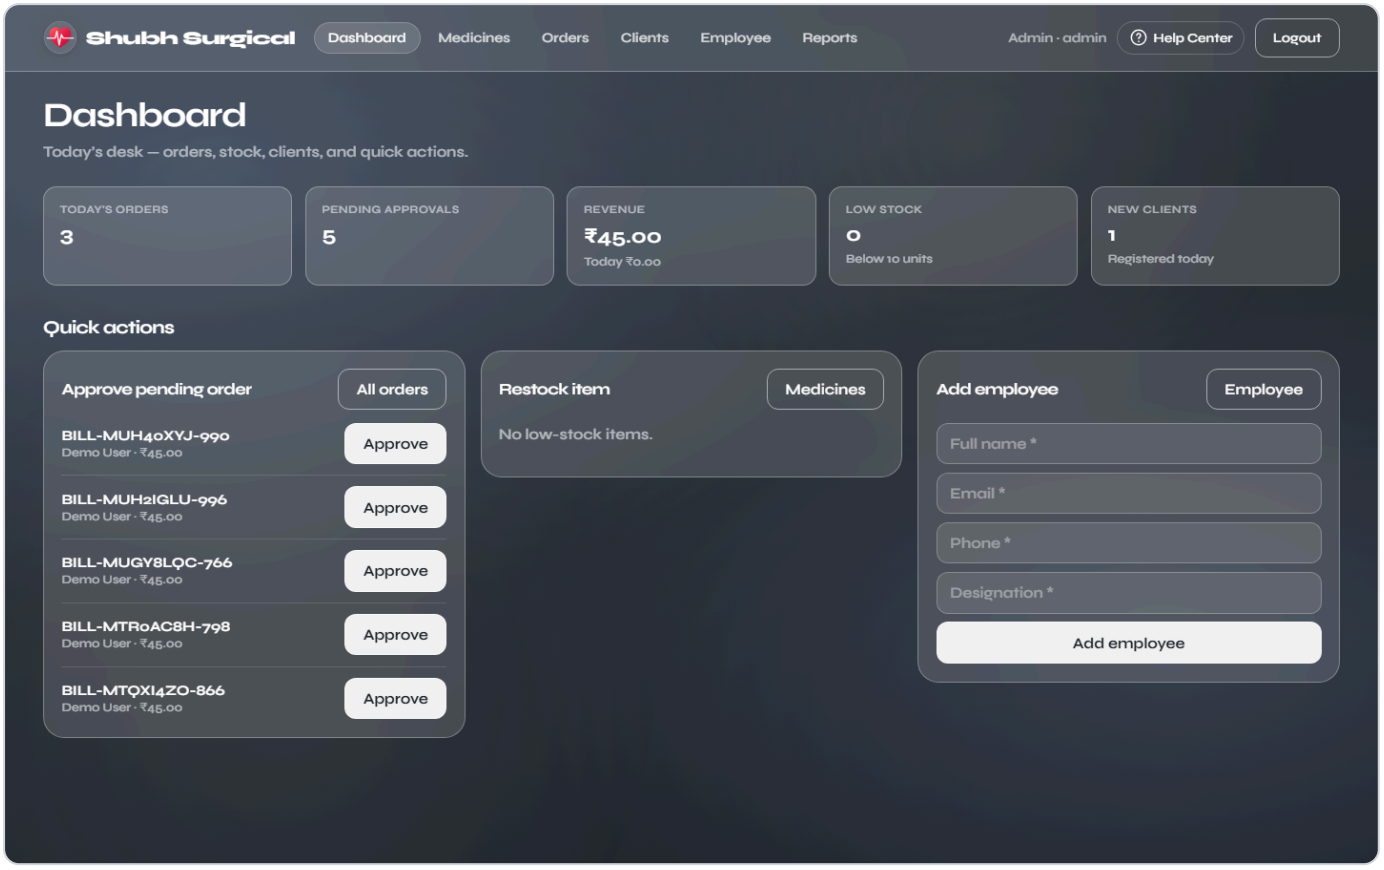

Screen: 8. My Orders

9. Admin: Help Center

> After admin or Super Admin login, Help Center sits next to Logout. It opens this training PDF in a new tab so staff always have the latest manual.

How to do it

1. Sign in as store admin or Super Admin.
2. In the top-right, next to Logout, click **Help Center** (question-mark icon).
3. The latest user manual PDF opens in a new browser tab.
4. Use it for classroom training and for looking up any screen in this document.

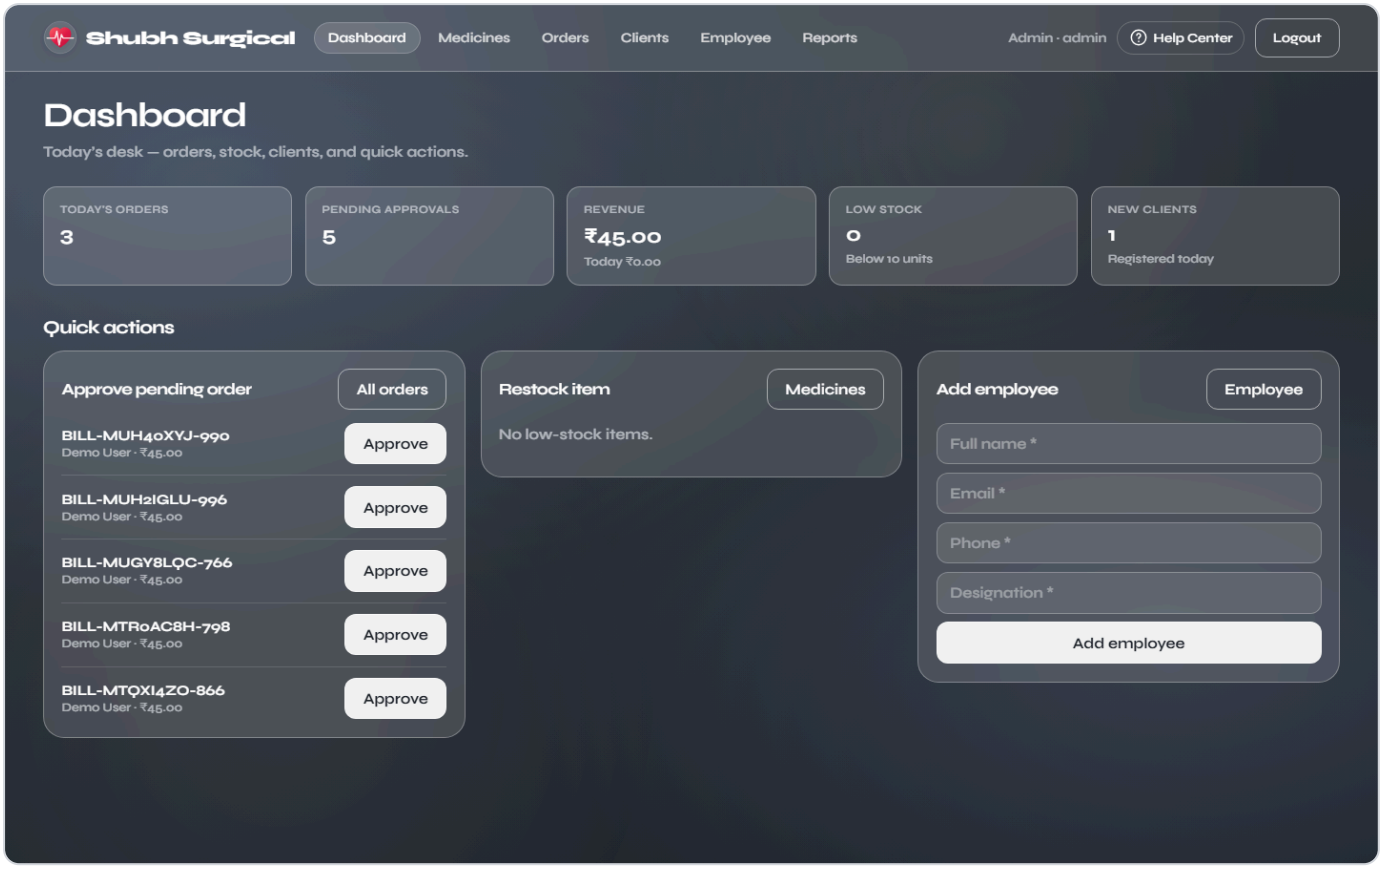

Screen: 9. Admin: Help Center

10. Admin: Dashboard

> Dashboard is the store admin landing page. Cards show today's orders, pending approvals, revenue, low stock, and new clients, with quick actions to approve, restock, or add an employee.

How to do it

1. Sign in as store admin. Dashboard opens automatically.
2. Read the summary cards, then use a pending-order **Approve** action if needed.
3. Restock a low-stock item from the list, or add an employee from the quick form.
4. Use the top nav to open Medicines, Orders, Clients, Employee, or Reports.

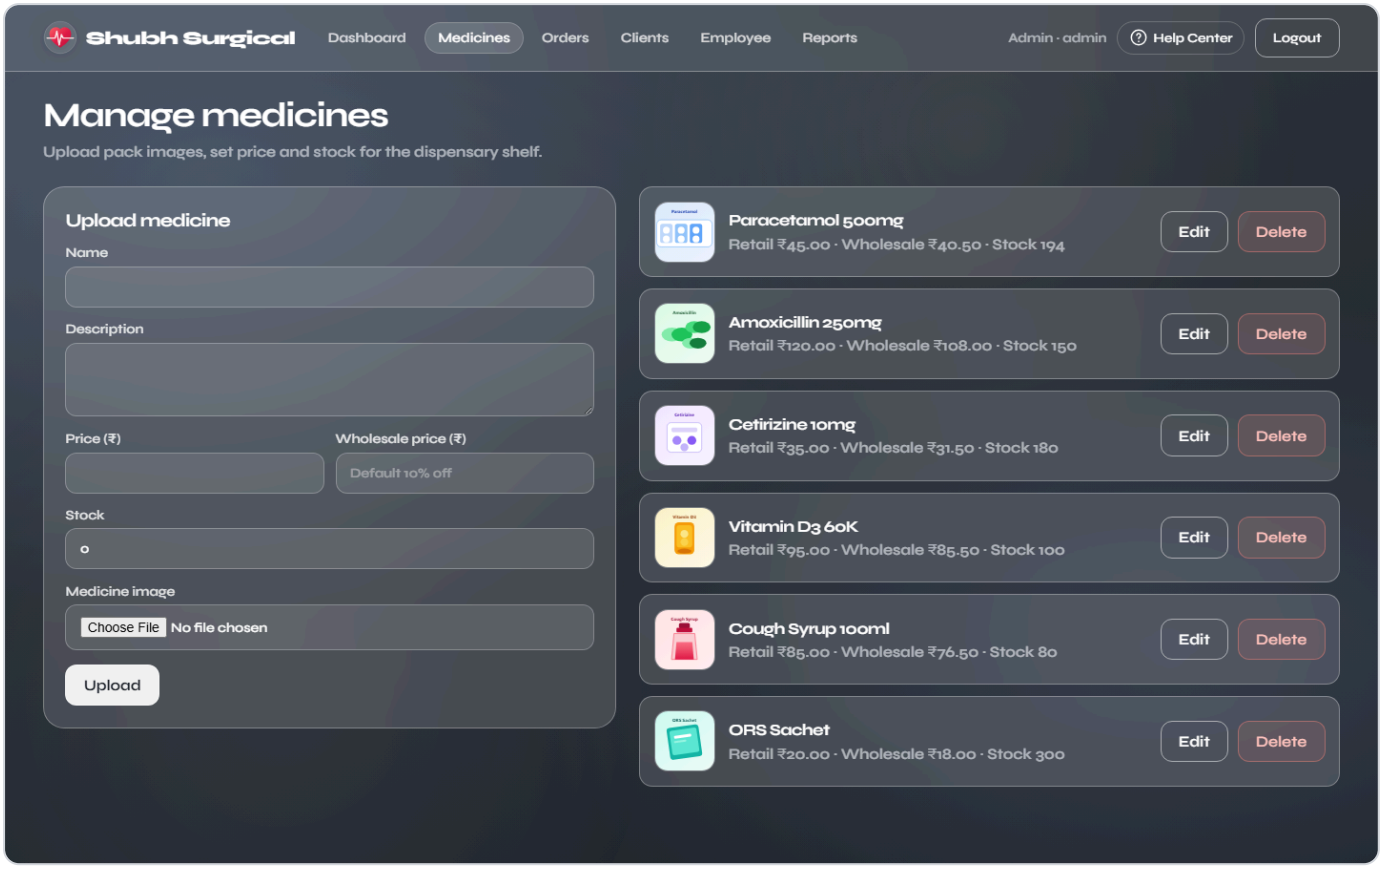

Screen: 10. Admin: Dashboard

11. Admin: manage medicines

> Administrators maintain the catalogue: name, description, retail price, optional wholesale price, stock, and pack image. Admins do not shop or checkout.

How to do it

1. Sign in as admin. Open **Medicines**.
2. Fill Upload medicine: name, description, retail price, optional wholesale price, stock, and image file.
3. Click **Upload**. The item appears on the customer Shop page.
4. Use **Edit** to change details, or **Delete** to remove a product.

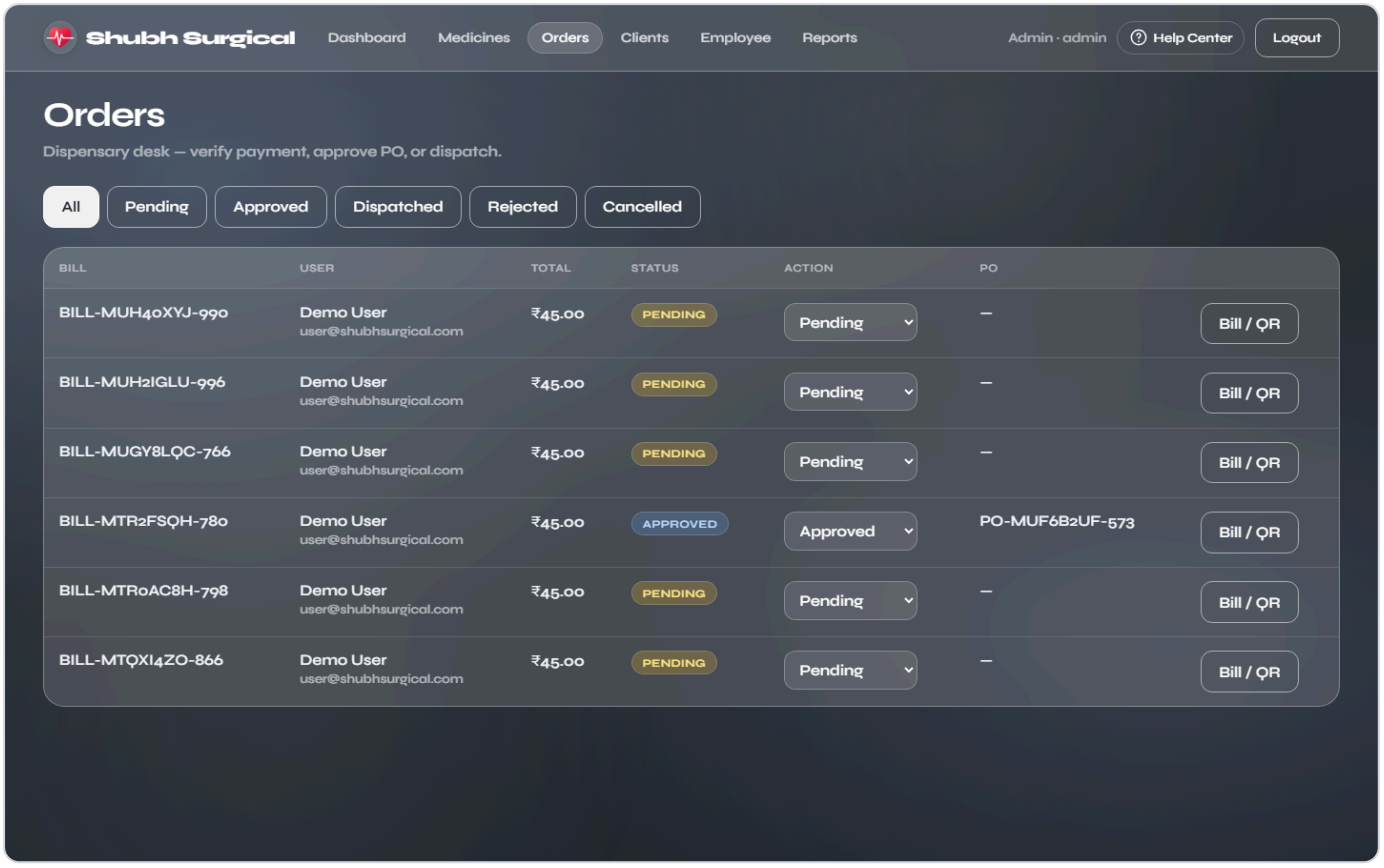

Screen: 11. Admin: manage medicines

12. Admin: orders desk

> This is the dispensary desk. Filter by status, open the bill, and change the order action after payment is verified.

How to do it

1. Open **Orders**. Use filters: All, Pending, Approved, Dispatched, Rejected, Cancelled.
2. Open **Bill / QR** to see items and amount.
3. On a pending order choose **Approve & generate PO** or **Reject order**.
4. On an approved order click **Mark ready to dispatch** when packed.
5. The Action dropdown on the list can also move status (Pending, Approved, Dispatch, Reject).

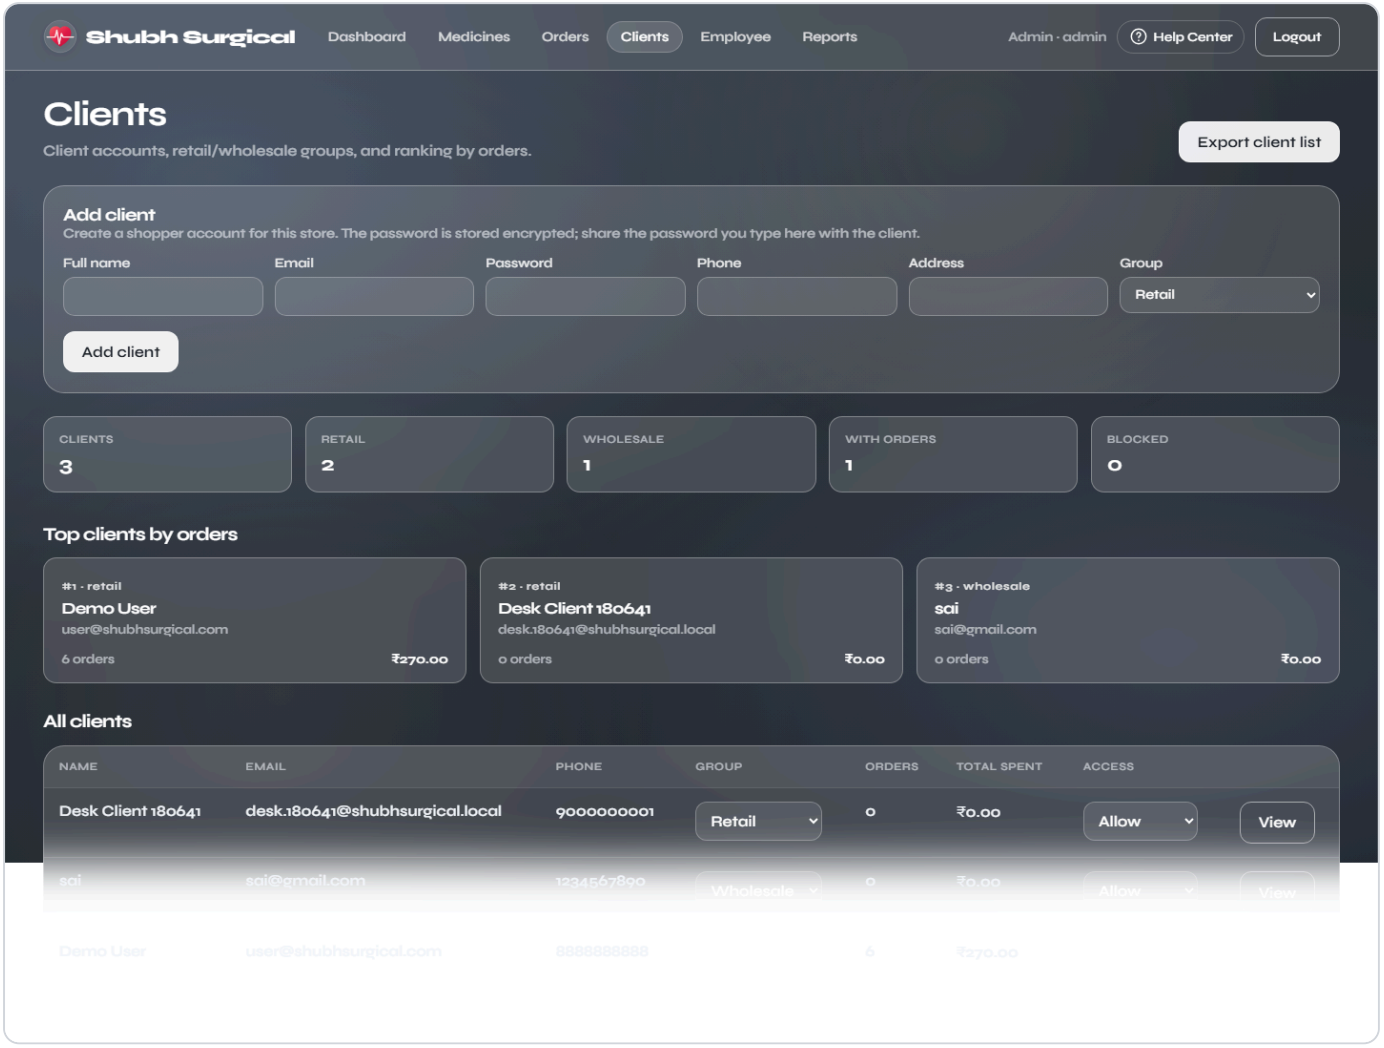

Screen: 12. Admin: orders desk

13. Admin: Clients

> Clients lists shopper accounts for this store. Admins can add a client, set retail or wholesale, block or allow login, export CSV, and open a client page for notes, spend, order history, and a new password (the old password cannot be viewed).

How to do it

1. Open **Clients** in the admin nav.
2. Use **Add client**: name, email, password (at least 6 characters), optional phone and address, and Retail or Wholesale. Click **Add client**.
3. Share the password you typed with the client. It is stored encrypted and cannot be recovered later.
4. In the table, set Group (retail/wholesale) and Access (Allow/Block). Click **View** for history, notes, and to set a replacement password.
5. Use **Export client list** to download a CSV.

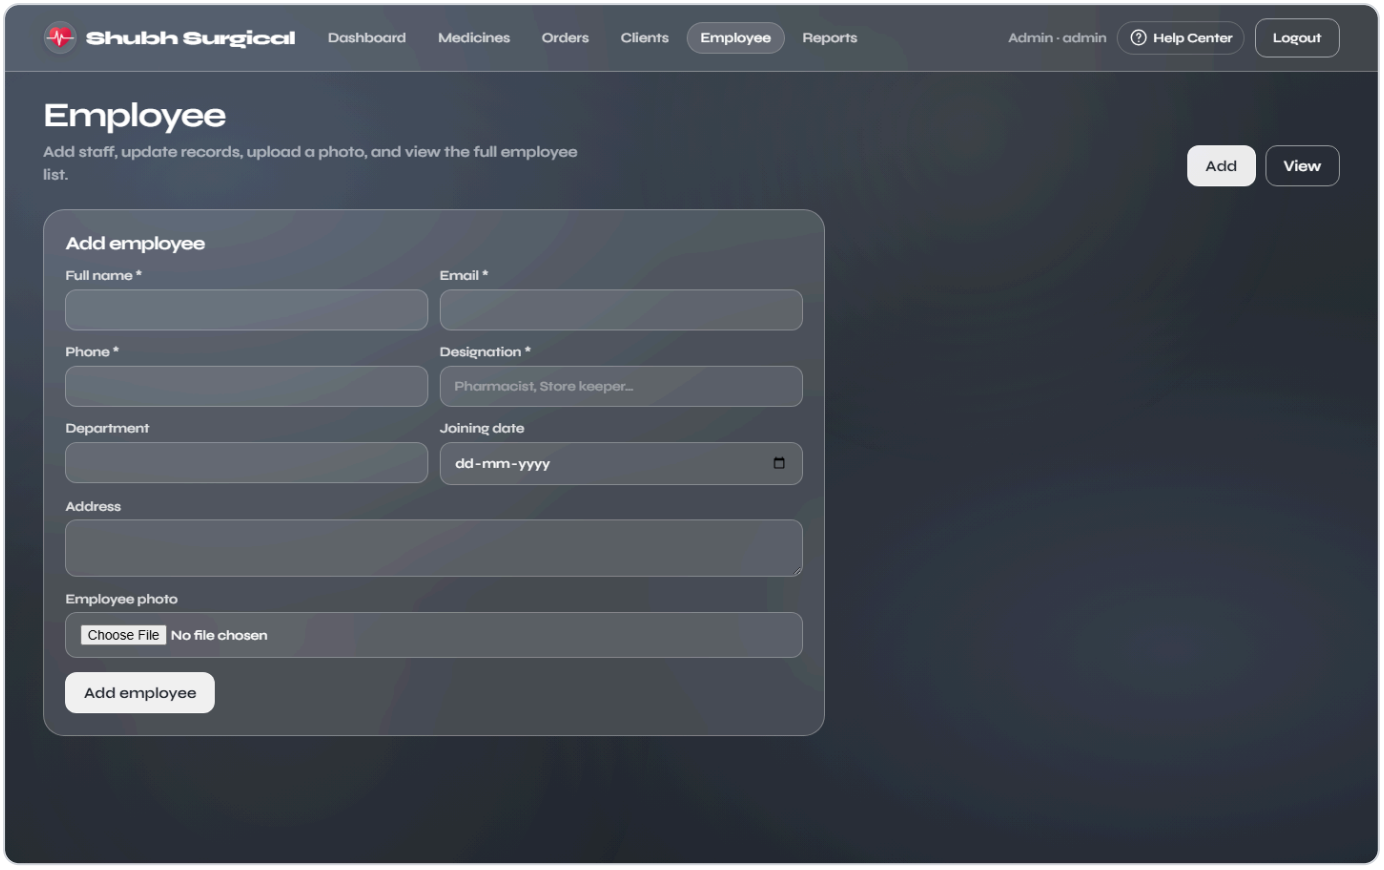

Screen: 13. Admin: Clients

14. Admin: Employee — add

> Employee sits in the admin nav before Reports. Required fields are name, email, phone, and designation. You may also add department, joining date, address, and a photo.

How to do it

1. Open **Employee**.
2. Stay on **Add** (default). Fill the required fields marked *.
3. Optionally choose an employee photo (image file).
4. Click **Add employee**. The record is saved and you can open View.

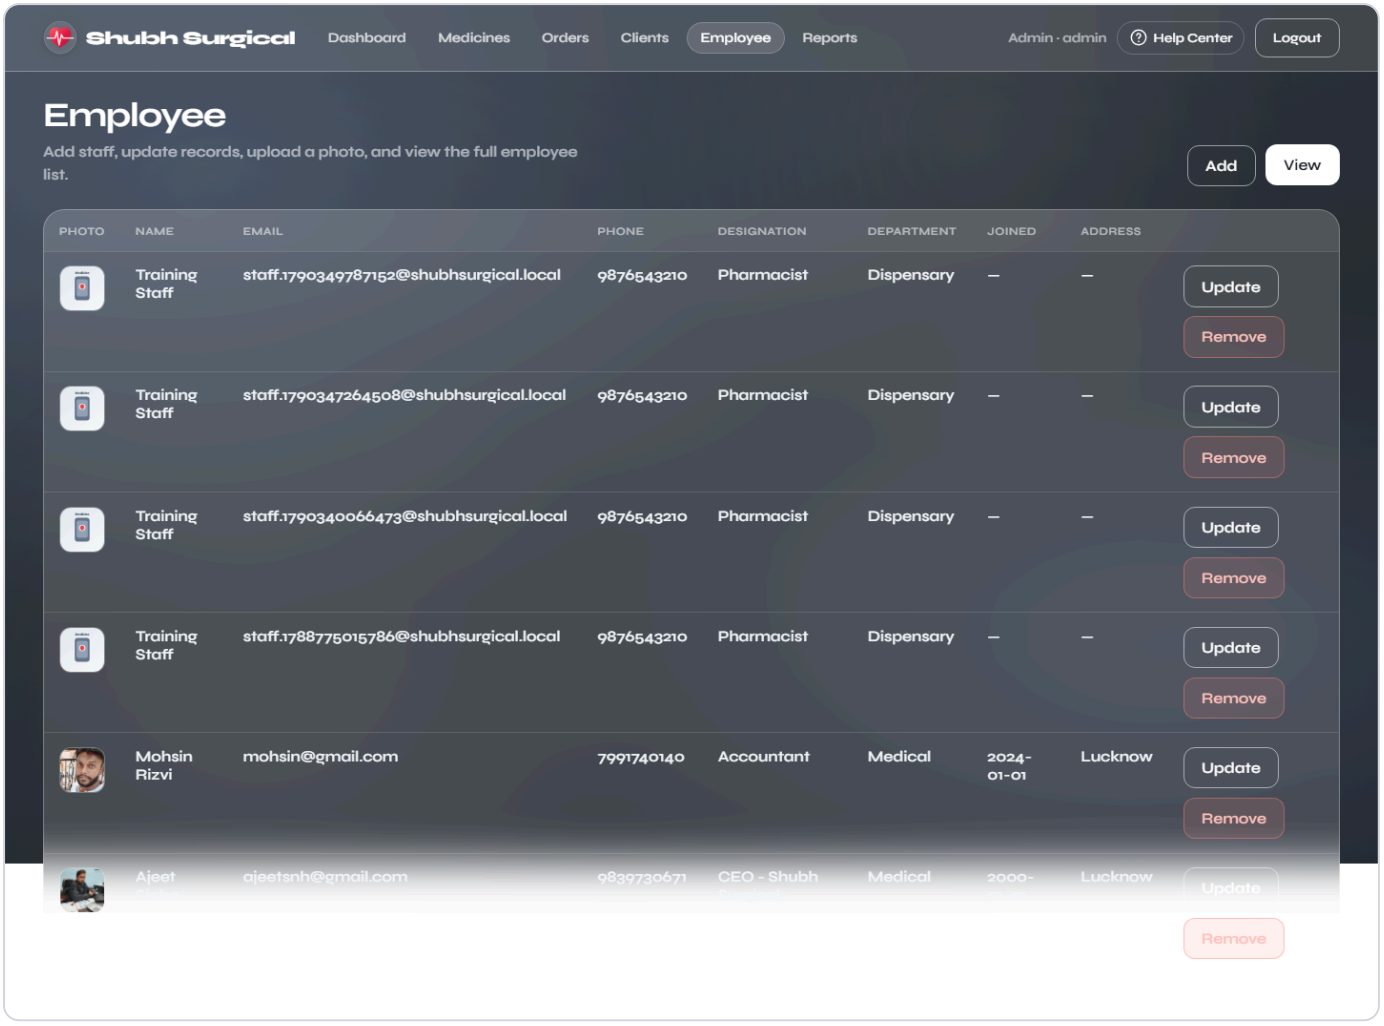

Screen: 14. Admin: Employee — add

15. Admin: Employee — view, update, remove

> View shows every employee in a table with photo and details. Update loads the form; Remove deletes the record.

How to do it

1. Click **View** to see the full employee list.
2. Click **Update** on a row to edit details or replace the photo, then save.
3. Click **Remove** and confirm to delete that employee.

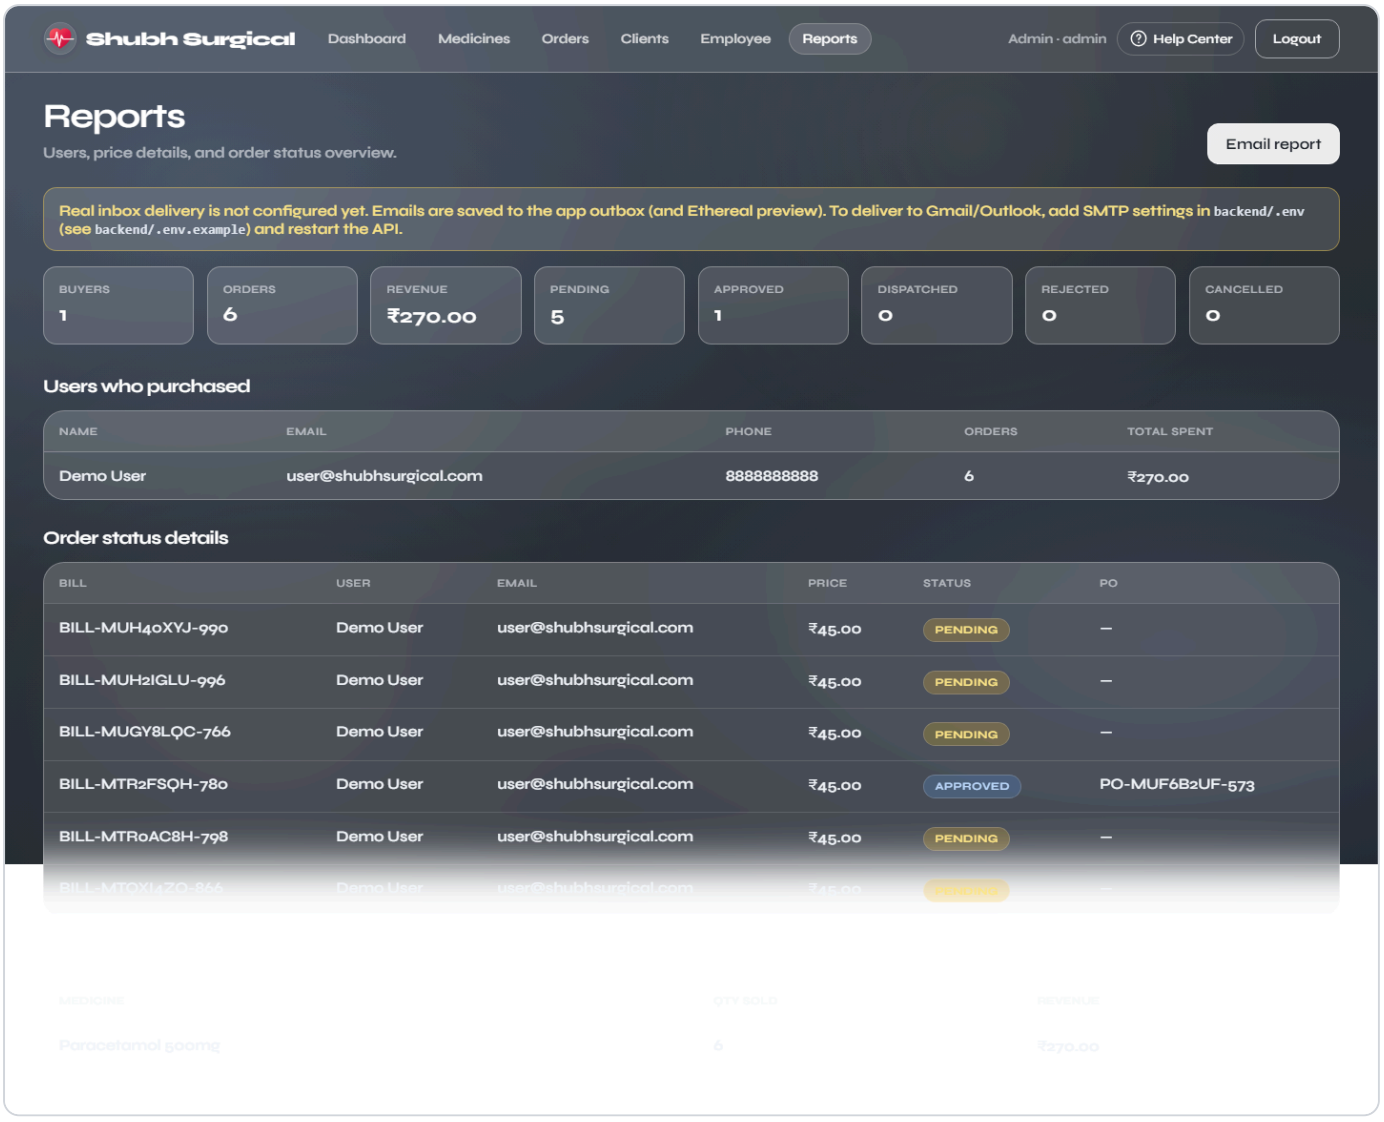

Screen: 15. Admin: Employee — view, update, remove

16. Admin: reports

> Reports summarise buyers, revenue, and order statuses. Email report saves or sends a copy for management.

How to do it

1. Open **Reports**.
2. Read the stat cards (buyers, orders, revenue, pending, approved, dispatched, rejected, cancelled).
3. Scroll for users who purchased, order status details, and top medicines.
4. Click **Email report**, enter an email id, and Send. Without SMTP, the report is saved to the local outbox and opened as a preview.

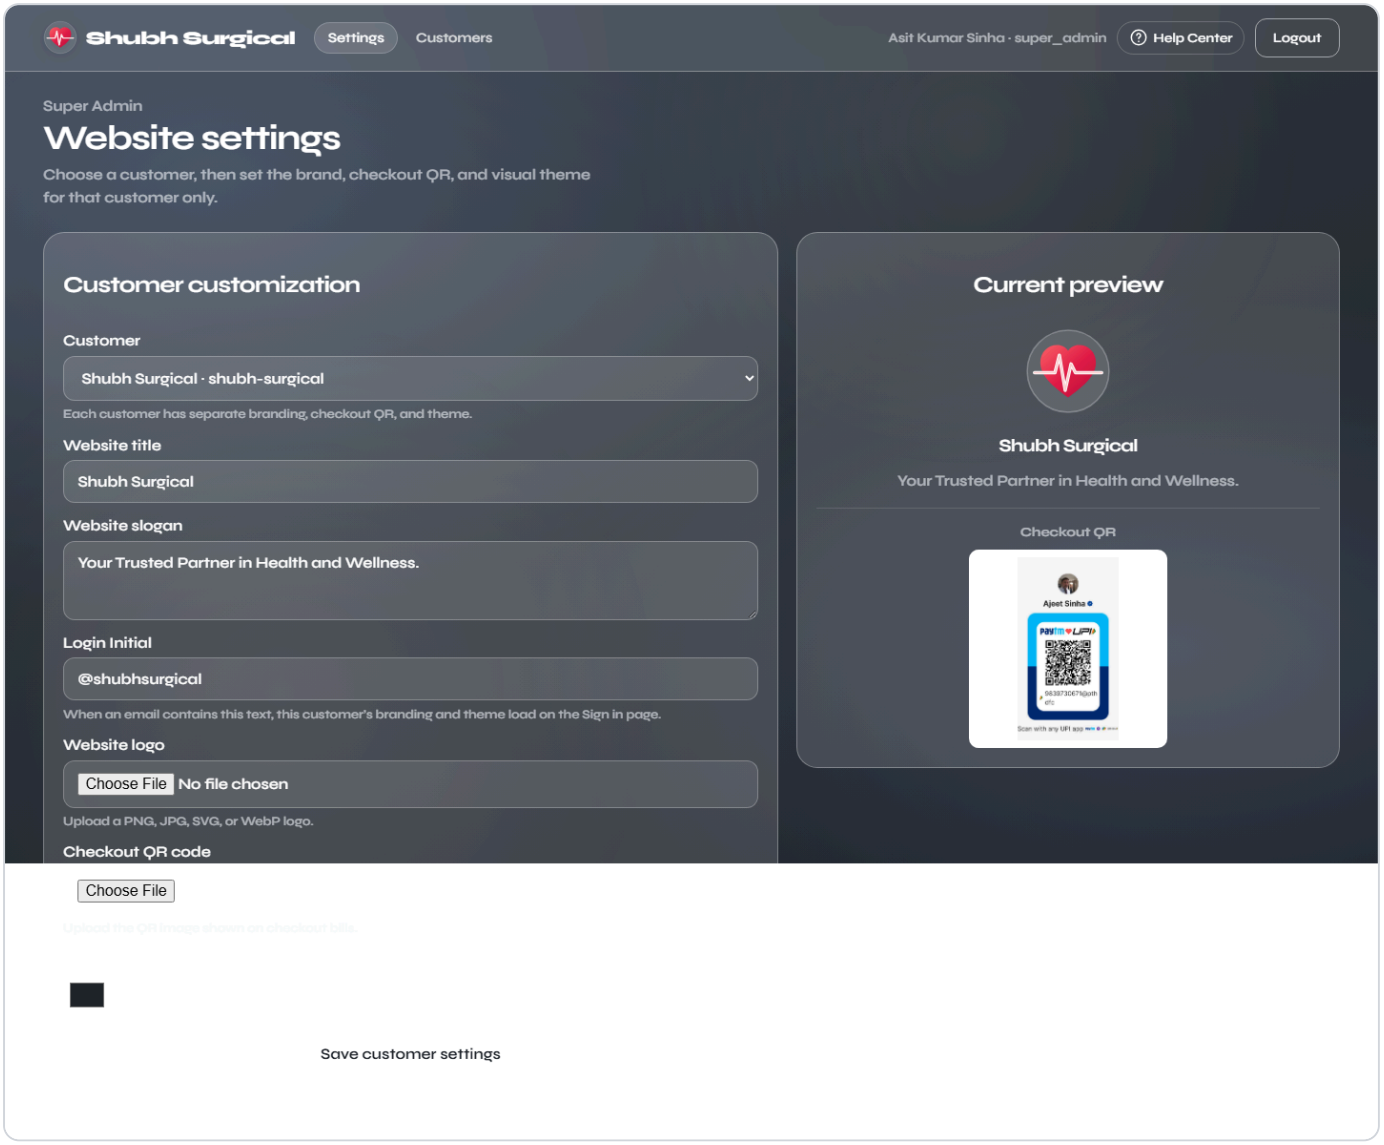

Screen: 16. Admin: reports

17. Super Admin: Settings

> Super Admin is the platform owner. Settings works customer by customer: choose a customer first, then customise only that customer's Login Initial, title, slogan, logo, Checkout QR, theme colour, and heading font.

How to do it

1. Sign in as Super Admin. You land on **Settings**.
2. Choose the target customer from the **Customer** selector. Its current branding is loaded into the form.
3. Set **Login Initial**, for example **@shubhsurgical**. When a visitor enters an email containing that text on Sign in, this customer's branding and theme load before login.
4. Change website title and slogan.
5. Optionally upload a new logo and Checkout QR image, then choose a theme colour and heading font.
6. Click **Save customer settings**. The selected customer's top bar, login page, shop appearance, and bill QR update without changing another customer.

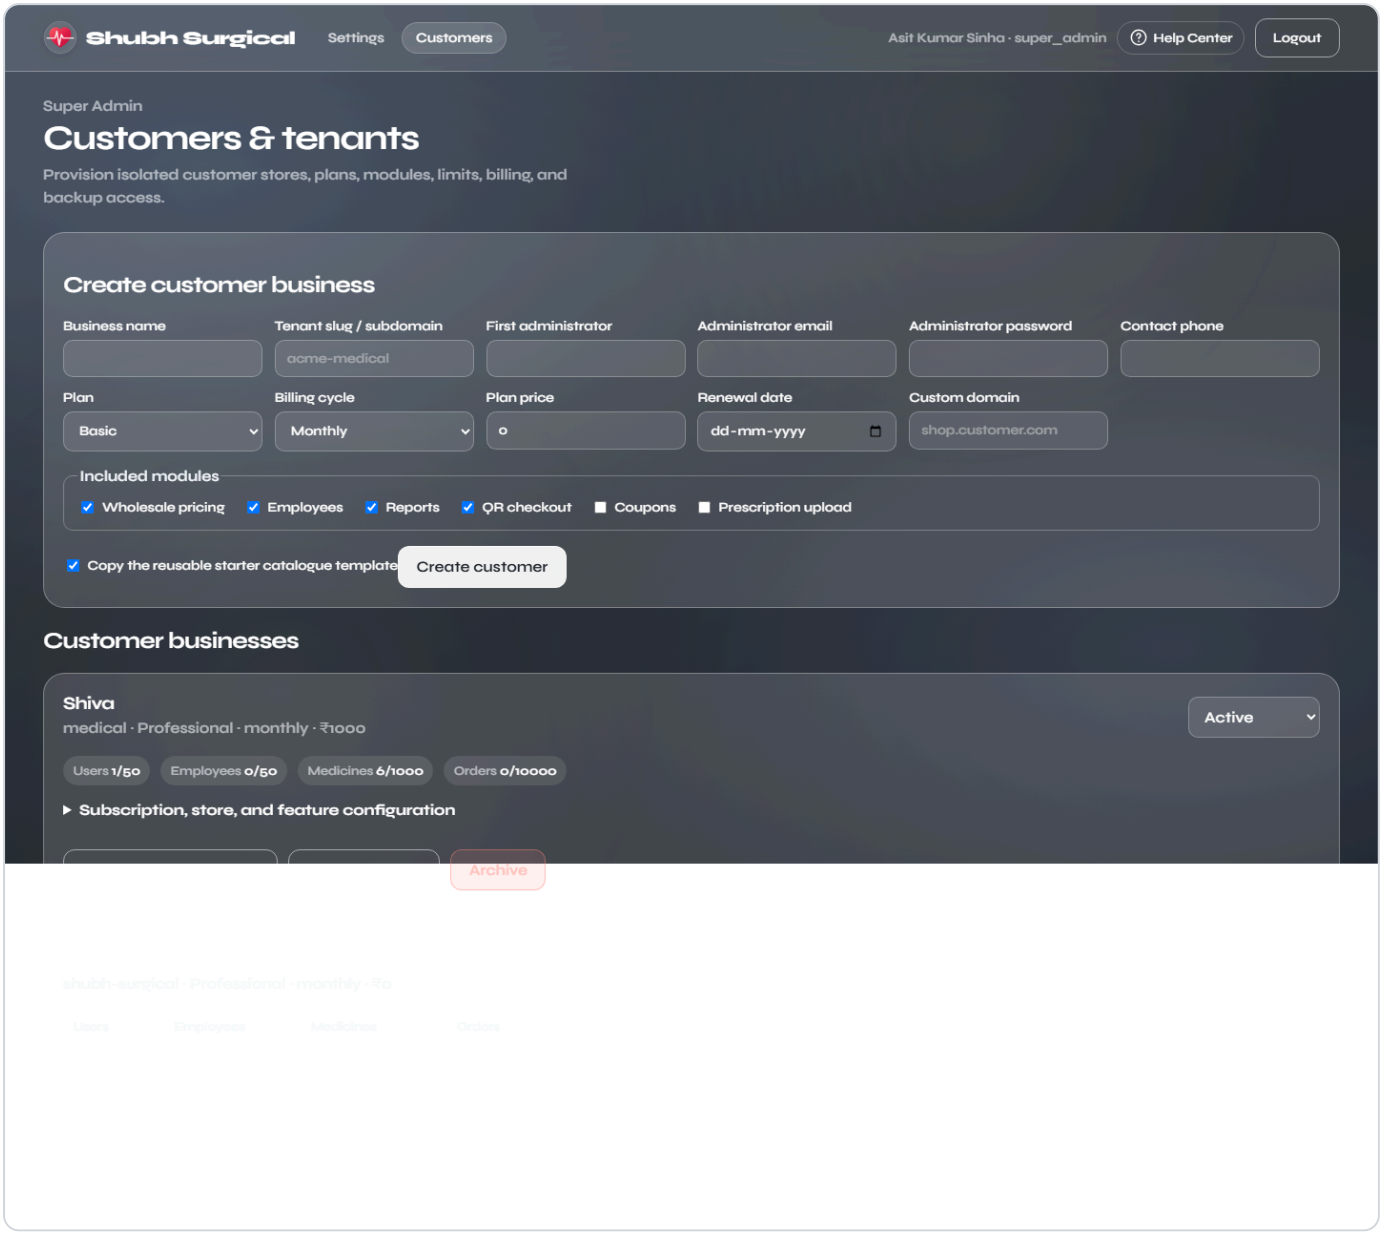

Screen: 17. Super Admin: Settings

18. Super Admin: Customers (tenants)

> Customers creates isolated businesses you can sell. Each customer gets its own admin login, catalogue, orders, and plan modules. Do not confuse this with store-level Clients (shoppers).

How to do it

1. Open **Customers**.
2. Fill Create customer business: name, slug, first administrator details, plan, modules, and optional starter catalogue.
3. Click **Create customer**, then securely give that admin their login.
4. On a customer card: change Active/Suspended/Archived, save plan and feature configuration, set the store theme/language, export backup, or archive after typing the exact name.

Screen: 18. Super Admin: Customers (tenants)

19. Order status meaning (quick reference)

Status	Meaning for training
pending	Bill and QR created. Waiting for payment check.
approved	Payment accepted. Purchase Order (PO) number is generated.
dispatched	Order packed and ready / sent out.
rejected	Admin declined the order (for example payment not matching).
cancelled	Order cancelled and will not proceed.

20. Feature map (all screens)

Who	Menu	What it does
Guest	Catalogue, Login, Register	Browse stock; create or open an account
Customer	Shop, Cart, My orders	Order medicines, pay by QR, track status
Admin	Dashboard	Today’s orders, revenue, low stock, quick actions
Admin	Medicines	Upload, edit, delete catalogue; retail/wholesale price
Admin	Orders	Approve, reject, dispatch bills
Admin	Clients	Add shoppers; retail/wholesale; block/allow; notes; password reset; CSV
Admin	Employee	Add, view, update, remove staff with photo
Admin	Reports	Sales stats and email report
Admin / Super Admin	Help Center	Opens this training PDF
Super Admin	Settings	Per-customer Login Initial, title, slogan, logo, Checkout QR, theme colour, and heading font
Super Admin	Customers	Create tenant businesses, plans, modules, backup

21. Training checklist

1. Open Register and Sign in and confirm matching left branding plus the slogan.
2. Register a new customer and confirm Shop + Cart appear (not admin links).
3. Add two medicines, change quantity, place order, scan/view Checkout QR.
4. Log in as store admin, review Dashboard, find the pending bill, approve it, note the PO, then dispatch.
5. Open **Clients**, add a client from the form, block that client, confirm the blocked login message, then Allow again.
6. Open a client with **View**, add a note, and set a new password (old password cannot be shown).
7. Open **Employee**, add a staff record with photo, View the list, Update, then practise Remove if needed.
8. Open Reports and practise Email report (outbox is acceptable in training).
9. Log in as Super Admin, choose a customer in Settings, save its Login Initial and a distinct theme, then open Customers and review tenant cards.
10. Click **Help Center** next to Logout and confirm this latest PDF opens.

End of training manual — Shubh Surgical. Version 3.2 — 25/9/2026.
